

Highlights

- During the month of November, there was a sharp increase in fighting in eastern Ukraine, registering over 2,000 incidents daily.
- More than 4,500 children were unable to go to school for several days due to an attack which damaged a main pipeline that supplies drinking water and centralised heating for more than 80,000 people on both sides of the 'contact line' in Donetsk oblast.
- UNICEF repaired and rehabilitated over 17 km of pipelines to ensure uninterrupted access to safe drinking water in Donetsk oblast.
- 2,500 children, of whom nearly 60 per cent are girls, placed a call to a UNICEF-supported hotline to receive psychological and legal assistance.
- Antiretroviral (ARV) medicines were shipped to Donetsk non-government controlled area (NGCA). With this delivery, the critical needs of patients in Donetsk and Luhansk oblasts NGCA will be met until the mid-2017.

Situation Overview & Humanitarian Needs

Limited humanitarian access to and within the non-government-controlled areas (NGCAs) of eastern Ukraine remains a concern. The ongoing hostilities along the entire length of the ‘contact line’ continue to pose a risk to life, safety and security for civilians, especially children. The cumulative impact of the armed conflict erodes the coping capacity of local communities, increasing the vulnerability of children. Given the number of damaged houses, growing poverty, as well as interruptions to electricity, water and gas supplies, a great concern is the lack of heating in kindergartens, schools, maternity units and primary healthcare centres. With primary health care services deteriorating in the rural areas and along the ‘contact line’, the risk of outbreak of communicable diseases in eastern Ukraine is a serious concern. Moreover, the ongoing dilemma of ‘cross border’ payment for utilities remains a worry for the WASH Cluster. The State Company “Popasnyanskyi Rayonnyi Vodokanal” (PRV) that distributes safe drinking water in Luhansk oblast, with over 600,000 of its beneficiaries residing in NGCA alone, is under threat of having its electricity cut off due to owing money to a local privately owned electricity provider.

Humanitarian Leadership & Coordination

In November 2016, the WASH and Education Clusters, and the Child Protection and Nutrition Sub-clusters have finalized the 2017 Humanitarian Needs Overview (HNO) and Humanitarian Response Plan (HRP), which has been publically released on 5 December 2016. The WASH Cluster continued to advocate for a resolution to the issue of PRV’s unpaid electricity bills and advocating for a more durable solution that can allow for utility payments across the ‘contact line’. Following a shelling incident in Toretsk area on 22 November, Donetsk oblast, which left over 80,000 people without access to water and centralised heating, with over 4,500 children in GCA alone unable to attend school for several days, the WASH Cluster as well as Education Cluster produced and shared with partners an incident report and identified number of affected children and their immediate needs. To restore education, close coordination between UNICEF, WASH,

Education Clusters and partners have ensured a rapid response through the provision of necessary supplies to effectively address humanitarian needs of the affected children.

Humanitarian Strategy

UNICEF continues to address the needs of the most vulnerable children by ensuring their access to education, safe learning spaces, child protection community-based services and immediate psychosocial support. By working closely with partner organizations, schools, community centers and through mobile teams, the programme supports primary health care and child protection services in conflict-affected areas. Treatment of adults and children with HIV and prevention of mother-to-child HIV transmission is also one of the main objectives of UNICEF in the existing programme. Access to safe drinking water is ensured through the provision of critical treatment chemicals, rehabilitation of infrastructure, and creation of alternative sources of safe drinking water. To achieve more effective humanitarian response, UNICEF also facilitates coordination through its leadership of the Education and WASH Clusters, and its participation in the Child Protection Sub-cluster and Nutrition Working Group. It also contributes to the Health Cluster as well as the HIV/Tuberculosis/Opioid Substitution Treatment (HIV/TB/OST) and Mine Action Sub-clusters. Collaboration is ongoing with the government at all levels, United Nations agencies, international NGOs and local partners.

Summary Analysis of Programme Response

Partnership with local NGOs enabled UNICEF to continue distribution of Education and WASH supplies throughout NGCA. The fifth shipment of ARV medicines to Donetsk NGCA took place on 30 November 2016. This final shipment will cover the needs of people living with HIV in both Luhansk and Donetsk NGCA until the middle of 2017. In GCA, UNICEF rehabilitated 17 km of water pipelines and delivered over 170,000 liters of drinking water through trucking and bottled water distribution. The partners have also distributed hygiene kits and electronic cash vouchers to cover the emergency needs of 25,329 people, including 4,559 children, living along the 'contact line'. In addition, 2,500 children, of whom nearly 60 per cent are girls, placed a call to a UNICEF-supported hotline to receive psychological and legal assistance. To reinforce the skills of staff working in Community Protection Centers (CPC), UNICEF's partner *Terre des Hommes* conducted a training on the *Minimal Standards for Child Protection in Humanitarian Action*. It is evident that ongoing hostilities, which now occur during daytime, are having a strong impact on children's psychological wellbeing. Signs of speech disorders and psychological trauma were identified among 16,000 children and caregivers who visited these CPCs. In November, the UNICEF Mine Risk Education Programme carried out a nation-wide TV and Internet campaign along with distributing printed materials in education facilities in eastern Ukraine, which reached nearly 260,000 children and their caregivers. To ensure ongoing access to education, UNICEF is continuing delivery of basic supplies to kindergartens and continues with the advocacy for a nation-wide ratification of the 'Safe School Declaration'. The Declaration is a public statement of the government's aspirational commitment to prevent attacks on and limit the military use of educational institutions to the greatest extent possible. To this end, UNICEF supports the government in developing a three-year action plan to achieve this aim.

Communication for Development (C4D)

UNICEF has finalized an integrated communication strategy to support the Ministry of Health of Ukraine revamping the routine immunization programme and rebuilding trust in vaccination in 2017. Moreover, in partnership with the largest media company in Ukraine, UNICEF launched a nation-wide campaign "You are among friends. Let's get together" to promote social inclusion of children affected by the conflict. The first component of the campaign was launched with *Tiny Stories* activation. The videos featuring celebrities reached over 14.5 million people via several TV channels, and over 50,000 viewers have seen them on social media channels. During two weeks of activation, 80 people submitted their personal stories that will form the book *Tiny Stories for Every Child* in 2017.

Supply & Logistics

The key supply activity for November was the arrangement of the ARV medicines delivery to NGCAs via the Logistics Cluster. Goods were delivered to the Logistics Cluster Wear House in Dnipro, and the Logistics Cluster has organized transportation of UNICEF HIV-related supplies to NGCAs.

Media & External Communication

On 15-16 November, the UNICEF Volleyball Cup Final took place in Kharkiv City resulting in at least 20 national media mentions. Eight teams from five eastern Ukraine regions participated in the final games of the tournament followed by a live concert from a rock band *Pianoboy*. The UNICEF Volleyball Cup was launched in October within the project "Towards Greater Social Cohesion and Integration of IDPs in Eastern Ukraine". The Cup, organized together with the Committee for Physical Education and Sports of the Ministry of Education and Science, brought together over 3,500 children, including children from IDP families, from 301 schools in GCAs.

Security

During the reporting period, the security situation in eastern Ukraine worsened. Breaches of the ceasefire agreement by the parties to the conflict occurred along the 'contact line' daily. OSCE Special Monitoring Mission reported that the security situation along the contact line seriously deteriorated in November.² The situation was further aggravated by a surge in hostilities at all crossing points, including sniper fire. Moreover, the political and economic situation in most of Ukraine is very tense, with implications for the general security situation. A heightened security regime has been announced by the Government to counter possible provocations and attempts at destabilization as daily demonstrations against high utility rates and lost deposits in bankrupted banks continued in front of the Ukrainian Parliament and the National Bank of Ukraine in Kyiv.

Funding Requirements (as defined in Humanitarian Appeal of 2016 for a period of 12 months)				
Appeal Sector	Requirements	Funds Received	Funding Gap	
			\$	%
Nutrition	1,000,000	0	1,000,000	100
Health	4,450,000	779,000	3,671,000	82
