MdM’s plan is to support the DoH in responding to Covid-19 outbreak through outreach activities and awareness sessions. The activities started on 19/03 in Chamesku IDP camp with 27 volunteers (10 DoH PHCC staff + 17 Community Health Volunteers).

The volunteers aim at informing, instructing and educating the community on best health practices and Covid-19 prevention, including handwashing. As one of the core basic protective measures against diseases and based on WHO recommendations, volunteers are trained on how to do correct handwashing. They have then been able to share prevention messages with the community through outreach activities, with a focus on handwashing regularly and thoroughly with an alcohol-based hand rub or with a soap and clean water.

CONTEXT

24/02/2020: First case of Covid-19 recorded in Iraq in Najaf city, coming from Iran.

05/03/2020: 36 confirmed cases in Iraq. Schools are closed and travel restrictions are in place for 9 countries.

Since 14/03, a curfew is in place with strict restriction of movements.

01/04/2020: 695 confirmed cases, 50 fatalities and 170 recoveries.
COVID-19 MDM RESPONSE
ACTIVITY UPDATE // 02nd APRIL 2020

**DASHBOARD**

- **2834** AWARENESS SESSIONS CONDUCTED
- **15371** INDIVIDUALS REACHED
- **4** TRAININGS PROVIDED
