Source Head of Data, Information and Disaster Communication Center)

Based on data of Communication and Information Office of Tilu Tengah Regency, until January 25, 2021 there were 10 sub districts and 76 villages affected by the floods. The number of affected people is 28,820 families or 86,825 people. The floods have killed 7 people and 3 others are missing. Some 191

houses are missing, 2,298 houses are damaged and 15,489 houses are inundated in Hu Sungai Tengah Regency.

Human Initiative volunteer team has still been on guard since 16 until 26 January, 2021. Currently the team is staying at Hantakan Village, Hantakan sub district.

Human Initiative Response Post is located at coordinate 2°38'22.0"S 115°27'17.8"E, a quite strategic location to reach villages along Hantakan Sib district watershed area.

Human Initiative is continuously coordinating with the local administration and conducting field assessment, distributing logistic, until providing basic health services, conducting psychosocial action, and cleaning up the local people's houses.

The condition of Hantakan village, the Main Post is located at the village sub district office. However, most of the local residents are setting up their own shelters at their houses. Some of them still have houses to start their cleaning activities. However for those who have heavily damaged houses or who lost their houses are staying at the Main Post.

The team found some health problems faced by the local residents such as skin health and elderly people who have not had basic health services by the local paramedics.

On Monday (25/01) the team coordinated with the local health office to convey the condition found by the response team. In addition the coordination is expected to be able to facilitate the local residents in receiving the health service conducted by the local community health center.

Meanwhile the condition in other areas namely Batu Tunggul village, some children suffer from psychosomatic. They often scream hysterically when they hear rain falls. This condition has become a big task for the team in the field to accompany psychosocial activity at Batu Tunggul village, Hantakan sub district.
