

# Areas Surveyed by the DMA-WFP Targeting Exercise

VAM Unit  
Lesotho Country Office

### Interpretation:

Chronic vulnerability to hunger and poverty prevail in the Southern Lowlands and Senqu River Valley areas of Lesotho. This map shows the areas assessed by the DMA and WFP in the recent Targeting Exercise.

The exercise surveyed 26 constituencies, covering 1,520 villages in the two livelihood zones and captured information on 39,000 poor-rural households. These households were assessed to be vulnerable to hunger and poverty. Some 31,000 households were interviewed to verify their vulnerability. Key results from the exercise are illustrated in the five thematic maps.
