Following the initiative of UNHCR and with the support of the CCCM Cluster and WFP, a group of organizations (INGC, PRM, UNHCR, WFP, IOM, UNFPA, UNDP, OCHA, and UNICEF) has been meeting since early August to enhance the response to security-related incidents reported in resettlement sites and local communities. The group is currently working on the update of an initial draft Terms of Reference of community-based structures, such as the Conselhos Comunitários de Segurança, Polícia Comunitária and Conselhos de Gestão dos Bairros de Reassentamento. Through a number of trainings on e.g. Child Protection, prevention of GBV, Fraud and Corruption to be conducted by its members, this initiative is a work-in-progress and aims ultimately at building the capacity of community-based structures to strengthen their own safe and security.

**Resettlement sites**

- **22 Sites**
  - **9,123 Total No. of Households (H)**

Data source: Beira CCCM Cluster Updates, 24 August 2019

* Grudja: Planned 1,480 Households. The government started relocation in mid-August, but the site did not have services. CCCM cluster advocated to stop the relocation until partners could get a minimum of services in place.

The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations. For Feedback: Jose Fischel de Andrade - fischel@unhcr.org, Protection Cluster Coordinator| Maroun Sader - sader@unhcr.org,IMO
