Region XII

Cotabato City

- ❖ **The heavy downpour as a result of TY “Frank” has left almost more than 75% of Cotabato City underwater. One urgent concern is the accumulation of water lilies at the Delta Bridge estimated to be 7 hectares, 3 meters thick spanning the entire length of the bridge. The vegetation/water lilies serves as impounding dam causing the Rio Grande de Mindanao to divert its flow to the low lying areas of Cotabato City thereby submerging more than 75% of the total land area of the City.**
- ❖ **Efforts to remove the vegetation/water lilies is being undertaken by the City Government using employees, volunteers and heavy equipment in cooperation with other agencies. With the Rio Grande de Mindanao severely silted, the flood waters from up stream (Cotabato Agus River Complex) is expected to flow to the sea through the Tamontaka River, a major tributary of Rio Grande de Mindanao submerging all low lying barangays of the City in between the rivers.**
- ❖ **As of today, 5 July, there are 14,014 families affected with 3,058 families housed in 13 evacuation centers while the rest are within their own barangays. The City Government is providing relief goods to the evacuees.**
- ❖ **Urgent needs are: 1) Provision of relief food and medicines to all affected families; 2) Declogging of the Delta Bridge using enough equipment to be able to catch up with the build up of the water; 3) Reopening the Simuay cut off channel; and 4) Dredging the Rio Grande de Mindanao, the Simuay River and its tributaries within the Cotabato City.**
