Environmental Assessment Unit		Team with unmanned aerial vehicles
Forest Fire Fighting with Planes		Shelter Capacities
Ground Forest Fire Fighting		Maritime Incident Response Group
Ground Forest Fire Fighting with Vehicles		Marine Pollution Capacities
Team for firefighting advisory/assessment (FFAT)		

The European Emergency Response Capacity is commonly referred to as the "voluntary pool". It consists of a range of emergency response capacities that countries participating in the EU Civil Protection Mechanism make available for EU emergency response operations. Since the establishment of the voluntary pool in October 2014, 20 Participating States have brought together 87 civil protection capacities which are now available (or will eventually become available) for EU operations worldwide, following a request for assistance through the European Commission's Emergency Response Coordination Centre.

*This designation is without prejudice to positions on status, and is in line with UNSCR 1244/1999 and the ICJ Opinion on the Kosovo Declaration of Independence.
