Operational factors, including delayed submission by some FMPs, may affect trends on a week-by-week basis. Figures with: ↑ upward trend, ↓ downward trend, = no change. For a more detailed breakdown, contact southsudanDTM@iom.int.

During this reporting week, a total of 6,435 entrants were surveyed. Of these, 65.5% of surveyed travelers were South Sudanese nationals; 26.9% were from Uganda; 3.3% from DRC; 1.6% from Kenya; and a further 2.7% were from other countries. Entrants' origin information is self reported.

WEEKLY OVERVIEW

WASH

- The WASH team completed IPC/WASH Assessments of the 9 Health facilities receiving IPC/WASH support from IOM with the final assessments conducted for Morobo PHCC and Rodoba PHCU in Morobo county
- A total of 15 volunteers received refresher trainings during the course of the week. This brings the total number of volunteers that have received PSEA orientation training to 120.

HEALTH

- Active screening ongoing in 15 IOM-supported PoE sites, namely: Yei airstrip; Yei SSRRC; Tokori; Lasu; Kaya; Bazi; Salia Musala; Okaba; Khor Kaya (along Busia Uganda Border) and Isebi in Morobo County; Pure; Kerwa; Khorijo; Birigo in Lainya County; and Bori.
- Refresher training was conducted for screeners at at Birigo PoE on EVD BH & PoE SOP.

INDIVIDUALS SCREENED THIS WEEK: **22,260**

SUSPECTED/ CONFIRMED EVD CASES: **0**

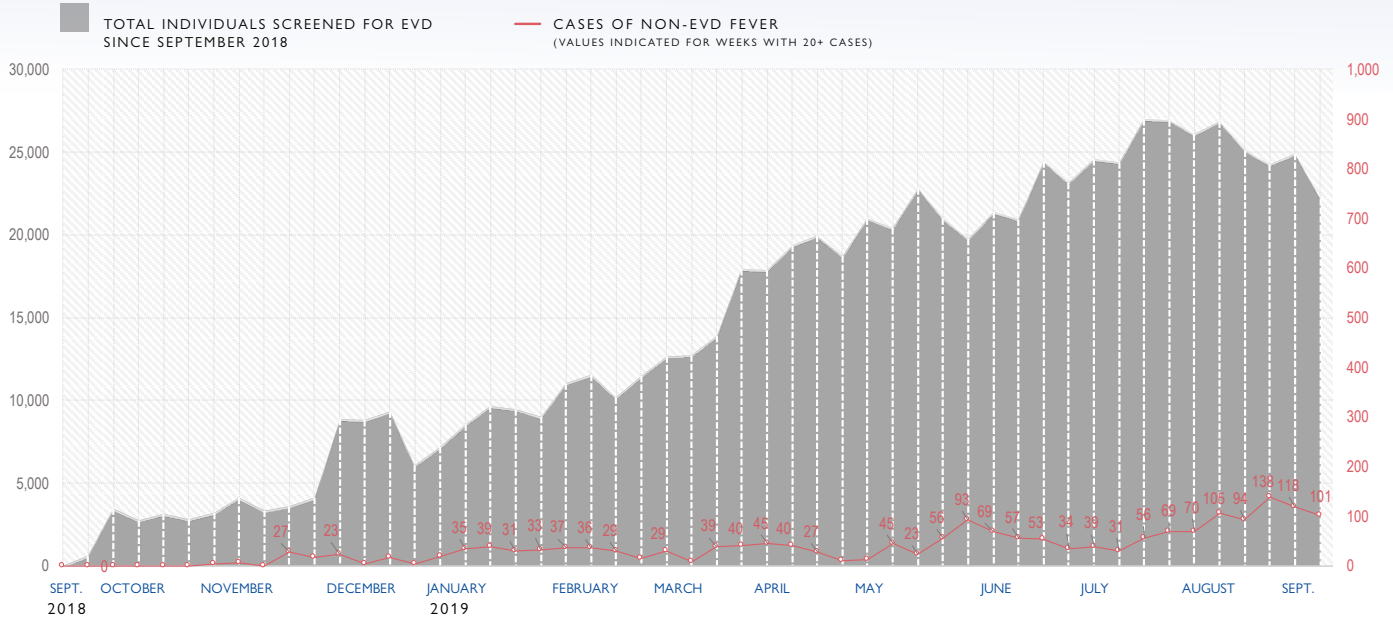

INDIVIDUALS REACHED WITH HYGIENE PROMOTION: **252,033**

HEALTH FACILITIES SUPPORTED THROUGH WASH ASSISTANCE: **9**

WEEKLY EVD SCREENING

HEALTH UPDATES

During the reporting period, 22,260 inbound travelers to South Sudan were screened for EVD exposure and symptoms, which is a decrease by 10.68% compared to previous week's total number of individuals screened. Okaba PoE contributed to this decrease, which may be attributed to the continuous rains that disrupted the market days and thus decreased inbound travelers in that border crossing. Kaya and Pure PoE also recorded a drop in numbers screened compared to last week. All other PoEs had insignificant variations in numbers screened.

A total of 101 individuals presented with non-EVD fever, as follows: 19 at Khor Kaya; 17 at Birigo; 16 at Pure; 11 at Bazi; 10 at Bori; 8 each at Khorijo, and Salia Musala; 7 at Okaba; 3 at Kaya; and 1 each at Kaya, and Kerwa. Fifty-four (54) non-EVD fever cases recorded normal temperatures after subsequent measurements. All the other 47 cases were referred to the nearby health facilities for further management and treatment for malaria, respiratory tract infection (RTI), and diarrhea diseases. There were no suspected or alert cases reported during the reporting period.

WASH UPDATES

During the reporting period, IOM continued hygiene promotion activities in and around all the 17 locations (Yei SSRRC screening point, Pure, Morobo, Khorijo, Kaya, Gimunu, Tokori, Marakonye, Lasu, Attende, Salia-Musala, Busia (Kor-Kaya), Kerwa, Bori, Bazi, Berigo and Isebi). Hygiene promotion sessions at schools, markets and water points, reaching approximately 3622 individuals (1047 Men, 1043 Women, 682 boys, 850 girls) during this reporting week.

HYGIENE PROMOTION ACTIVITIES

DTM UPDATES

All 23 FMPs, including the six operated in cooperation with DTM Uganda, submitted data for 1 – 7 September on time. Based on data submitted by Tuesday 10 September, 6,435 individuals were surveyed on arrival to South Sudan during the reporting period. The main regions of departure were Koboko in Uganda (34.4% of respondents) and Ituri in DRC (21.6%), while the main reported counties of destination were Morobo (54.2%) and Kajo-Keji (14.4%). Most respondents reported South Sudanese nationality (65.5%), followed by Ugandan (26.9%).

SECURITY & ACCESS CHALLENGES

- Remote monitoring done for Lasu and Tokori due to access issues. The poor mobile network makes communication from Yei Town to Lasu and Tokori more challenging. Currently, no reports have yet been received from Tokori and team on the ground are making follow-up attempts to know the situation in Tokori.
- Access challenge in some areas in Lujulu remains.
- Reports of IDPs arriving in Yei town from locations along the Yei- Maridi road could explain the lack of reports from Tokori PoE for this week and might further impede access to this location

COORDINATION & ASSESSMENT NOTES

- IOM continues to actively participate in the national level coordination meetings such as SAG, NTF and TWG meetings including the IPC/WASH, Border Health and Points of Entry (BH &PoE), Epi & Surveillance, Risk Communications Social Mobilization and Access and Security Technical Working Groups (TWGs). IOM also attends weekly Yei STF, state surveillance meetings and monthly coordination meetings in Morobo and Kajo-Keji Counties.
- IOM is regularly conducting monitoring & supportive supervision at all the PoE sites.
