The mission of the United Nations Office for the Coordination of Humanitarian Affairs (OCHA) is to Coordinate the global emergency response to save lives and protect people in humanitarian crises. We advocate for effective and principled humanitarian action by all, for all.

www.unocha.org

1. As of 7 June, the Government of Indonesia has announced 31,186 confirmed cases of COVID-19 across all provinces of the country, with 1,851 deaths, 14,197 patients under surveillance and 40,370 people under observation. The Government has also announced that 10,498 people have recovered from the illness, and over 400,000 specimens has been tested by using the Real Time Polymerase Chain Reaction Assay (RT-PCR) and the Molecular Rapid Test for Tuberculosis (TCM TB) methods. On 4 June, the President of Indonesia set a new target of 20,000 tests to be conducted per day.

2. A sharp increase in the number of cases has been confirmed in the last few days in the areas of East Java, South Kalimantan and South Sulawesi. The impact of such increase had a visible impact on human activity. For example, the Institute for Tropical Disease of Surabaya Airlangga University had to reduce the COVID-19 lab testing service it provides due to some of its personnel being infected by corona virus. The National Task Force for the COVID-19 Response has provided support to increase the number of swab tests in the East Java Province by mobilizing five COVID-19 test cars (two PCR test cars and three microbiological safety cabinet cars). A hospital epidemiologist in South Kalimantan highlighted that the province’s capacity to conduct tests is only of 100 tests per day. In South Sulawesi, the Regional Task Force for the COVID-19 Response announced that at least five hotels are being utilized as isolation locations, accommodating 1.376 people, of which 765 have recovered.

3. Considering that many parts of the country have shown improved health indicators, and given the need for people to restart productive activities in a safe manner, the Ministry of Health has issued Guidelines Towards a New Normal. The Guidelines are a point of reference for regional governments that implement Large-Scale Social Restrictions (PSBB) to be transitioning towards the New Normal stage. At the end of May, the National Task Force for the COVID-19 response announced the classification of 102 districts/cities as safe or not affected, and they can resume activities by adopting the new safety and precautionary practices. The following map, from the National Task Force, identifies the 102 districts/cities:
4. To minimize the spread of corona virus triggered by people’s mobility between cities or regions, the National Task Force for the COVID-19 Response (through its Circular Note number 5 of 2020 concerning the Amendment to Circular Note number 4 of 2020 concerning Criteria for Limiting Travel for People in the Context of COVID-19 Response) sets the criteria for people who can travel, with certain requirements, as follows:
   • For workers engaged in government or private institutions’ activities;
   • For patients who require emergency health services or for people whose core family members are seriously ill or dead; or
   • For repatriation of Indonesian migrant workers, Indonesian citizens and students who are abroad, and the repatriation of people by the Government to the regions for special reasons;

The transitional regulation towards the New Normal is valid until 7 June. In addition, some regions in Indonesia apply additional requirements for people who will enter their respective regions, for example:
   a. Bali: a Circular Note of the Governor of Bali Concerning the Control of Travel of People at the Entrance of the Bali Region and the Acceleration of the COVID-19 Response regulates that travelers need to have a valid COVID-19 negative test result certificate, as well as fill in the application form which can be found at [https://cekdiri.baliprov.go.id].
   b. Jakarta: Everyone who wish to leave or arrive into Jakarta has to have an Exit / Entry Permit (SIKM – Surat Ijin Keluar/Masuk), as regulated through the Jakarta Governor’s Regulation number 47/2020 concerning Restrictions on the Activities of Departure and/or Arrival into the DKI Jakarta Province for the Prevention of COVID-19 Spread. The permit is processed through [https://corona.jakarta.go.id/id/izin-keluar-masuk-jakarta].

5. The Governor of Jakarta has extended large-scale social restrictions for the province to June; this extension will also serve as transition period towards the New Normal phase. The re-opening of places of worship, offices, outdoor sports spaces, restaurants, malls, dan pasar for non-food sellers, indoor/outdoor recreational parks, and others would be done gradually, initially at 50% of the regular capacity and requiring people to wear masks and maintaining physical distancing. Exceptions will be applied to 66 out of 2,741 neighborhood areas that are classified as high-risk.

6. Meanwhile, 15 out of 27 districts/cities in West Java have started implementing the New Normal / Adaptation to New Practices phase on 1 June.

7. On 3 June, the Minister of Finance announced that Government social assistance programmes are targeting 40 per cent of the most affected people in Indonesia. Most of them are farmers, ranchers and planters (18.4 million people), traders and private sector workers (4.2 million), construction workers (3.4 million), factory workers (3.3 million), drivers and communication workers (1.3 million), and fishermen (nearly 900,000 people). The Government has also decided to extend social assistance provided until September and December 2020, from the initial plan of three months (April to June) albeit with reduced amounts of assistance, as follows:

<table>
<thead>
<tr>
<th>Program</th>
<th>Target</th>
<th>Assistance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Program Bantuan Sosial Sembako or Food Package Social Assistance Program</td>
<td>1.3 million HHs in Jakarta, 600,000 HHs in Greater Jakarta (Bogor, Depok, Tangerang, and Bekasi)</td>
<td>Budget allocation is at IDR. 6.8 trillion. Food packages valued at IDR. 600,000 per month for initial three months (April-June). It is extended for six months (July-December) with reduced monthly assistance to IDR. 300,000. The packages are to be delivered by PT Pos, PT Pasar Tani or online motorcycles.</td>
</tr>
<tr>
<td>Program Bantuan Sosial Tunai untuk masyarakat diluar Jabodetabek or Cash Assistance Program outside Jakarta and its greater area</td>
<td>9 million HHs in outside the greater Jakarta who do not receive Bansos, PKH, Pra-Kerja and Sembako, More HHs can be assisted through</td>
<td>Budget allocation is at IDR. 32.4 trillion IDR. 600,000 per month for initial three months (April-June), and IDR. 300,000 for the extended six months (July-December) the assistance, through PT Pos or Himbara (the State Bank Association).</td>
</tr>
</tbody>
</table>
allocated fund from provincial and local governments. While the first cycle of assistance is completed, the second cycle starts in early June and the third cycle on the third week of June. Beneficiaries can check whether their names have been registered through www.cekbansos.siks.kemsos.go.id or the SIKS-DATAKU phone application.

Program Bantuan Langsung Tunai Dana Desa or Village Fund Social Assistance Program

- 12.3 million HHs in 75,436 villages, whose family members lost their jobs and do not get other social assistance. Can also be provided to HHs who have chronically ill family members.
- Budget allocation is at IDR. 31.8 trillion.
- IDR 600,000 per month for initial three months (April-June), and IDR. 300,000 for the extended three months (July-September).
- In the first month of the distribution of BLT DD, the collected data was not verified by the regional governments due to time constraint; however, the verification will be undertaken in the following cycles.

8. To support Micro, Small and Medium Enterprises (MSMEs) that are affected by COVID-19, the Government is providing a fiscal stimulus for a total of IDR. 68.21 trillion through the National Economic Recovery (PEN - Pemulihan Ekonomi Nasional) program. The assistance is undertaken through the following policies:

1) Interest subsidies of IDR. 34.15 trillion for MSMEs and ultra-micro UMi enterprises, which consist of:
   • Postponed installments and interest subsidies for the first six months, of 3-6 percent for the micro-small segment and 2-3 percent for the medium segment, with a total allocation of IDR. 27.26 trillion to be implemented through People Credit Banks (BPR) and financing companies,
   • Delayed installments and interest subsidies for customers of the People Business Credit (KUR – Kredit Usaha Rakyat), UMi, Mekaar, and Pegadaian, with a total allocation of IDR. 6.4 trillion; and
   • Relaxation of interest subsidies for six months, with a total allocation of IDR. 0.5 trillion and implemented through fintech agencies, cooperatives, and the Ministry and departments of Cooperatives.

2) Tax incentives of IDR. 28.06 trillion.

3) Guarantees for new MSMEs working capital loans of IDR 6 trillion, which would be used for spending on guarantee services (IJP) of IDR 5 trillion, and Government guarantee reserves of IDR. 1 trillion.

The Coordinating Minister for Economy announced that until the end of April, the stimulus has been well received by some sectors, but the other sectors such as fisheries still needs further outreach.

9. There are now 388 non-government institutions with over 2,000 activities recorded in the 3W – “who does what where” – tool to date. The most active areas include health, reproductive health and WASH, while the geographical areas with the greatest number of activities are in DKI Jakarta, West Java, East Nusa Tenggara and Central Sulawesi. The sharing of data and information can be done by any organization in any of the following three formats: Kobo Toolbox, Google form or MS Excel, through the following links:
