Overview
Since 16 March when the coronavirus was first reported in Somalia, confirmed cases have surged to 2,894, with 90 associated deaths and 887 recoveries. The cases, which include 133 health workers across the country, have mostly resulted from community transmission, and men constitute nearly two-thirds. The coronavirus has exacerbated pre-existing vulnerabilities, disrupted positive gains in socio-economic activities and affected livelihoods especially for low-income earners. Furthermore, the cases have surged at a time that Somalia is struggling to contain floods that have affected nearly a million people and desert locusts that are devouring crops and pasture in Somaliland, Puntland and Galmudug; creating a triple threat. Concern is growing that the virus may spread to IDP settlements, where 2.6 million live in congested shelters.

UN agencies and partners have scaled up their responses to the pandemic, despite COVID-19-related operational challenges such as most staff working from home, in restricted environments or remotely; restrictions on flights and closure of borders thereby disrupting supply chains. The agencies and partners have built the capacity of the health system including supporting the establishment and operation of testing laboratories in Mogadishu, Garowe and Hargeysa; provided equipment and operational support to hospitals, isolation centres and laboratories; and scaled up awareness-raising. At the same time, ongoing humanitarian operations are continuing. In May, 2.3 million people received food assistance, with amounts scaled up to mitigate food security implications by distributing combined two-month rations.

Situation Highlights
- 2,894 confirmed cases
- 887 recovered cases
- 474 close contacts under follow-up
- 277 beds in two quarantine sites
- 1,917 active cases
- 6,677 # of samples tested
- 510 events investigated
- 334 isolation beds ready
- 2,000 PPEs distributed to all states

Risk Communication & Community Engagement

The Risk Communication and Community Engagement (RCCE) task force comprising Government entities, UN agencies, NGOs, media partners and AMISOM, has been instrumental in raising COVID-19 awareness, dispelling rumours and countering stigma. The task force has reached 10.9 million people including 1 million IDPs in 867 sites, using different educative platforms such as information, education and communication materials, SMS messages, TV and radio broadcasts, as well as community level interventions such as public addresses and household visits to scale-up public sensitisation. The RCCE activities involve frontline workers and community opinion leaders.

Key figures

- TV broadcasts: 4,399
- Radio broadcasts: 5,838
- SMS broadcasts: 167,529
- Feedback received: 54,330
- Rumors tracked: 7,415
- Hours in Public Addressing: 5,538
- Households Visited: 458,492
- Frontline workers Involved: 18,654
- IEC Materials Produced: 153,751

**Funding and Response**

Donors have provided $39.4 million for the Somalia component of the COVID-19 Global Humanitarian Response Plan, meeting 17.5 per cent of funding requirements. Almost half ($19.4 million) has been provided for distribution across multiple clusters, including health, protection, nutrition and WASH. The remaining funds have been allocated primarily for health, food security and protection, with smaller contributions for CCCM, enabling programmes and WASH. Protection is the best covered cluster, with a quarter of its funding needs met. Five clusters have not yet received any funding, including education which has the third largest budgetary needs following food security and health. In total, $186.2 million is still required to meet the immediate health and humanitarian needs of people in Somalia affected by COVID-19.

Total required: $225 million
Overview

Somalia's sea ports are operational (Mogadishu, Kismayo, Berbera, and Bossaso). The key airports are open for cargo but closed to passenger flights except Hargeysa which is open for Ethiopian Airlines passengers to Addis Ababa. The Berbera corridor is open for WFP and commercial entities. Having received authorisation from Somali and Ethiopian Governments, WFP Aviation is chartering flights within East Africa.

The Logistics Cluster, jointly with UNHAS, is supporting the transportation of medical teams and COVID-19 supplies including PPE kits, for the Federal Ministry of Health (FMoH), transporting 11 MT and 162 officials to Doolow, Belet Weyne, Afmadow, Bardera, Kismayo, Gaalkacyo, Guriel, Burte Bulo, Dhuusamarreeb, Hudur and Garbaharey, from 28 May to 9 June. The Cluster facilitates dedicated cargo airlifts on behalf of the FMoH, Office of the Prime Minister (OPM), WHO and key health partners; dispatching over 24 MT to Dhuusamarreeb, Kismayo, Baidoa, Jowhar, Hargeysa, Belet Weyne, Garowe, Guriel and Barawe as of 25 June. Also, WFP through the Logistics Cluster has been supporting Office of the Prime Minister (OPM) in developing a stock inventory tool.

The Cluster facilitated the air transportation of 300 refugee housing units on behalf of UNHCR, to Baidoa and Doolow, for flood response. The Cluster also facilitates the air transportation of essential flood response cargo such as sandbags and non-food items like hospital beds and tents; transporting 115 MT on behalf of five organisations (OPM/FMoH, Gredo, UNHCR, IOM, MOHADM) to Baidoa, Belet Weyne, El Berde, Doolow, Hobyo and Jowhar, as of 25 June.

Key Activities

- **10** Total number of passenger flights flown into Somalia since May 2020
- **300** Total number of passengers transported via UNHAS flights within Somalia
- **75** Total number of passengers transported by WFP Aviation from Addis – Mogadishu - Addis
- **45 metric tons** Total amount of cargo transported including medical supplies
- **37** Total number of partners supported (coordination and facilitation of logistics services)
- **UNHAS** has been facilitating the timely movement of blood samples to key laboratories in Mogadishu and Nairobi on behalf of the Ministry of Health

Airports, Ports and Border Crossing Status

- **Closed Crossing**
- **Open Crossing**
- **Seaport Entry**
- **Airports open for Cargo**
