

# Darfur Crisis: Rain Timeline

## 16 June 2005

Time remaining before seasonal rains cut off sites in Darfur and Eastern Chad

Date the rains normally set in.

Number of days until the rains normally set in.

June 9 - 15, 2005 Precipitation (mm)

Note: The position of the ITCZ usually represents the northward extent of monsoonal rainfall. Due to regional influences and seasonal changes, the actual northward extent of rainfall will vary. The normal position of the ITCZ is best used as a guide.

Use the number of days to estimate the time remaining until the rains begin
