Situational Report No. 4 re Effects of Typhoon “Paeng “ (Cimaron)

Releasing Officer:

GLENN J RABONZA

Administrator, OCD and
Executive Officer, NDCC

DATE: 31 October 2006 as of 6:00 AM

I. Background

“Paeng” started to develop into a tropical depression in the morning of October 27, 2006. Moving west northwest, it gained strength and became a severe tropical storm as it continued to increase its threat to northern and central Luzon. “Paeng” as a typhoon with maximum sustained winds of 195 kph near the center and gustiness of 230 kph had made landfall over southern Isabela at around 9:00 PM, 29 October 2006.

As of reporting time, Typhoon “Paeng” has changed course and is now moving West Southwest heading towards the Eastern coast of Vietnam.

At 4:00 AM today, the eye was located at 290 kms West Northwest of Dagupan City or 330 kms West Southwest of Vigan, Ilocos Sur (16.7 °N, 117.5° E) with maximum sustained winds of 120 kph and gustiness of up to 150 kph moving west southwest at 13 kph.

Typhoon “Paeng” was estimated at 570 kms West of Dagupan City or 540 kms West Northwest of Iba, Zambales by tomorrow morning. It will be at 740 kms West Northwest of Iba, Zambales by Thursday morning.

Public Storm Warning Signal (PSWS) No. 1 is hoisted over La Union, Pangasinan, and Zambales

NDCC MEDIA UPDATE

III. Response/Consequence Management

1. Early Warning: Dam Monitoring and Flood Forecasting

Flooding will still remain in the low-lying areas of Sta. Barbara, Calasiao, Binmaley, Binalonan and Cities of Dagupan and Urdaneta due to slow recession of Allied-Sinocalan and Tagamusing Rivers.

In Cagayan Province, flooding is expected to persist this evening

- in the low lying areas of Echague, Alicia, Angadanan, Cauayan and Reina Mercedes due to slow recession of the Upper Main Cagayan River and tributary Magat River;
- in the low-lying areas of Naguilian, Gamu, Ilagan, Tumauni, Delfin Albano, Sto. Tomas, Cabagan, Sta. Maria and San Pablo due to further rise of Middle Main Cagayan River and its tributaries Pinacanauan River of Ilagan and San Pablo; and
- in the low-lying areas of Tuguegarao, Enrile, Solana, Iguig, Amulung, Alacala, Gattaran, Lallo, Camalanuigan and Aparri due to continues rise of Lower Main Cagayan River and its tributaries Paniacanauan River of Tuguegarao Pared River and Chico River

Regular advisories by dam operators and PAGASA are provided to DCCs concerned on the status of water levels and spillage/releases. Closely monitored are Pantabangan, Magat, Binga, Ambuklao and San Roque dams.

2. Immediate response to Incidents monitored

- PDCC Cagayan coordinated with PCG thru MDCC Sta. Ana, Cagayan for immediate rescue of 15 personnel on board a stranded cargo vessel between Fuga and Claveria

3. Transport, Communications and Power

Region II
