KEY FIGURES

245,000 Syrian Refugees expected by end-2018
250,184 currently registered
22 million (10% of total) required for Shelter
56% received

HIGHLIGHTS

1. Sustainable and gender-appropriate access to adequate shelter and infrastructure is available, improved, and maintained in camps:
   There are 18,000 shelter plots in KR-I hosting 91,179 individuals.
   37% of the refugee population in KR-I lives in 9 refugee camps. In the camps there are generally 3 types of shelter:
   2% of households live in emergency shelters (tents without concrete slab with communal latrine and shower).
   10% of households live in shelter plots improved with concrete slabs, a protection wall around the tent, family kitchen, and a family latrine and shower with water, sewage, and electricity networks.
   88% of households live in shelters that have been upgraded either by UNHCR and NGO’s, or by the refugees’ themselves, to more durable shelters with concrete slabs, concrete block walls of 2.6m, a sandwich panel roof, a family kitchen, and a family latrine and shower with water, sewage and electricity networks.

2. Sustainable adequate shelter and community infrastructures are available for vulnerable Syrian refugees and impacted members from the host community.
   63% of the refugee population in KR-I live outside camps.
   97% of households living outside the camps live in houses or apartments.
   84% of households do not share their accommodation.
   13% of households share their accommodation with others.
   2% of households live in unfinished buildings.
   1% of households live in other type of shelter.

NEEDS ANALYSIS

The sector work to fill the gap for upgrading of the shelter, maintain and rehabilitate the infrastructure in the camps. In the same projection in 2018 the sector continues these activities started in 2017 by giving appropriate access to adequate shelter and infrastructure, improving the infrastructures for the refugees within the local communities and provide support in camp coordination and camp management.

Non-camps: 90 % households in the KR-I host community were renting house or apartments. The provision of adequate and targeted shelter support to refugees residing out of camps requires increased attention as needs remain very high.
