

A satellite image showing the confluence of the Juba and Shabeelle rivers. The image is a false-color composite where water is represented in shades of blue and cyan, and land is in shades of green and brown. The rivers are visible as dark blue lines converging at a central point. Large areas of the surrounding land are flooded, appearing as a lighter cyan color. The image is a 1km LAC (Level 1) image from NOAA AVHRR, dated November 25, 1997.
