Situation Update

- Two-thirds of the population are now resorting to crisis-level coping strategies to feed their families. This is an eight percentage point increase from December and a staggering sixfold increase since August 2021, according to WFP’s latest Food Security Update for Afghanistan. Crisis and emergency coping strategies include the sale of organs and children.
- Almost 100 percent of female-headed households surveyed are facing insufficient food consumption. Female-headed households are more likely to employ crisis-level coping strategies than male-headed households.
- Eight in ten households experienced a significant decrease in income during the month of January. Households in Kabul were hit the hardest, where some families braved the harsh winter season without any income at all.
- More than half of Afghanistan’s population, or 22.8 million people, are acutely food insecure, according to the Integrated Food Security Phase Classification (IPC) report, while more than 24.4 people are in need of humanitarian support. A total 8.7 million people are just one step away from experiencing famine-like conditions.

WFP Response

- In March, WFP has assisted 3.5 million people so far with food, nutrition, and resilience support, including 3.3 million people with emergency food and nutrition assistance.
- WFP will scale up to reach 18 million people in March with food, nutrition and resilience support.
- WFP will expand resilience activities in March to help vulnerable communities meet their immediate food needs while strengthening their ability to withstand shocks. Vocational skills training (VST) and food assistance for assets (FFA) activities will also be scaled up across 17 and 22 provinces, respectively.
- WFP is closely monitoring the impact of the situation in Ukraine, which has disrupted international procurement and delivery of commodities to Afghanistan. WFP is also developing contingency plans.
- WFP is preparing to participate in the next IPC Analysis for Afghanistan, which will update food security statistics for the current period as well as projections for the second and third quarters of 2022. Results from the upcoming assessment are expected in April with preliminary IPC results available at the of March.

In Numbers

22.8 million people – half of the population – are projected to be acutely food insecure in 2022, including 8.7 million at risk of famine-like conditions.

4.7 million children, pregnant and lactating women at risk of acute malnutrition in 2022.

All 34 provinces are facing crisis or emergency levels of acute food insecurity.

Highlights

- WFP has reached 13 million people with food, nutrition, and resilience support in 2022. Due to increased needs, WFP plans to reach 23 million people in 2022.
- WFP aims to reach 18 million people in March. This includes scaling up resilience activities, including vocational skills training and food assistance for assets activities, across 17 and 22 provinces, respectively.

Food and Nutrition Assistance

- **General Food Assistance**: WFP has assisted 3.3 million people with emergency food and nutrition support in March so far. Since the beginning of 2022, 165,000 MT of food has been distributed.

- **School feeding**: Although schools remain closed in 28 of Afghanistan’s 34 provinces for winter break, WFP is currently assisting 783 primary schools across the country in addition to 579 community-based education classes. WFP has distributed 397 MT of high energy biscuits and 550 MT of fortified vegetable oil in March so far to assist 305,437 primary school children, including 120,986 girls. By April 2022, WFP plans to further scale up assistance to reach 2,100 community-based education classes to increase coverage in hard-to-reach areas.

- **Nutrition**: In March, WFP has assisted 263,147 children (aged 6-59 months) and pregnant and lactating women (PLW) so far with nutritious foods to prevent acute malnutrition, while treating 81,546 malnourished children and women. WFP supports 158 Mobile Health and Nutrition Teams (MHNTs) across 24 provinces in Afghanistan to ensure access in hard-to-reach areas. The number of active MHNTs more than doubled since August 2021.

- **Asset creation and livelihoods**: WFP has assisted 118,134 people thus far in March through asset creation and livelihoods activities. WFP plans to support over a million beneficiaries throughout the year. Vocational skills trainings are ongoing in 17 provinces. WFP is also continuing its food assistance for assets (FFA) programme in 22 provinces, where canals, roads, and community irrigation systems are being constructed to strengthen the resilience of communities against natural shocks, and to meet the immediate food needs of targeted communities.

### Supply Chain and Logistics

- Between 27 February – 6 March, WFP dispatched 23,329 MT of food to 104 destinations across Afghanistan.
- During the same period, 18,716 MT of food entered the country, bringing WFP’s in-country stocks to 60,153 MT.
- A further 135,381 MT of mixed food commodities are expected to arrive in March through local, regional, and international procurement channels.

### UN Humanitarian Air Service (UNHAS)

- UNHAS has conducted 574 flights in 2022 so far, transporting 3,670 passengers and 9.8 MT of essential cargo.
- UNHAS currently offers flights to 20 domestic destinations and two on demand, including three airbridges that connect Kabul to Islamabad, Dushanbe and Doha.
- Weekly flight schedules and route maps can be found on the Humanitarian Booking Hub.

### Resourcing Update

- To meet increasing needs in 2022, WFP requires USD 1.22 billion over the next six months but faces a shortfall of **USD 525.5 million**. WFP is facing an overall shortfall of **USD 1.6 billion** to sustain operations through 2022.
- Food, nutrition and UNHAS requirements were included in the Global Humanitarian Overview and OCHA Flash Appeal for Afghanistan.
