AFGHANISTAN - Overview of Reported Security-Related Incidents (August 2020)

Afghanistan is impacted by sporadic security-related incidents as reported in various locations across the country. Based on data collected by the Armed Conflict Location & Event Data (ACLED) Project for August 2020, there were 621 reported security-related incidents that occurred in 32 provinces (245 unique locations). These figures were higher compared to the previous month, with 147 more incidents recorded in August compared to July. These incidents featured conflicts over land control and extortion of civilians, which resulted in over 2,000 fatalities.

Number of incidents by month

The boundaries, denominations, and designations displayed in this product are defined by the data shared with iMMAP. At iMMAP we visualize data, we do not create it, so these elements and freshness of the data are the responsibility of the data providers and no endorsement nor acceptance of it by iMMAP or USAID can be assumed.
