**Summary of Natural Disaster Events in 2014 (January to December) by Type**

- **Affected Individuals**: [Table representation]
- **Afghans Killed or Injured**: [Percentage and number data]
- **Houses Damaged or Destroyed**: [Percentage and number data]

**Notes:**
1) Natural disaster events include avalanches, extreme winter conditions, flooding, heavy rainfall, landslides & mudflows, and extreme weather (sandstorms, hail, wind, etc) as recorded by OCHA field offices and IOM Afghanistan Humanitarian Assistance Database (HADB).
2) A natural disaster incident is defined as an event that has affected (i.e. impacted) Afghans, who may or may not require humanitarian assistance.
3) HADB information is used as a main reference and supplemented by OCHA Field Office reports for those incidents where information is not available from the HADB. OCHA information includes assessment figures from OCHA, ANDMA, Red Crescent Societies, national NGOs, international NGOs, ... and houses damaged or destroyed are based on the reports received. These figures may change as updates are received.
