

## Guinea: Cholera

Since January, more than 86 people have died of cholera in Guinea especially in Guekedou. According to the figures from the Ministry of Public Health, which declared that Kissidougou and Guekedou are in epidemic situation, 845 cases have been registered with a lethality rate of 13,26% by the end of May.

These figures are distributed among the different districts as follows:

- Guekedou: 583 cases, 68 deaths
- Kissidougou: 147 cases, 13 deaths
- N'Zerekoré: 49 cases, 5 deaths
- Lola: 66 cases
