

Turkana District – Food Security and Intervention Status

- Parts of the Northwestern Divisions highly food insecure.
- Quantities of food distributed by the GoK far lower than in other divisions.
- Premature return of 20,000 pastoralists from Uganda, after raids, causing additional pressure.
- Increased malnutrition among sampled children.

- Early Interventions by CCF in Loima and Turkwell Divisions have improved food security.
- Remain susceptible to conflict along border areas.

- The Northeastern Divisions were worst affected and reported GAM rates higher than 30 percent.
- Interventions by WFP and OXFAM/GB have significantly stabilized situation.
- Livestock conditions good, may deteriorate quickly.
- Conflict remains endemic.

★ Conflict-Affected Areas

▨ Good Dry-season Grazing Areas

- The southern Divisions similarly seriously food insecure.
- Food Distributions started, during the third week of May, mitigating growing food insecurity.
- Conflict the key contributor to food insecurity.
