Burundi

*MAG Burundi* started in 2007 with a programme to support the Government of Burundi in reducing the threat of Small Arms and Light Weapons (SALW) and unsecured stockpiles. MAG is currently offering technical support to the Weapons Destruction Workshop and is supporting the Burundian Government in implementing the Nairobi Protocol - Articles 6, 7, 8 and 9.

In December, the comprehensive Physical Security and Stockpile Management (PSSM) project with the Police Nationale du Burundi (PNB) was implemented in remaining police stations in Region Centre and West with funding from the Belgian Ministry of Foreign Affairs and the Swiss Department of Foreign Affairs. The MAG-Civilian Defence (CD) mobile team collected 7 weapons, 45 magazines, 209 items of ammunition and 2,200 items of Small Arms Ammunition (SAA) and destroyed 720 ammunition and 90,000 SAA. The physical security team improved the security of Small Arms and Light Weapons in two armouries and at the Brigadier training school in Muramvya. This completed the
PSSM project with the PNB. During this 18-month project, MAG has collected a total of 3,614 weapons, 6,826 magazines, 13,978 items of ammunition and 1,019,590 items of SAA, and secured SALW in 173 police armouries in all 5 Police Regions of Burundi. The project contributed to reducing the risks of leakages, thefts and accidents from police SALW stocks, thus supporting a reduction in armed violence in Burundi.

The training of the Army SALW survey team was completed on December 20, following practical training in 6 SALW depots. The survey, funded by the Swiss Department of Foreign Affairs, will take place until the end of February and will allow the Army to identify the main issues regarding the management and storage of their SALW stocks, as well as identify solutions.

Democratic Republic of Congo (DRC)

MAG DRC launched a nationwide CWMD programme in September 2006 and in May 2007 received written authorisation from the Ministry of Defence to destroy surplus military stocks in all Military Regions. Also in May 2007, a destruction centre was established by MAG at the Central Logistics Base in Kinshasa. In September 2008 MAG received written authorisation from the Ministry of the Interior (extended in April 2009) to commence CWMD activities with the Congolese National Police.

MAG DRC is currently operating one mobile CWMD team, a mobile stockpile assessment team, and the destruction team based at the Logistics Central Base under funding from the US Department of State Office of Weapons Removal and Abatement. Under funding from the Dutch Government MAG is also creating official national Physical Storage and Stockpile Management (PSSM) standards, providing training in these standards and undertaking the evaluation and refurbishment of ammunition stockpiles.

Under MAG’s year-long PSSM project, funded by the Dutch Government, the MAG team continues to work with the FARDC working group from the Ordinance Department of the Logistics School in Kinshasa to develop a PSSM training programme. The FARDC/PNC/MAG working group’s draft norms were presented to appropriate authorities in December and are currently under review. A technical study of the ammunition magazines in Camp Kokolo was completed in December. This assessment is currently being used to draft architectural plans. The rehabilitation work in the arms destruction workshop continued in December and should finish in January. A study for the rehabilitation of the armoury in Camp Kokolo was completed in December. The tender for the rehabilitation works will be launched in January. Finally, a Risk Assessment (physical infrastructure) for police and military arm stockpiles was developed and is currently under review.

Under the US Department of State Funding, two mobile destruction teams were active during the first two weeks of December, destroying 3 tons in Kikwit. The Arms Destruction Workshop destroyed an additional 800 arms during December.

Iraq

MAG Iraq started implementing the CWMD programme in August 2007 with the support of PMWRA. To date, MAG Iraq CWD teams have successfully responded to more than 10,020 emergency tasks to safely remove and destroy 293,810 CW items. Since it began MAG Iraq’s CWMD programme has directly benefited more than 1 million individuals.

MAG’s Small arms and Light Weapons Risk Education (SALW RE) programme began with RE sessions in schools in July 2008. Working with local partners, MAG’s SALW RE warns children of the threats of playing with SALW, with the aim of reducing the risk to children in homes with unguarded SALW.

In December, 4 CWD response teams continued operations, deploying to reported stockpiles of CW. Teams deployed 51 times from the programme’s 3 operation bases to 39 different villages, completing 73 emergency conventional weapons destruction tasks in Sulaimaniyah, Dohuk, Mosul, Diyala and Kirkuk Governorates. This month, 6,955 CW were safely destroyed. Items included items of 70mm PG, anti-personnel landmines, anti-tank landmines, fuses, mortars, projectiles and small arms ammunition in addition to several other types of unexploded ordnance. Teams destroyed 21 stockpiles.
In December, teams were operational for the first two weeks of the month before the programme stood down for Christmas and New Year's holidays. The teams will undergo one week refresher training in the beginning of January and resume operations after the completion of the training.

The dedicated MAG Community Liaison (CL) teams funded by WRA conducted 11 liaison visits to 7 different villages in Kirkuk and Sulimaniyah, liaising with local authorities, farmers, shepherds, teachers, village leaders and other villagers. MAG CL teams conducted 3 SALW RE session to 26 shepherds and students in Sulimaniyah and Dohuk governorates.

Rwanda

MAG started CWMD activities in Rwanda in November 2008. MAG is providing technical assistance and training to the Rwanda Defense Forces (RDF) in basic stockpile management and the destruction of surplus SALW and munitions. MAG has established a central weapons destruction workshop at Kanombe near Kigali and trained two RDF teams in weapons recognition and weapons cutting. A central demolition site for the destruction of munitions has been identified at Gabiro in north-east Rwanda. Operations re-started in September 2010 with a grant from the Office of Weapons Removal and Abatement, US State Department.

MAG Rwanda continues preparation for the IMAS EOD 3 course, alongside the Stockpile Management Courses. It is hoped MAG will receive permission to start work in the New Year.

Somalia

MAG commenced its CWMD activities in the Puntland region of Somalia in May 2008 with funding from the US Department of State WRA. MAG trained an EOD team consisting of 7 Puntland Police officers and further provided technical assistance and equipment for the team performing CWMD activities throughout Puntland. All training and field operations are carried out in close coordination with the national governing authority the Puntland Mine Action Centre (PMAC). With further funding from OWRA, activities in Puntland re-started in September 2009. The UK Government’s Conflict Pool (CP) is providing funding for additional Community Liaison Teams and survey activities from August 2010.

December was a short operational month as the programme stood down on the 16th of December. One major EOD deployment was conducted in Eyl. An extensive BAC task was conducted to locate a large reported cache of Italian hand grenades dating from WW2. Four RPGs were also identified and destroyed.

Concurrently the TFM-TL travelled to Hargeisa in Somaliland to conduct an assessment on two armouries earmarked for rehabilitation. During the visit he met the EOD commander and SPU commander to discuss future collaboration in rebuilding one police armoury and one SPU armoury. The trip was also used as an opportunity to carry out extensive networking to facilitate these projects in the future.

The CL teams continued operating throughout the whole of the month and have made excellent progress toward completion of the 92 identified communities by March 31st 2011. They are also in the process of compiling a working document listing off-shoot communities, identified in the course of their work, in need of MRE in the future.

Sudan

MAG has been implementing CWMD activities in Sudan since 2005. There are two specialist EOD teams, funded by WRA in southern Sudan. One team (MAT1) concentrates on operations in Central and Western Equatoria, while the second team (MAT2) concentrates on operations in Jonglei and Eastern Equatoria from the Kapoeta base. Additionally MAG has eight Multi-Task Teams and twelve Community Liaison (CL) Teams operating in Kassala, Blue Nile and Greater Equatoria. While the MTTs primarily focus on minefield survey and clearance, they also carry out CW disposal as necessary. MAG Sudan conducts integrated operations and the CL teams are the main generators of UXO Dangerous Area Reports which are cleared by the MAG technical teams.
In northern Sudan MTT2 (ECHO) spent the majority of December in Kassala supporting MTT1 in completing the clearance of Demen minefield. However, time was still found for some Conventional Weapons (CW) clearance through eight Spot Tasks in close proximity to Kassala. During the spot tasks 12 items were found, including two mortars, four rocket propelled grenades and six hand grenades, all of which were destroyed in two demolitions. Seven DAs were reported to CL10. Also in northern Sudan MTT3 were tasked to conduct 5 GMAAs in December in areas surrounding Ulu, Blue Nile State, during which 21 UXO were logistically disposed of.

In southern Sudan MAT1 (WRA) spent the majority of the month in Juba and Yei Counties and completed 21 Spot Tasks clearing 75 items directly benefiting 990 people. On December 10th, the team completed a stockpile in Jebel Kujur, Juba County, and destroyed one Mortar, one Projectile and nineteen grenades directly benefitting seventy people. Additionally the MAG America funded CL team identified an Anti-Tank Mine in need of emergency clearance due to its location on a busy pathway in Jebel Kujur. The WRA-funded EOD and SALW team responded immediately to this report and cleared the item.

Also in southern Sudan MAT2 (WRA) completed six Spot Tasks destroying 600 items in Eastern Equatoria. The team also completed one stockpile in Labone, Magwi County and destroyed 7,691 items of SAA. In total approximately 2,030 people benefitted from the work of MAT2.

MAG was delighted to host a visit from Ms. Emma Smith and Mr. John Stevens from the Office of Weapons Removal and Abatement (WRA) on December 4th 2010. The WRA representatives visited the MAG Yei base and deployed for one day with the EOD and SALW Team, supported by the WRA funded CL teams. The day was spent in Lainya County, approximately two hours from Yei, where the CL team gathered reports of DAs, and passed these on to the EOD and SALW team, thus demonstrating MAG’s integrated approach to clearance operations. A demolition was conducted with twenty-one UXO being destroyed, benefitting approximately three hundred people. An informative and successful day was had by all.

A summary of the outputs from the month of December can be found below:
