### DETAILS

**LAHORE:** Maximum temperatures in the plains of the country dropped two to three degrees Celsius on Saturday 9th May, because of the opening spell of the fresh westerly wave that generated light rain and strong winds in many cities. The trough of westerly wave is affecting western, central and upper parts of the country and is likely to move northeastwards during the next 24 hours. It remained hot and dry in Lahore. Strong wind in the evening nevertheless provided some relief to the people. The maximum temperature dropped from Friday’s 43 degrees Celsius to 41.2 degrees Celsius.

The Met department said it would remain partly cloudy with chances of dust-thunderstorm in the city in the next 24 hours. Rain-thundershower with dust storm is expected at scattered places in Khyber Pakhtunkhwa (Malakand, Hazara, Peshawar, Kohat, Mardan, Bannu, Deraj Ismail Khan divisions), Fata, Northeast Balochistan (Quetta, Zhob and Kalat divisions), Islamabad, Punjab (Rawalpindi, Gujranwala, Lahore, Sargodha, Multan, Bahawalpur and Dera Ghazi Khan divisions), Kashmir and Gilgit-Baltistan. A dust storm is also expected in Sahiwal, Sibbi and Sukkur divisions in the afternoon. Meanwhile, Garhi Dupatta received 8mm of rain, Lasbela 7, Drost, Parachinar and Rawalakot 6(each), Mirkhani, Islamabad 3(each), Chital 2(each), and Kotli 1.

**KARACHI:** Billions of rupees of counterfeit medicines are being vended in the different markets in Karachi, report of Pakistan Drug Regulatory Authority (PDRA). International donors’ eschewed usage of Pakistan made medicines for the victims of natural disaster and North Waziristan displaced persons of Pakistan. They preferred to import medicines from abroad. Whereas nine countries of the world including Sri Lanka, Kenya and other African countries have put embargo on the import of Pakistani medicines.

According to a drug inspector of Pakistan Drug Regulatory Authority that, internationally the standard of Bangladesh and Indian made medicines is much better than Pakistani ones. He said that approximately four hundred factories are producing counterfeit medicines in Pakistan. But even no attention was paid to the decreasing standard of medicines produced by licensed companies. He said that smuggled drugs are as dangerous as counterfeit are. All these medicines are being vended in the renowned pharmacies of Pakistan including Karachi. Moreover, the employees of big organizations are compelled to purchase these medicines.

Met Office predicted scattered rain-thundershowers with dust storms in the country during next 4-5 days. Met Office informed that a westerly weather system is likely to enter the country on Saturday and expected to prevail in the country till mid of the coming week. Under the influence of this weather system rain-thundershowers associated with dust-storms are predicted in Islamabad, Punjab (Multan, D.G. Khan, Bahawalpur, Rawalpindi, Sargodha, Faisalabad, Gujranwala, Sahiwal and Lahore divisions), FATA, Khyber Pakhtunkhwa (Peshawar, Kohat, Malakand, Mardan, Hazara, D I Khan and Bannu divisions), Balochistan (Quetta, Zhob, Kallat, Sibbi and Nasirabad divisions), Gilgit-Baltistan and Kashmir from Saturday to Wednesday with occasional gaps. Dust-thundershowers are also expected at isolated places in Sindh (Mirpur Khas, Sukkur and Larkana divisions) on Saturday and again on Monday/Tuesday. The farmers of Punjab, Khyber-Pakhtunkhwa and FATA are advised to take necessary precautionary measures for harvesting wheat crop during the period.

**ISLAMABAD:** A ceremony was held here at Pakistan Red Crescent Society national headquarters in connection with World Red Cross/Red Crescent Day, being observed all over the world under the theme ‘Our Principles in Action’. Addressing the ceremony, Minister of State for National Health Services, Saira Afzal Tarar said that Pakistan being the disaster-prone country needs trained community volunteers to cope with the natural and man-made disasters.

She said that selflessness is the main spirit of volunteerism and it must be flourished under the teaching of Islam and every volunteer should follow the teaching of Holy Prophet Hazrat Muhammad (PBUH). The minister said that over the last several decades, the Red Cross and Red Crescent societies have provided assistance to millions of vulnerable people of the world. She added the volunteers of PRCS have also contributed immensely during times of disasters with an aim of helping those in need, being the first to reach the scene of disaster and the last to leave.

**MUZAFFARGARH:** Chief Minister (CM) Punjab Shahbaz Sharif said on Thursday that Tayyip Erdogan Hospital in the city is a gift for the people of Punjab where protest and tire burning will not be a norm. CM Punjab said that development work had helped a lot after floods and earthquake. He quoted Tayyip Erdogan as saying that he will keep on helping his Pakistani brothers, reported Dunya News. Addressing the people at the inauguration of Tayyip Erdogan Hospital, CM Punjab Shahbaz Sharif said that the 100-bed hospital is a gift from Turkey. He said that that hospital would soon be upgraded to accommodate 500 beds and will dispense free medicines.

Turkish President Tayyip Erdogan addressed the crowd via video link and said that Turkey will help Pakistani with help of its own resources. Slogans of Pak-Turkey friendship were also raised at the occasion. Shahbaz Sharif also gave Turkish President an invitation to visit Pakistan on the occasion.

**ISLAMABAD:** Visiting Australian Foreign Minister Julie Bishop announced a $19 million aid package for Pakistan that includes help for border areas hit by conflict and natural disasters.

- Accounting
- Asset Management
- Project Management
- Portal Development
Bishop made the pledge during a two-day visit to Islamabad, where she is holding talks with her Pakistani counterpart Sartaj Aziz on efforts to counter militancy, the future of Afghanistan and the reported rise of the Islamic State group in the region. The aid package includes $8 million to help restore infrastructure damaged by floods and conflict in the restive northwest and southwest, and around $8 million to support a trade initiative in partnership with the World Bank. It has not yet been announced where the remaining assistance will be spent.

The Australian foreign minister said the two countries “have common interests in countering transnational crimes including drug-and human-smuggling”. Bishop said she would also encourage Australian tourism to Pakistan for over a decade. “People-to-people links are important and of course we want to see Pakistan as a safe and secure environment so that you can engage international visitors,” she said. Sartaj Aziz, the Advisor to PM on National Security and Foreign Affairs, briefed the visiting dignitary on Pakistan’s relations with neighbouring India and Afghanistan. She is expected to meet Prime Minister Nawaz Sharif and Chief of Army Staff (COAS) Gen Raheel Sharif today. “My visit and meeting with Pakistani leaders is aimed at discussing the growing strength of our bilateral partnership and important regional and international issues,” Bishop said in a statement on her arrival. Bishop will also deliver a speech on women’s empowerment and gender equality issues in order to highlight the support of the Australian government to Pakistan in this regard. The audience of her speech will include senior government officials and lawmakers. The Australian foreign minister would moreover visit Lahore today and meet with Punjab Chief Minister Shahbaz Sharif.

She is also scheduled to inaugurate a project funded by the Australian government. The foreign minister’s visit comes nearly two months after Pakistan and Australia agreed to enhance cooperation in the field of defence and security, including military training. A statement issued by the Foreign Office had earlier said, “Pakistan and the UK will explore the further strengthening the existing ties - especially in trade, investment, agriculture, education, sports and defence. There will be renewed focus on elevating economic engagement and boosting bilateral trade.” Addressing a joint news conference along with Australian counterpart, Adviser to PM on Foreign Affairs Sartaj Aziz said Pakistan and Australia enjoy mutual respect and shared interests. He said the two sides have agreed to further consolidate the existing friendly people to people contacts, underpinned by the presence of eighty thousand strong Pakistani diaspora and around 13,000 Pakistani students in Australia. He said our talks focused on the need for regular political exchanges between the two countries including high-level visits. “We feel that exchange of such visits is important.”

Australian Foreign Minister Julie Bishop said her country attaches great importance to its bilateral relations with Pakistan. “We have long been friends and want to diversify cooperation in different fields.” She said her country has strong and long-standing defence relations with Pakistan. She said it is vital for the region that both Pakistan and Afghanistan work together to manage the porous border and effectively fight the menace of terrorism. When asked about Australian-India civil nuclear cooperation, she pointed out that her country is a powerhouse and wants to export energy to the world. She said currently both Australia and India are negotiating the deal. She however said her country will extend the facility to India under strict controls. On the issue of Kashmir dispute, Bishop admitted the issue needs to be resolved. She said her country will encourage both Pakistan and India to resolve the dispute through negotiations.

ISLAMABAD: Federal Minister for Climate Change, Senator Mushahidullah Khan, Wednesday, expressed resentment over non-conscientious attitude and lack of responsibility by the rich polluting countries in tackling global warming. Addressing the national Consultative workshop on environment, climate change, biodiversity, land degradation, ozone depletion, urged the developed countries like Pakistan, Bangladesh, India, Nepal and other Asia-Pacific countries to stand united against double standard of the rich nations and force them to pay for the global environmental damages and global warming, which is affecting the economies, people and biodiversity so dangerously. The sad truth is that the poorest countries including Pakistan, Nepal and Bangladesh on the planet will be hit first and hardest by ‘now unavoidable’ climate change, he warned saying, “During the last decade it is poor countries like Pakistan, Nepal, Bangladesh, Philippines, Honduras, Myanmar and Thailand that have been most battered by the climate change disasters including floods, storm and cyclones.”

He was addressing a seminar jointly organized by the Ministry of Climate Change and Global Environment Facility (GEF), which is a partnership for international cooperation where 193 countries work together with international institutions, civil society organizations and the private sector, to address global environmental issues. “It is matter of grave concern for developing countries like Pakistan that they have been left out to cope with climate change-induced disasters, particularly floods, hurricanes, heatwaves, landslides, droughts, sea-level rise, and desertification”. Whereas, the rich countries continue to increase pace of global warming by increasing their carbon emissions,” he said. Mushahidullah Khan said rich countries have achieved economic growths at the cost of environment and for this purposes exploited natural resources, particularly water, forests, land in unsustainable and cruel manner. “Though these rich countries are now raising slogans of sustainable development and pushing the poor countries to cut their carbon emissions, protecting environment, planting more trees, shift towards clean and renewable energy from fossil fuel burning for energy purposes.”
Pakistan has been reeling under very hot conditions for a while. However, a brief respite from the hot weather is likely as there is going to be a western disturbance (WD) moving across Pakistan from the 9th of this month. The WD is likely to cause thunderstorms accompanied by rain and strong winds, which will help in bringing the temperatures down. However, there are chances of moderate to heavy rains in some parts of Pakistan which could lead to flooding and inundation in those areas. So, the people in Pakistan are suggested to take precautions particularly in north Pakistan and the hilly areas. The WD is likely to cause thunderstorms accompanied by rain and strong winds, this will help in bringing the temperatures down. However, there are chances of moderate to heavy rains in some parts of Pakistan which could lead to flooding and inundation in those areas, particularly in north Pakistan and the hilly areas.

The WD is likely to cause thunderstorms accompanied by rain and strong winds, which will help in bringing the temperatures down. However, there are chances of moderate to heavy rains in some parts of Pakistan which could lead to flooding and inundation in those areas. As of now, the temperatures are setting close to 44°C mark and heat wave conditions are prevailing over most parts of the country with heat wave in isolated pockets. The WD and its induced cyclonic circulation will start affecting Pakistan from the 9th and will recede by the 12th and clearance will be on the 13th. The WD will be in northern Pakistan and its induced cyclonic circulation will be in central and adjoining west Rajasthan. WDs originate in the Caspian Sea and the Mediterranean Sea as extra tropical storms. A Western Disturbance is a low-pressure area or a trough over surface or the upper-air in the westerly winds regime, north of 20°N, causing changes in pressure, wind pattern and temperature fields.

New Islamic Relief research and a roadmap to resilience have added momentum to disaster risk reduction in Sindh, Pakistan: The research into disaster vulnerabilities and capacity in Sindh – a province that is particularly prone to both flooding and drought – was launched at Islamic Relief Pakistan consultation held last month. The research revealed, these were not informed by knowledge of community-level initiatives or emerging practices to prepare for disasters and reduce their impact when they occur. “Almost all of the communities relied on institutional support for these systems,” said Sajjad Khan, “which made them highly vulnerable, due to the low probability of recovery and preparedness resulting from institutional dependency.”

A roadmap to resilience: Our disaster risk reduction and climate change specialist, Shahid Kazmi, presented a roadmap for disaster risk reduction in the province. An essential step forward will be creating community-led initiatives through capacity-building training, as well as developing local institutional structures, integration... The director general of the Provincial Disaster Management Authority (PDMA), Salman Shah, welcomed the roadmap and emphasised the need for an integrated approach to disaster risk reduction in Sindh. “Sindh faces serious challenges in the form of increasing food insecurity, climate change, droughts, and the declining capacity of provincial social service institutions,” he said, urging organisations to work together with government and civil society, and pledging the support of the PDMA.

ISLAMABAD: Pakistan’s provinces will create committees to oversee reductions in carbon emissions and support climate change adaptation, in a push to implement a long-stalled national climate policy. Under an agreement reached at the first meeting of the National Climate Change Policy Implementation Committee in late April, climate change sections will be established within the federal Planning Commission and the five provincial governments as well as Pakistan-administered Azad Jammu & Kashmir, to coordinate climate change policy and funding. The new provincial committees are due to send initial plans to the federal government by May 5. “Such plans will be forwarded to the recently established international Green Climate Fund, in an effort to win funding to implement them,” said Senator Mushahidullah Khan, federal minister for climate change. Pakistan’s national climate change policy (NCCP) was formulated in 2012 but has remained unimplemented, in part because of political crises and the government’s focus on fighting terrorism. The new committees mark an effort by the federal government to enlist the regions in implementing the policy.

The policy outlines some 120 actions for climate change mitigation and adaptation. Water conservation, flood-resistant infrastructure and the development of climate-resilient crop varieties are considered particularly urgent. The provinces have also agreed to update the climate change ministry periodically on their progress, and mechanisms required to implement the policy actions by May 23. Sardard Adul Nabi, senior chief for energy at the Sindh provincial Planning and Development Department, said all of Pakistan was being affected by the negative impacts of rapidly changing and erratic weather. “No provincial government can afford to ignore such weather patterns, and (we) need to make all socio-
economic sectors adaptive to them,” Nabi said. Sindh is particularly vulnerable to river flooding and rises in sea level, he added. Mushahidullah Khan, who has been minister for climate change since February of this year, said in an interview on the sidelines of the April 23 meeting that the federal government could not cope with climate change by itself. “Since all the actions proposed in the NCCP will have to be implemented in the provinces, the provincial governments need to act now in the light of the policy recommendations,” he argued.

Arif Ahmed Khan, the federal climate change secretary, said Pakistan needs to become more resilient to climate impacts in a range of areas, including water, agriculture and livestock, forestry, energy, transport, industry and urban planning. All are key to efforts to build sustainable development, and all are vulnerable to the effects of climate change, he said. (Reporting by Saleem Shaikh and Sughra Tunio; editing by Laurie Goering)
**PDMA KYBER PAKHTUNKHWASPECIAL REPORT AS OF MAY 4, 2015**

**DAMAGES CAUSED BY RECENT TORRENTIAL RAINS/ HAILSTORM ON APRIL 26, 2015**

On the 26th of April 2015 at around 1900 hrs an unpredictable cyclone/hailstorm with heavy thunder showers hit different areas of districts Peshawar, Charsadda & Nowshera. As per the official statement of the Pakistan Meteorological Department, the department had not issued a forecast for the cyclone-like thunderstorm as it is rare in this part of the country and could not be predicted well before time. The torrential rains/hailstorm caused damages both to life and public/private infrastructure. The following figures are initially reported by the district administrations:

### DEAD/INJURED TOLL

Deaths/casualties report did not vary during the past 24 hours and all figures as following remained the same as reported yesterday:

**PDMA’S RESPONSE:**

Swiftly responding to the situation, Director General PDMA activated code red of the Provincial Emergency Operation Centre and called all officers and officials to report to PDMA office immediately. All concerned district administrations were alerted at 1904 hrs though SMS and Director General along with Officers/ officials responded to the calls received in Provincial Emergency Operation Centre, PDMA. Through subsequent SMS and calls the district administrations were asked to immediately convey their relief requirements. Various stakeholders like, Pakistan Meteorological Department, Local Govt: Department, Irrigation Department, Divisional/District Administration, and District Disaster Management Units of the concerned districts were taken on board and active coordination was established to respond to the disaster. PDMA’s Provincial Emergency Operation Centre Contact Nos. (091-9213845 and 091-9213959) were fully operationalized and kept on air on various news channels for speedy redressal of complaints and grievances of the affectees. Information was being collected/disseminated to and from various stakeholders for quick and timely response. Director General PDMA and all staff performed duties till 05.00 A.M. the next morning. On the following day, teams were constituted to visit the affected areas for preparation of comprehensive report and to monitor the relief activities. PDMA is currently collecting data regarding damages caused to life and property which will be consolidated for grant of all kinds of relief and compensation to the affected people. Other activities undertaken by PDMA and DDMUs are listed under table 6 infra.

**ESTABLISHMENT OF PDMA RELIEF CAMPS:**

PDMA with the assistance of humanitarian partners established 06 relief camps in severely affected areas of Peshawar, Charadda and Nowshera Districts. Survey teams have conducted door to door assessments and distributed food vouchers/tokens among the affected households. The households were informed about food distribution points and the collection process has already started. Although relief activities were initiated the very next day i.e. April 27, 2015. However, PDMA was constantly receiving complaints from general public regarding nonavailability of relief goods and items. PDMA decided to supervise the distribution of relief goods itself. Four monitoring teams were also constituted to further streamline and oversee the distribution process. Director General PDMA visited all the relief camps and supervised the relief activities. PDMA’s warehouse is fully operative and actively engaged in dispatching relief items to the relief camps. So far the following activities have been undertaken at the relief camps:

<table>

PDMA has engaged humanitarian partners for further assessments to distribute vouchers/tokens in affected people in rain hit areas to distribute food and non-food items. This activity will be completed within three days. PDMA will start another round of distributions by establishing more distribution camps in other rain affected areas to provide relief items to the hailstorm affectees once vouchers/token distributions and reassessment is completed in other affected areas. PDMA teams are closely monitoring and supervising the reassessments and verification of district administration damaged infrastructure assessments.

**INFRASTRUCTURE RELATED DAMAGES NEEDS ASSESSMENT SURVEY:**

PDMA has provided 47 volunteers to District Administration, Peshawar (30), Charsadda (10) and Nowshera (7) for detailed Damage Need Assessment Survey. Volunteers along with revenue staff are conducting door to door surveys and taking photographic images to
assess and verify the damages that have been reported. Final report will be made available once finalized by district administration.

Securing Punjab: CM says safe city project has great significance
*The Express Tribune, May 10, 2015*

DETAILS

**LAHORE:** The Punjab Safe City Project is of great significance with regard to securing citizens’ lives and properties, Chief Minister Shahbaz Sharif said on Saturday. He was chairing a meeting convened to review progress on the constitution of the Special Protection Force. Security arrangements for the upcoming tour of the Zimbabwe national cricket team, expansion of the Elite Police Training School, progress on the Punjab Safe City Project and the law and order situation in the province were also reviewed on the occasion. The chief minister said cities would be secured under the Punjab Safe City Project by employing state-of-the-art technology. He said work on this account should be prioritised. Sharif said the steering committee should regularly review all matters related to the project and take immediate steps to address relevant issues.

He said the expansion of the Elite Police Training School was the need-of-the-hour. Sharif said a new campus equipped with state-of-the-art technology would be established at Bedian Road. He said a District Elite Police Force Group would also be constituted. Sharif said the cabinet committee should ensure immediate implementation of steps needed to be taken regarding the school’s expansion. He said a report on this account should be submitted in one month. The chief minister said the 10,000 personnel-Special Protection Force was being constituted to guarantee foreigners’ security. He said work on this account should be carried out on a war footing. Sharif said recruitment of officials to the force should be done on merit through the National Testing Service. He said the provision of modern training for them should be ensured. The chief minister ordered the constitution of a sub-committee of the cabinet committee tasked with reviewing the implementation of steps taken with regard to the force and devise suggestions.

Sharif ordered the police and district authorities to ensure that foolproof security arrangements were made for the Zimbabwe National Cricket Team. He said a four-tier security cordon should be established on this account. Sharif said alternative routes should be earmarked to ensure the smooth flow of traffic during the team’s tour. He said it was imperative to raise public awareness regarding alternative routes. A one-minute silence was observed for those killed in the helicopter crash in Naltar. Home Minister Shuja Khanzada, Law Minister Mujtaba Shujaur Rehman, former law minister Rana Sanaullah, Provincial Assembly Member Zaeem Qadri and several senior bureaucrats were also present at the meeting.

**Mayor of Quetta calls on chief minister**

The resounding victory of the Pakistan Muslim League-Nawaz in the recent Cantt elections is the result of its commitment to serving the public, Sharif said. He said Friday’s helicopter crash in Naltar had saddened the entire nation. The chief minister expressed grief over the incident and said the government equally shared the grief of the families of the deceased. Quetta Mayor Kaleemullah Khan said the chief minister had put the province on the road to progress and prosperity. He said the people had acknowledged Sharif’s “round-the-clock hard work.” He said there had been a marked improvement in the education, health, infrastructure, transport sectors in the province and citizens’ living standard was improving. Khan said Sharif’s vision of serving the people distinguished him.

**Fighting crime: Police team formed to arrest POs**
*The Express Tribune, May 10, 2015*

**Illegal possession: ANF makes seven arrests from Rawalpindi, Gilgit**
*The Express Tribune, May 10, 2015*

**RAWALPINDI:** The Anti-Narcotics Force (ANF) on Saturday made a number of arrests and seized contraband from different areas in the city. At least seven cases of people carrying illegal drugs were reported. According to ANF officials, the Rawalpindi Airport Team during routine surveillance at Benazir Bhutto International Airport detained a suspected passenger, identified as Adnan Shah, a resident of Peshawar, on suspicion of carrying drugs. A search of his trolley bag led to the recovery of 1.2kg heroin. The accused intended to board a flight for Bahrain via Doha. Separately, ANF teams intercepted a suspected consignment comprising two cartons of bed sheets and curtains at the office of Zohaib International Cargo and Courier Services. The team during search of the consignment seized 165 grams of heroin, which was concealed in the curtain’s folding. According to details, the consignment was booked by a person, identified as Hafeezur Rehman, resident of Abbottabad and was intended to be received by Abbas Shah, residing at Park Village, Wolverhampton, United Kingdom.

The ANF Rawalpindi Road Check Team during a routine check at Mullah Mansoor Toll Plaza on GT Road stopped a Suzuki Mehran and recovered 10kg of hashish during a search of the vehicle. Two drug traffickers identified as Hamir Khan and Abbas Khan, both residents of Khyber Agency, were also arrested during the operation. Meanwhile, acting on a tip-off, ANF officials intercepted a Suzuki Mehran near 26 Chunhi Motorway Mor and recovered five kilogrammes of hashish from the possession of the occupants, identified as Haider Zaman from Peshawar and Yasir Shah from Rawalpindi. In another tipped-off raid, the ANF Rawalpindi carried out a search operation near Chunhi number 26 and intercepted a Toyota Hiace and arrested a...

suspected drug trafficker, identified as Fazae Moula, a resident of Bajaur Agency, and recovered 2.2kg hashish. After preliminary investigation, Moula was also arrested from Sarafa Bazar, Rawalpindi. Separately, an ANF team posted in Gilgit arrested two brothers identified as Rehmat Gul and Rehmat Khan, both residents of Diamer, and recovered 1,04kg of opium and 290 grams of hashish from their possession. They were arrested near Kohistan Mandi, Gilgit. Cases were lodged against all the accused.

ISLAMABAD: The military brought the bodies of two ambassadors and two ambassadors‟ wives to Islamabad on Saturday, a day after they were killed in a helicopter crash in northern mountains on their way to inspect a tourism project. The ambassadors of Norway and the Philippines and the wives of the Malaysian and Indonesian envos were killed when the helicopter they were on crashed in the Gilgit region. Three Pakistani crewmen were also killed and several diplomats were injured when the MI-17 helicopter came down on a school in a valley lined by pine forests and overlooked by snow-peaked mountains. No children were in the school at the time. The government says the aircraft suffered engine failure, dismissing as bogus a Taliban claim that the militants shot it down. Prime Minister Nawaz Sharif was also going to the inauguration of a ski lift and was on a separate helicopter when the accident happened.

Servicemen formed a guard of honour to receive the coffins, draped in national flags and bedecked with wreaths, as soldiers carried them from the aircraft that brought them from the north. The ceremony was broadcast live on television. Diplomats in black and the military‟s top brass, including army chief General Raheel Sharif, were on hand and the commanders saluted as the chief of staff walked around a sobbing boy among the diplomats. “It‟s a very sad moment and we are all very shaken,” Spanish ambassador Javier Carbajosa Sanchez told reporters. He was on the trip but on another helicopter. “Unfortunately, these things happen. Everything seems to indicate it was a terrible accident.” Pakistani declared a day of mourning and military and civilians from all government offices to mark the tragedy.

Punjab govt directs to beef up security of Chinese nationals

Dunya News, May 9, 2015

KARACHI: The Sindh High Court (SHC) has directed the petitioner to submit details of the victims, who were allegedly killed in fake encounters engineered by former Malir SSP Rao Anwar. A public interest litigant, Rana Faizul Hasan, had taken the Karachi police‟s senior superintendent to court. According to him, SSP Anwar had more than 50 people killed in staged encounters within a period of six months. “Some encounters continued for more than an hour, but surprisingly the cops remained unhurt from the firing,” he stated. The petitioner said that even if these persons were terrorists, the police were duty-bound to produce them in the courts of law. The police officers had no right to pick up innocent people from different areas and kill them on Super Highway or Sohrab Goth and give them the colour of encounters, because it is the duty of the courts to award punishments.

Hasan argued that this was a violation of the fundamental rights of the citizens as well as Articles 4, 8, 9, 10, 14, 15 and 25 of the Constitution. He had pleaded the court conduct a hearing on this matter and pass appropriate orders. Taking up the matter, the judges found that crucial information such as details of the people allegedly killed in fake encounters, were missing. Adjourning the hearing, they directed the petitioner to submit such details by the next date of hearing.

LAHORE: Chief Minister Punjab Shahbaz Sharif on Saturday directed to form a special protection force comprising ten thousand personnel to protect Chinese nationals and other foreigners. A four-hour long session took place at Chief Minister‟s House in Lahore in which overall security situation in light of Zimbabwe cricket team‟s Pakistan tour was reviewed. The formation of four levels of security circles to guard Zimbabwe team was also approved. Approving formation of Punjab Safe City Project Authority, CM Punjab decided for an extension in Elite Police Training School. It was also decided that the recruitment in Special Protection Force will be done through National Testing Service (NTS) to maintain merit.

SWABI/ HANGU/ BANNU: Police officials of three districts have arrested almost 200 proclaimed offenders; confiscated 46 kilogrammes of hashish and fined 8,598 vehicle drivers in the month of April. At three separate press conferences on Wednesday, Bannu, Hangu and Swabi police officials spoke of crackdowns and arrests. Bannu ASP Muhammad Fayaz said officers at various stations across the districts arrested 150 proclaimed offenders and 23 suspects. “Most of the culprits were wanted for kidnappings, murders, attempted murders and other crimes,” Fayaz added the police confiscated 27 AK-47s, seven Kalakovs, nine rifles, 42 guns, 176 pistols, six hand grenades and more than 6,000 cartridges during the raids and crackdowns. Bannu police also seized 10.9 kilogrammes of hashish, 3.025kg of opium, 14 grammes of heroin and 67 bottles of liquor.

Hangu DPO Anwar Saeed Kundi at a local press conference told the media they arrested 300 suspects and 40 proclaimed offenders during various drives in the district in the month of April. Kundi shared Hangu police confiscated 16 Kalashnikovs, 17 guns, 47 pistols, four grenades, nine rifles and 1,400 cartridges. At least 35kg of hashish was also seized, he added. “Search and strike operations will remain under way in the district,” said Kundi. In Swabi, DPO Sajjad Khan told the media they charged 8,598 drivers for violating traffic rules. He said the traffic police in the district has been directed to take strict action against those who were violating rules.

PESHAWAR: Families of Pakistanis arrested by Italian police last month for their alleged involvement in terrorist activities have refuted the charges levelled on their relatives. In raids across the country on April 24, Italian police arrested 10 people and was searching for eight others suspected of being part of an armed group linked to the banned al Qaeda. All 18 suspects
What's in a name?

"We have no links with Osama Bin Laden. Osama is the name of a child in our family that has caused the confusion," claimed Bahadar Sher, a resident of Tordher village. Swabi. Sher's brother Imtiaz Khan is among the 10 people booked by Italian police. Sher told The Express Tribune via telephone that the police have accused his brother of giving protection to Osama Bin Laden because they recorded his telephone conversations discussing Osama the child. According to Sher, the child was injured in an accident in 2010 and Imtiaz would regularly ask about him in his phone calls home. "This might have caused the confusion as the police may have been listening to Imtiaz's calls in those days," he said. Sher added eight people from Tordher were detained by Italian police in those raids. "My brother runs a cosmetics shops in Oblia and we spoke to him two days before his arrest. Since we learnt of his arrest, we have had no contact with him." The Swabi local further said officials of secret agencies came to their house from Islamabad a few days ago, asked questions about Imtiaz and assured them he would be released. "His wife and children are worried. We believe he is innocent," maintained Sher.

“False allegations”

Noorul Amin, brother of Zulkefal—the spiritual leader police detained from Bergamo—said they have been living in Italy for almost a decade. "My brother taught children the Holy Quran in a mosque and has never held a pistol in his life," said Amin over the phone. Amin, who lives in Italy as well, said his family is associated with tabligh and the police’s assertions that Zulkefal is involved in bomb blasts in Peshawar are incorrect. "My brother has spoken to his wife and children and our lawyer is certain he will be released," said Amin.

A helping hand

The families of detained suspects have approached Swabi MPA Abdul Karim Khan for help. Khan will submit a resolution in the provincial assembly urging the federal government to take up the matter with the Italian government. The lawmaker told The Express Tribune eight people from his constituency are detained in the European country and he will raise the issue on the house floor.

ISLAMABAD: Stressing that the judges were obligated to uphold liberties of the accused, Chief Justice of Pakistan (CJP) Justice Nasirul Mulk said on Thursday that rights of people currently being tried for criminal cases should not be violated. Mulk’s announcement came during a full court session held in the Supreme Court today (Thursday) in the memory of former Supreme Court Justice Mamoon Kazi, who passed away in April last year. “Judiciary is the guardian of constitutionally protected vestiges of the French Revolution: life, liberty and property of the people,” chief justice said. “It is incumbent upon every judge, to check the excesses of administration and to protect people’s freedom.”

“The modern criminal justice system is broadly tasked with meting out retributive justice while simultaneously protecting the rights of the accused. It is the obligation of a judge, as guardian of the text and spirit of the Constitution, to ensure that the rights of the accused are not violated in the process of criminal adjudication,” he added. The chief justice also said that a true form of democracy will only take form when the judiciary will actively ensure executive compliance with the dictates of the Constitution.

RAWALPINDI: Chief of Army Staff (COAS) General Raheel Sharif discussed Pak-Afghan border coordination and the overall security situation in the region with Commander Resolute Support United States Forces in Afghanistan General John F Campbell. According to an Inter-Services Public Relations (ISPR) statement, General Campbell called on Chief of Army Staff General Raheel Sharif on Thursday. Matters of mutual interest and discussed bilateral relations between the two leaders were high on the agenda to counter terrorism. In April, Afghan army chief General Sher Muhammad Karimi was the first Afghan army chief to speak as chief guest at the Pakistan Military Academy Kakul in Abbotabad where a group of six Afghan army cadets are also receiving training.

Myanmar Defence Chief

Senior General Min Aung Hlaing, Commander In Chief of Defence Services Myanmar, visited General Headquarters Thursday and met General Raheel Sharif. During the meeting, matters of professional interest, military to military relationship and cooperation were discussed. General Hlaing also called on General Rashad Mahmood, Chairman Joint Chiefs of Staff Committee. The two dignitaries discussed matters relating to professional interests and cooperation between the two armed forces. He appreciated professionalism and sacrifices rendered by Pakistan’s armed forces in the fight against terrorism. Earlier, on his arrival at Joint Staff Headquarters, he was presented a guard of honour by asmartly turned out contingent of the three armed forces of the country. The Myanmar Defence Chief is currently heading a high powered delegation as part of bilateral measures to enhance cooperation between the military forces of the two countries.

WEB DESK: As of 2014, at least 1.9 million people have been internally displaced by conflict and violence in Pakistan alone. According to the Global Overview 2015, released by Norwegian Refugee Council, 38 million people around the world were forced to live in displacement within the borders of their own country. Pakistan topped the list of such countries in South Asia, mainly due to the counter-insurgency operations carried out in North Waziristan and Khyber agencies. Around 907,000 people fled from their homes as a result of these operations in 2014, while the number stood at 140,000 in 2013. “Most chose to stay with host communities rather than in camps, in part because taking refuge in government-run sites makes them a target for Pakistani
Do not interfere in our internal affairs, Pakistan warns India
The Express Tribune, May 7, 2015

WEB DESK: A day after the military’s top brass accused Indian intelligence agency RAW of supporting terrorism in Pakistan, the Foreign Office has echoed similar concerns asking India to refrain from interfering in its internal matters. “Pakistan has provided proof of Indian involvement in Pakistani affairs at many occasions, including the recent secretary level talks,” Foreign Office spokesperson Khalilullah Qazi said, during his weekly briefing in Islamabad on Thursday. “We have availed all possible opportunities to remind India to avoid interfering in the internal affairs of Pakistan,” he added. In a statement following a conference of the corps commanders presided over by army chief General Raheel Sharif at the military headquarters in Rawalpindi, the ISPR said, “The conference took serious notice of RAW’s involvement in whipping up terrorism in Pakistan.”

Responding to a question on the underworld don, the newly-appointed Foreign Office spokesperson said, “Pakistan has repeatedly said Dawood Ibrahim is not on its soil and at last India admitted the Pakistani stance saying that it does not know his whereabouts.” Contradicting its own firmly-held position, the Indian government told Parliament on Tuesday that Ibrahim, one of India’s most-wanted men for masterminding the 1993 blasts in Mumbai in which 300 people were killed, has not been located so far. “The United Nations Security Council has also issued a special notice against him. The subject has not been located so far. Extradition process with regard to Dawood Ibrahim would be initiated once the subject is located,” Minister of State for Home, Hanbhai Chaudhury said in reply to a written question.

Taliban, Afghanistan peace process

Regarding Doha’s process for reconciliation in Afghanistan, the spokesperson said, “Pakistan has always been supportive of Afghan-led process for bringing peace and stability in that country.” Qazi added, “Prime Minister Nawaz Sharif has a vision for peace and stability in the region and the government is making all out efforts under this objective.” Termining the visit of a PPP delegation to Kabul today as a “good omen,” Qazi said, “The government encourages political contacts between the two countries as these can be helpful in promoting our bilateral ties.”

ISLAMABAD: Former president and Pakistan Peoples Party co-chairman Asif Ali Zardari and Afghan Chief Executive Dr Abdullah Abdullah called for Pakistan and Afghanistan to mount joint efforts against terrorism which was termed a serious threat to both countries. The PPP delegation led by former president, had arrived in Kabul on Thursday to discuss joint efforts to strengthen anti-terror cooperation and to boost people-to-people contacts. During the visit, Zardari met with the Afghan chief executive at his office for lunch before meeting former Afghan president Hamid Karzai for tweet. They discussed issues related to bilateral relations, regional situation and the need for enhanced economic cooperation came under discussion, read a statement issued by Abdullah’s office. “The current environment requires new decisions. Pakistan, Afghanistan and the whole region face serious threats and these threats need new cooperation,” the statement quoting Abdullah said, a copy of which is available with The Express Tribune.

The two leaders also agreed that the time has come for both countries to “sincerely and jointly” fight the menace of terrorism. Zardari hailed the formation of the unity government in Kabul, and encouraged the support Pakistan could provide at multiple levels for the advance of peace in the region. Terming terrorism as the common enemy of Pakistan and Afghanistan, Zardari called for effective cooperation. Earlier, upon his arrival Zardari was received by Pakistani ambassador in Kabul Abrar Hussain and other diplomats along with senior Afghan officials. Former prime minister Yousuf Raza Gilani and PPP leader Sherry Rehman are also accompanying the former president. Zardari had been invited to visit Afghanistan by President Ashraf Ghani when he visited Islamabad last year. According to an Afghan official, “The Afghan side is likely to bring the PPP leaders’ attention towards the plight of the Afghan refugees.”

Foreign Office welcomes the visit

Welcoming the visit of the opposition leaders to Kabul, the newly appointed Foreign Office Spokesperson Qazi Khalilullah described the visit as a “good omen,” adding that the government encourages political contacts between the two countries since they promote bilateral ties. This is not the first of this kind by Pakistani leaders. Earlier in January Afghan President hosted top Pakistani Pashtun leaders, including Pakthunkhwa Milli Awami Party leader Mehrzad Khan Achakzai, Qaumi Watan Party’s head Aftab Ahmed Khan Sherpao and ANP leader Afrasiab Khattak. The Afghan leadership has also invited several other Pakistani politicians including JUI-F chief Maulana Fazalur Rehman and head of Jamaat-e-Islami Sirajul Haq. According to party officials, both leaders have accepted the invitation.

Zardari meets with Ashraf Ghani

Later in the evening, Zardari and the PPP delegation were hosted by Afghan President Ashraf Ghani at the Dilkusha Palace. They discussed where matters of mutual bilateral interest in an atmosphere of goodwill and cordiality.

GHALLANAI: A peace committee volunteer was killed on Thursday when an improvised explosive device (IED) blast took off in Ailingar area of Safi Tehsil, Mohmand Agency. According to a political administrative official, the IED was planted along the roadside when it went off, killing peace committee leader Zawar Hussain. The political administration cordoned off the area and

US hands over 14 combat aircraft, 59 military trainer jets to Pakistan: report

The Express Tribune, May 6, 2015

the search operation is under way. No group has claimed responsibility for the attack as yet.

On May 6, one person was killed and three others were injured when two suicide bombers were stopped by Levies from entering packed school ground in Alizai area of Lower Kurram where a football match was underway. Officials confirmed that two attackers, wearing explosives, tried to storm the school playground. But Levies officials guarding the ground opened fire at them. Following the incident, Chief of Army Staff General Raheel Sharif commended those attending the football match and those posted for security for their vigilance and prompt action.

ISLAMABAD: Leading defence manufacturing companies from the country are participating in a four-day International Defence Industry Fair (IDEF) in Istanbul, Turkey. The Pakistani delegation, led by Minister for Defence Production Rana Tanveer Hussain, was also holding meetings with delegations from Turkey, the Middle East, Africa and Europe, among others. Pakistan Ordnance Factories, Pakistan Aeronautical Complex, Heavy Industries Taxila, Defence Export Promotion Organisation etc are the leading participants from the country. Pakistan is offering high-tech air/ground equipment and hardware for sale in the event, which began on May 5, 2015, said a statement on Wednesday.

At least one person was killed and three others were injured when two suicide bombers were stopped by Levies from entering packed school ground in Alizai area of Lower Kurram on Wednesday where a football match was underway. Officials confirmed that two attackers, wearing explosives, tried to storm the school playground. But Levies officials guarding the ground opened fire at them. They exchanged fire for sometime before the attackers were killed and their explosives detonated. Two officials were also injured in the blast. The officials and eyewitnesses said the suicide bombers attacked people in a playground inside Government High School Alizai, lower Kurram Agency shortly before Maghrib prayers. “It is a terrorist attack and the target was a football match,” a political administration official said. “Terrorists opened fire at the players and spectators in the football ground,” the official added.

A Levies official shot the attacker as he started firing at players and spectators in the playground. Eyewitnesses added that two explosions followed the firing. Officials said that Siraj Hussain, a dispenser in Alizai Hospital, had been identified as the victim. The injured were shifted to Civil Hospital Alizai. Doctors at the hospital said the injured were in critical condition. Alizai is considered the second biggest town in Lower Kurram Agency and is a Shia-dominant area which has seen sectarian unrest. The officials said that all four hurt in the incident, including the deceased, belonged to the Shia community. So far no one has claimed responsibility for the attack though officials suspect the Tehreek-e-Taliban Pakistan could be behind it.

Army chief commends Levies for vigilance, action

Following the incident, Chief of Army Staff General Raheel Sharif commended those attending the football match and those posted for security for their vigilance and prompt action. According to a statement from Director General Inter Services Public Relations (ISPR) Major-General Asim Bajwa, the two suicide bombers were intercepted by the Levies. While one detonated his vest after being stopped, the other fled who was chased and killed. “The whole nation is resolute to not only deny any space to these misguided terrorists, but also eliminate them fully,” the COAS quoted as saying.

PESHAWAR: Officials at Khyber Pakhtunkhwa’s (KP) National Accountability Bureau (NAB) fear embezzlement of up to Rs500 million in the reimbursement of funds allocated to compensate affectees of the 2008 ‘Sherdil’ operation against militants in Bajaur Agency. A well-placed source in KP NAB, on condition of anonymity, told Dawn.com that an inquiry has been authorised by the KP Director General NAB after receiving written complaints from affectees and concerned quarters. The embezzlement of a large amount was noticed in the reimbursement of compensation for ‘Sherdil’ affectees in the initial inquiry, the source said. During 2011-2012, 12,000 compensation cases were cleared in which Rs. 475,000 was announced for each family. But the amounts did not reach the concerned people, and hundreds of fake verifications were approved, the source added.

When asked about the actual embezzled amount, the source said authorities feared embezzlement of around Rs500m, adding that the compensation programme is a fraud. “It’s a big scandal and high-profile government officials and politicians are involved in the internally displaced persons’ (IDPs) compensation fraud,” the source said. Anwarullah Khan, a senior journalist from Bajaur Agency, told Dawn.com that in the ‘Sherdil’ Operation compensation programme, tribal elders, government officials and local politicians had exercised favouritism in the reimbursement of compensation funds, and some eligible families are still waiting for compensation. KP NAB has already exposed an embezzlement scandal worth Rs60m meant for the IDPs of Mohmand Agency. Former Director General Fata Disaster Management Authority Arshad Khan and two other officials were put behind bars after being indicted for fraud.

WEB DESK: The United States handed over Pakistan on Wednesday 14 combat aircraft, 59 military trainer jets and 374 armoured personnel carriers which were earlier used in Afghanistan and Iran. “As the US withdraws its forces from neighbouring Afghanistan, the major defence articles have been transferred to Pakistan under its ‘Excessive Defence Article’ category, an internal Congressional report said, according to the Economic Times. India in the past has opposed to the transfer of such arms to Pakistan as it believes Islamabad would eventually use the fighter jets against it. Pakistan has either made full payment or will make payments from its national funds towards the purchase of 18 new F-16C/D Block 52 Fighting Falcon combat aircraft worth $1.43 billion, according to the internal report prepared by Congressional Research Service (CRS), an independent research wing of the Congress. This includes F-16 armaments including 500 AMRAAM air-to-air missiles, 1,450 2,000-pound
bombs, 500 JDAM Tail Kits for gravity bombs and 1,600 Enhanced Paveway laser-guided kits. These have cost Pakistan $629 million. Pakistan has also paid $298 million for 100 harpoon anti-ship missiles, 500 sidewinder air-to-air missiles ($95 million) and seven Phalanx Close-In Weapons System naval guns ($80 million). Pakistan received 26 Bell 412EP utility helicopters along with related parts and maintenance, valued at $235 million under the Coalition Support.

Pakistan is also receiving military equipment with a mix of its national funds and America’s foreign military funding. These include 60 Mid-Life Update kits for F-16A/B combat aircraft. Pakistan has purchased 45 such kits, with all upgrades completed to date. This include 115 M-109 self-propelled howitzers. Under Frontier Corps and Pakistan Counterinsurgency Fund authorities, US has provided four Mi-17 multiroute helicopters (another six were provided temporarily at no cost), four King Air 350 surveillance aircraft, and 450 vehicles.

ISLAMABAD: Interior Minister Chaudhry Nisar Ali Khan asked the national leadership on Monday to exercise patience and stand united because the National Action Plan (NAP) was ‘bearing good results’ but the war against terrorists was not yet over. “This is not a PML-N or a government issue but a national issue. Though the law and order situation has improved, it has not been restored completely … our enemies have not yet been eliminated and we have to stand united,” the interior minister told the Senate in his 68-minute speech about the achievements of NAP, which was devised and implemented after terrorists attacked the Army Public School in Peshawar on December 16. Following the briefing, the house unanimously passed a resolution that recommended the government to take ‘further’ steps to implement NAP to counter terrorism. Initially, the ANP’s Sitara Ayaz had moved a resolution asking the government to ‘take steps’ to implement NAP, but the government raised objections over it. Later, Senate Chairman Raza Rabbani asked the treasury and opposition benches to find a middle ground on the issue by suggesting the addition of the word ‘further’.

Contentious issues
The interior minister said there were two contentious issues in NAP that related to proscribed organisations and seminars. “It was after NAP that Pakistan knows the number of proscribed organisations, which is 60 according to Pakistani laws and 74 as per the UN, with [12 common among them].” He said ‘all these organisations have been put on the ECL’ and are also under surveillance. About seminars, he said the institutions were fulfilling the state’s responsibility [of providing education] and ‘we should not point fingers at them if they are following the laws of the land’. Regarding ban on misuse of loudspeakers, he said 4,589 cases were registered and 4,266 people arrested for hate-speech. On the repatriation of Afghan insurgents, Nisar said a policy paper had been shared with the Afghan government and a joint framework would be prepared in the next three weeks. “We don’t want to spoil our good relations with Afghanistan,” he said.

NACTA
The interior minister informed the house about a summary moved for allocation of funds for the National Counter Terrorism Authority (Nacta). “Yes, we need money and good people.” Regarding the Karachi operation, he said target killings had come down by 89%, murders by 38%, extortion by 37% and robberies by 23%. He said 49,669 people, including 623 hardened criminals and terrorists, were arrested. “Over 3,000 intelligence-based operations have been carried out across the country in which 37,666 people were arrested.... In 37,000 combing operations, 725 terrorists were arrested.” Referring to the press conference of the MQM’s Farooq Sattar, who had demanded that the port city be handed over to the military, Nisar said: “We have to take the Karachi operation to its logical end and, for that matter, all the political parties need to support it … a timeframe cannot be given for its completion.”

PESHAWAR: Prisons in Khyber-Paktunkhwa are overcrowded with 9,503 inmates, a figure well above the capacity the province’s 22 prisons can hold – 8,091. At the moment, 1,400 prisoners over official capacity are incarcerated in various jails burdening the existing set-up. According to data submitted by the prisons department to the K-P Assembly in response to a query from JUI-F lawmaker Najma Shaheen, the overall capacity for male and female inmates is 7,793 and 298 respectively in four central prisons, 10 district jails, four sub-jails and as many judicial lock-ups. However, there are currently 9,320 male and 183 female inmates in prisons across K-P.

A headcount: K-P’s prisons crowded beyond capacity
The Express Tribune, May 4, 2015

Senate session: Nisar seeks patience, unity to fight terror
The Express Tribune, May 5, 2015
Dagger District Jail 145 212
Lakki Manwat District Jail 99 227
Swat District Jail 200 N/A
Abbottabad District Jail 208 N/A
Charsadda Sub-Jail 120 246
Battagram Sub-Jail 118 50
Dasu (Kohistan) Sub-Jail 210 47
Upper Dir Sub-Jail 60 105
Tank Judicial Lock-up 13 52
Sawabi Judicial Lock-up 75 425
Nowshera Judicial Lock-up 130 302
Malakand Judicial Lock-up 100 112

The numbers of prisoners in Swat and Abbottabad district jails could not be submitted as the former is vacated for repairs while the latter is under construction. The data shows that there are no female inmates in some of the prisons, including those in Nowshera, Upper Dir and Lakki Manwat.

**Govt proposes ban on import of prohibited weapons**

*The Express Tribune, May 4, 2015*

ISLAMABAD: In an effort to control the flow of arms, the government has proposed a complete ban on the import of prohibited weapons in the country. The decision was taken by Interior Minister Chaudhry Nisar Ali Khan in a meeting on Monday. “It was proposed that a complete ban on import of prohibited weapons should be put in place,” an official statement read. According to the decision, only the Ministry of Defence Production and security agencies should be allowed to import such weapons. The interior minister also proposed that individuals and entities, who are qualified for such weapons, can procure them only through Pakistan Ordnance Factory, Wah.

“Regulating the business of arms dealers is also critical,” Nisar said. Further, the interior ministry declared that that all manual licences, which have not been verified, would be invalidated after December 31, 2015. The meeting also decided that “nobody under the age of 25 years should be issued arms license.”

The proposal came four month after the government had lifted a ban on the import of commercial prohibited arms, by changing the entire import arms policy with an aim of eliminating under-invoicing and improving documentation. The Pakistan Muslim League – Nawaz (PML-N) government in its previous tenure had also imposed a ban on import of prohibited weapons in 1997. The interior minister also underscored the need for putting in place a policy on the issuance of arms licenses in the provinces and the federal government. While discussing eligibility criteria for issuance of arms licenses under the new policy, the minister stressed that the license should only be issued keeping in view the security requirements of the applicants. Among others, media houses and media persons should also be facilitated as they face security challenges in their professional pursuits, the Interior Minister added.

Addressing the meeting, the Interior minister observed that in the past various laws were grossly misused with certain privileges, which are only granted strictly on a case-to-case basis after thorough consideration and scrutiny, were granted in bulk without any checks and balances. As a result, private security guards, prohibited guns and bullet-proof vehicles had not only became a fashion and a status symbol, but had also created serious security implications. In view of new challenges the National Database Registration Authority (NADRA) is regulating all the existing arms licences, the minister observed. “But a comprehensive mechanism should be put in place to regulate and monitor the flow of arms into the country,” he added. The Interior Minister said that in the first instance all licenses issued from 1973 till June 2013 would be computerised through NADRA. The deadline for the validation is December 31, 2015. No further extension would be granted in this regards.

City areas ignored in anti-dengue campaign
Daily Dawn, May 10, 2015

RAWALPINDI: The health department has restricted its anti-dengue campaign to the cantonment areas and ignored the city areas of Rawal Town despite the identification of more than 30 vulnerable spots. In 2014, more than 727 dengue patients came to the three government run hospitals from 46 union councils of Rawal Town and 348 patients from cantonment areas and Potohar Town. The city areas including College Road, Mohanpura, Dhoke Ratta and the areas around Leeh Nullah are a breeding ground for dengue mosquito, but the health department hardly paid attention to these areas. A senior official of the health department told Dawn that this year the cantonment boards of Rawalpindi and Chaklala refused to launch the campaign and referred the matter to the Punjab health department as, according to them, the cantonments fell in its jurisdiction. After this, he said, the Punjab government hired the services of male and female workers for indoor residual spray (IRS) in cantonment as well as city areas. But later their services were diverted to anti-polio campaign. “The District Coordination Officer, Sajid Zafar Dall, directed the health department to leave the anti-dengue campaign and pay attention to anti-polio campaign,” he said.

When contacted, District Health Officer (DHO) Cantonment Dr. Ansar Ishaq said the health department had launched the campaign and removed dengue larva from civilian populated areas including Dhoke Munshi, Dhaman Syedan, Rehmatabad and Gharibabad and adjoining areas. The DHO said the campaign in the cantonment areas was launched last month which had not finished as yet. He said that more than 60 teams had visited different areas and removed larva from many sites. However, he said that the fogging was the responsibility of cantonment boards. On the other hand, the Rawal Town DHO Dr. Tahir Mehmood admitted that the anti-dengue campaign in the 46 union councils of downtown was slow due to anti-polio campaign. Earlier, the anti-polio campaign was launched through volunteers but the experience could not give desired results and the DCO decided to involve the health department’s workers. Shifting of the staff to anti-polio campaign slowed down the anti-dengue campaign,” he said. However, he said that the health department had made a plan to speed up the campaign from Monday. “We will activate all the 88 teams in the city to clear the areas from dengue mosquitoes,” he said.

NEW YORK: Pakistan has left India far behind in terms of improving water and sanitation access for their citizens, reveals a new performance index released on Friday. While Pakistan was ranked five in the new index developed by The Water Institute at the University of North Carolina at Chapel Hill’s Gillings School of Global Public Health in the US, India occupied an unenviable 92nd position. High-performing countries for 2015 are those that achieved significant improvement in recent years compared to their peers. Low-performing countries are those that showed stagnation or decline in recent years compared to their peers.

India’s ranking as a bottom-performer predates the recent launch of the “Clean India Mission” by Prime Minister Narendra Modi. Sub-Saharan Africa countries including Mali, South Africa, and Ethiopia are also among the top performers world-wide in spite of modest resources, according to the WaSH Performance Index that evaluates country performance in improving access to water and sanitation and in eroding inequalities in access. Other high performers include China, El Salvador, Niger, Egypt, and Maldives. Conversely, Russia, the Philippines and Brazil were bottom performers.

The index compares countries of all sizes and income levels. Using this method, the report revealed that a country’s gross domestic product did not determine performance in improving water and sanitation for its citizens. “This means that even countries with limited resources can make great strides if they have the right programs in place,” said co-author of the report Jamie Bartram, director of The Water Institute at UNC. “National governments, NGOs, and aid agencies can direct their resources toward building systems and capacity for action in countries that are lagging, and toward implementation where those capacities are in place and performing,” Bartram noted.

KARACHI – Gas connection of Abbasi Shaheed hospital on Saturday was disconnected due to non-payment of bill, Dunya News reported. According to details, the hospital administration has not paid the bills from the past three months. The gas cut has severely affected hospital routine as sterilization procedure has been halted due to the closure of eight operation theaters.

ISLAMABAD: Akbar Associates has won the bid for constructing the second liquefied natural gas (LNG) terminal in the country by offering the lowest tariff. The board of Sui Southern Gas Company (SSGC) made the decision in a meeting held on Friday, say officials. The company will award the contract after finalising the arrangements in the next 10 days. A day ago, SSGC had shortlisted two bidders – Pakistan Gas Port Limited and Akbar Associates – for building the second terminal for handling LNG imports. In the technical evaluation, Pakistan Gas Port and Gunvor had got a score of 89.3 from SSGC consultant AF Capital whereas Akbar Associates received 74.73 marks. Both bidders were declared technically qualified and entered the final round.

Engro’s Engen Terminal Pakistan Limited (ETPL), which built the country’s first LNG terminal in March, got a score of 61.9 and did not qualify as bidders were required to receive at least 70 marks. According to officials, in the financial bids opened on Friday, Akbar Associates offered a tariff of 49.87 cents per million British thermal units (mmbtu) whereas Pakistan Gas Port quoted 52.9 cents. The tariff quoted by Akbar Associates is far lower than the tariff approved by the

government for the first LNG terminal. The levelised tariff for ETPL’s terminal is 66 cents per mbtu.

The successful bidder will be required to complete work on the project in 24 months and make a capacity of 400 million cubic feet of LNG per day (mmcf/d) available to SSGC. Like ETPL, Pakistan Gas Port had proposed to establish a floating storage and re-gasification unit-based project whereas Akbar Associates sought to set up a land-based terminal. Together, the two terminals will bridge the natural gas demand-supply gap by 53% in the summer season and 36% in winter. Apart from these, the federal government is planning to start the process of setting up a land-based LNG import terminal at Gwadar with Chinese assistance.

**LAHORE:** Three hydel power stations operated by the Water and Power Development Authority (WAPDA) delivered 110.190 million units of electricity to the national grid on Friday compared to 64.037 million units generated the same day last year -- an increased contribution of 46.153 million units. This increase in hydel power generation is the result of increased water releases from the dams by IRSA.

According to the data, Tarbela hydel power station generated 43.809 million units compared to 17.882m units on May 8 last year. Ghazi Barotha hydel power station produced 25.740m units compared to 14.455m units on the same day last year, whereas 24m units were generated by Mangla hydel power station compared to 15.760m units on the same day last year.

The basic purpose of dams is to provide water for agriculture as required by the provinces, whereas hydel electricity generation is merely the by-product. The electricity generation from hydel power stations depends upon water indents of IRSA. This increased quantum of electricity was produced due to increased water outflows. The hydel power generation capacity of WAPDA stands at about 7.000MW -- about one-third of the total installed capacity in the country.

“It is a matter of great satisfaction that despite some of hydel power stations being as old as 50 years, the generation capacity of WAPDA has remained higher than its capacity and efficient operation of these stations. WAPDA contributes more than 30 billion units of low-cost electricity to the national grid per annum. The role being played by hydel electricity in keeping the power tariff at present level can be measured from the fact that according to data of January 2015, per unit generation cost of hydel electricity is merely Rs2.62 on an average as compared to Rs7.43 for gas, Rs12.91 for coal, Rs12.98 for bagasse, Rs17.58 for furnace oil, Rs23.43 for diesel, Rs5.98 for nuclear and Rs11.62 for wind,” says a press release. As per the data the basket price of electricity in the system stands at Rs10.03 per unit.

transmission line: The National Transmission and Dispatch Company, under its transmission enhancements investment programme, has started a vital project of 600km long 500kv Jamshoro-Moro-Dadu to Rahim Yar Khan transmission line and 500kv Switching Station at Moro along with necessary extensions at existing 500kv substations of Jamshoro, Dadu and Rahim Yar Khan with an estimated cost of $180m funded by ADB.

The NTDCL spokesman said this important project is part of NTDC’s overall power development programme which will be completed in Dec 2016. The main objective of the project is enhancement and extension of NTDC’s existing system to provide appropriate facilities for dispersal of power proposed to be generated from southern part of the country to the load centers to meet the power demand of the country.

Whereas the bulk power generation has been planned in southern area based on imported coal near Karachi, local coal in Thar area and wind power plants of Sindh. Dilating upon the salients of the project, the spokesman said that for timely completion of the project, the project has been bifurcated into two packages. Package-I has been divided into three lots. 202 km transmission line will be constructed from Jamshoro to Moro under Lot-I, whereas 232Km long transmission from Dadu-Moro to Goth Qazi Mahar under Lot-II and 166 km transmission line will be constructed from Goth Qazi Mahar to Rahim Yar Khan under Lot-III. Whereas, under package II, a 500kv Switching Station at Moro will be constructed besides extension works at existing 500kv Substations at Jamshoro, Dadu and Rahim Yar Khan. He said that the NTDC managing director has directed NTDC engineers and Chinese contractors to speed up the construction work and complete the project within the time period. He said that the project was being implemented by Chief Engineer (MP&M) NTDC and supervised by Nespak.

**KARACHI:** The Sindh Assembly was on Friday informed that the government would reintroduce a free tanker service from next week for the residents of water-starved localities in the metropolis. Winding up the general discussion on an adjournment motion about an acute water shortage in Karachi, Sindh Information Minister Sharjeel Memon, who also holds the portfolio of the local government department, said that the government has made arrangements to provide free of cost water to the city’s underprivileged areas, particularly Baldia Town, Orangi Town, SITE, Gadap and North Karachi, through tankers from May 11 (Monday). The adjournment motion was moved by the Muttahida Qaumi Movement’s Muhammad Hussain and besides him 12 other lawmakers, including one from the ruling Pakistan Peoples Party, participated in the discussion.

Minister Memon claimed that there was no water shortage in Karachi, but there was some management issue for which the government had formed a committee for just distribution of water in Karachi. He claimed that only five per cent of water was being stolen. He said that the government had authorised the Karachi commissioner to grant permission of 10 new hydrants in different city areas to reduce the charges of water tankers. He said that the work on the K-4 greater water supply project would start during the current month. He said in addition to the issue of just distribution of water, the basic problem relating to water shortage was the incompetence of the Karachi Water and Sewerage Board staff.

He informed the house that the monthly billing of the KWSB was Rs700 million while its recovery...
was only Rs400m. Out of the recovered amount, Rs300m was consumed on payment of salaries and the remaining Rs100m was being spent on maintenance and emergency expenditures. Talking about overstaffing in the water utility, he said against the requirement of 7,000 employees, there are over 13,500 employees. Besides, the monthly electricity bill of the KWSB was Rs600m. The minister lashed out at the K-Electric for carrying out four-hour loadshedding on KWSB’s pumping stations.

Terming the K-Electric “enemy of the citizens of Karachi”, he said that the power utility was violating court orders which clearly instructed it not to carry out loadshedding at the pumping stations. He warned the K-Electric not to blackmail the government and if they continued to violate the orders of the court, the government would have no option but to arrest the K-Electric authorities. Earlier, Leader of the Opposition in the Sindh Assembly Khwaaja Izhar-ul-Hassan said that hundreds of illegal hydrants were operational in the city and a huge quantity of water was being stolen on a daily basis. He offered the government that if the KWSB management was given to the opposition, it would tackle all the problems within three months.

He said that Karachi was the city of every Pakistani and as such the governments of Punjab, Khyber Pakhtunkhwa and Balochistan should also allocate funds for the metropolises in their budgets. The mover of the adjournment motion, Mr Hussain of the MQM, initiated the discussion and said that 25 million people of Karachi were facing an acute water shortage, as the PPP government had done nothing to solve this problem. He said Sindh contributed 70 per cent revenue to the national exchequer, but the federal government was not releasing funds for the K-4 water project.

MQM’s Irum Azim Farooque, Sumita Afzal, Waseemuddin Qureshi, Khalid Ahmed and Saifuddin Khalid, PPP’s Shamim Mumtaz, Pakistan Muslim League-Functional’s Mehtab Akbar Rashdi and Shaharyar Khan Mahar, Pakistan Tehreek-i-Insaf’s Khurram Sher Zaman, Hafeezuddin and Samar Ali Khan also spoke. Meanwhile, the house adopted the Sindh Local Government (second amendment) Bill, 2015 to protect the municipalities, which were in existence prior to 2001 and notified thereafter by amending the Sindh Local Government Act, 2013. The sitting, which was called to order at 10.40am, was adjourned till Monday by Speaker Agha Siraj Durrani.

A day after the Engro Elengy Terminal Limited (EETL) alleged unfair treatment and wrongdoing in barring it from bidding for the second LNG terminal, the prime minister on Friday approved the appointment of CEO of the company as managing director of Pakistan State Oil (PSO), a report in the local media said on Saturday. A senior official at the Ministry of Petroleum and Natural Resources confirmed that it had received PM’s approval for appointment of Sheikh Imranul Haque as managing director of PSO. He said the file had been forwarded to the Establishment Division for a notification.

On Wednesday and Thursday, Sheikh had accused Sui Southern Gas Company Limited (SSGCL) of “mala fides” to have rejected EETL’s bid for the second LNG terminal on technical grounds despite the fact that his firm had completed Pakistan’s first LNG terminal in a record time and within schedule. The SSGCL had declared Gasport and Akbar Associates technically fit for the construction of second LNG terminal and disqualified the EETL. “There seems to be mala-fides on part of SSGC to reject our bid,” said Imranul Haque and demanded of the SSGCL and its board of directors not to open the financial bids for the terminal or else the EETL would “be constrained to seek all legal remedies.”

He said the SSGCL had reported two reasons for rejection of the bid for securing less than 70 per cent mandatory marks. He said the SSGCL had provided ample and substantive evidence to suggest that it was not required a fresh no-objection certificate from Port Qasim Authority (PQA) for the second tender. The EETL claimed it had explained each and every reason for its stance not to provide fresh NOC from PQA but its bid was rejected on the basis of a newspaper report. He accused of the SSGCL to provide grounds for the rejection of its bid as required under Rule 33 of the procurement rules and until then, not to open the financial bids because it was confident that its technical bid was fully compliant.

“If you open the bids, this may ultimately lead to the entire bidding process having to be scrapped and repeated,” he said. Haque explained that EETL would use its existing jetty which was being used and it was not being expanded by building a new jetty while its existing floating storage and regasification unit (FSRU) would be replaced with an alternate FSRU to meet capacity requirements of the second terminal bid. He said the SSGCL consultant had raised incorrect questions about obtaining NOC from PQA as it was expressly explained with the documentary support that implementation agreement with PQA did not require a fresh NOC.

“The Implementation Agreement clearly defines the Terminal as dedicated LNG Terminal, inclusive of any additions, alterations, expansions and modifications”. “We believe that SSGC had intentionally misinformed PQA on the bid proposal of ETPL and PQA had incorrectly interpreted the applicability of the implementation agreement as being applicable to new site, which is not the case,” he said.

FAISALABAD: A 20-bed children ward of THO Hospital, Samundri, is overcrowded because of a gastroenteritis outbreak. Two to three patients are being treated on one bed. Lack of space has forced the administration to treat patients at the veranda of the hospital on makeshift beds. Gastroenteritis has gripped several areas of Samundri and people have left with no option but to have recourse to the state-run hospital having a capacity of only 68 beds. At least 400 patients from different areas have arrived at the hospital during the last one week and the numbers are growing. Sibghat, a nine-year-old patient, said her mother had brought her at the hospital after frequent vomits had worsened her condition. “I am sharing the bed with another girl with a similar complaint,” she said. Her mother said she was not satisfied with the treatment being provided to her daughter. “We had come to the hospital on Thursday at about 4pm, but the treatment was...
“The government has learnt no lesson from last year’s outbreak of gastroenteritis. He said that a comprehensive legislation was also in the making. Director Khalid Majeed told Dawn on May 9, 2015.

Tanker operators blame municipality for water crisis

Daily Dawn, May 9, 2015

Chemist, employee held for selling ‘intoxicants’

Daily Dawn, May 9, 2015

SAHIWAQ: A drug store owner and his employee were arrested on Friday for selling intoxicants without doctor’s prescription on Karbala Road. Executive District Officer (Health) Dr Muhammad Ashraf, District Police Officer Muhammad Idris and Deputy Drug Controller Zaheeruddin Babar supervised a raid at the drug store, owned by Israr Ahmed, and recovered vessels, injections and cough syrup bottles which were allegedly sold to addicts besides banned Indian and Chinese aphrodisiacs. They arrested Israr and salesman Waseem and sealed the store. A 30-bore pistol was also recovered from the store. It is seventh time that the same medical store has been sealed by the authorities under the Drug Act 1979.

LAHORE: The Pakistan Young Pharmacists Association (PYPA) has alleged that the Drug Regulatory Authority Pakistan (DRAP) is deliberately delaying registration of a low-priced hepatitis C drug, ignoring the need of hundreds of millions of patients awaiting the medicine. Flanked by the representatives of various other medical and allied associations at the Lahore Press Club on Friday, PYPA President Dr Nabeela Latif claimed that a company had offered a price of Schoubuvir (hepatitis C drug) which was hundred times lower than that of the drug which had recently been registered by the DRAP. She said the offer was made by the company keeping in view the affordability of the poor patients who were affected by hepatitis C.

‘Thalassaemia patients increasing’

Daily Dawn, May 9, 2015

PESHAWAR: Chief Minister Pervez Khattak has expressed concern over the rapidly increasing thalassaemia patients in the country as over 6,000 children are falling prey to the deadly ailment every year. He said that it was happening because no serious and adequate measures were taken in the past for preventing and properly curing this disease. He also referred to the lack of awareness among masses of the disease and its prevention. In a message on the World Thalassaemia Day, the chief minister said that keeping in view the ground realities about the disease, the Khyber Pakhtunkhwa government had been taking practical steps for getting rid of thalassaemia and other blood-related diseases. He said that collaboration with non-governmental organisations in this respect figured prominently in the provincial government policy for efficiently regulating the health care institutions.

LWMC to help Quetta municipality

Daily Dawn, May 8, 2015

The Lahore Waste Management Company (LWMC) will help the Quetta municipality develop its waste management system, LWMC Managing Director Khalid Majeed told Dawn on Thursday. The prospects of the working emerged when Quetta Mayor Kaleemullah Khan met the LWMC management, including Chairman on Thursday. They said that on being asked by the Rangers to provide consultancy to Quetta free of cost, he quoted the chairman as saying.

Tanker operators blame municipality for water crisis on govt officials

Daily Dawn, May 8, 2015

KARACHI: Claiming that they are not the ‘tanker mafia’ as they are dubbed, the All Karachi Water Tankers Ittehad came out to present “the real picture behind the water crisis and high rates of tankers in the city” to the media at the Karachi Press Club on Thursday. “It hasn’t stopped raining in Kashmir, so the rivers haven’t gone dry. This water shortage is caused by the government. And there is an automated teller machine here providing the money to these hidden faces,” said Mohammad Tariq Sadozai, president of the AKWati. He then named a KWSB official whom he blamed for the crisis. “It is strange that the KWSB bulldozes a hydrant and a few months later another new hydrant comes up in the very same place. Whoever pay them more gets the hydrant and NOC,” he said. “Grats water, the tanker board’s way of providing water to poor people not receiving water through the lines, is also stolen. The KWSB pays the hydrants for these gratis tankers but this water is no longer reaching the poor. Instead it is going to the VIPs, and the KWSB, which is going bankrupt already, is paying the hydrants for it,” he said.

“Such problems can be easily controlled by handing over the management of the hydrants to the Rangers. We have written letters to the prime minister, the chief of the army staff and the Rangers asking them to look into this matter. We have a positive response from the Rangers, who said they would help us. But we are still waiting for that to happen.” Our tankers weren’t expensive but tell us how are we to survive when we can only sell one tanker in one or two days. There is the driver’s salary, the tanker fuel and what not. So we ask for one tanker what we are being charged. Still it is far less than the hydrants’ own tankers, which are charging up to
Polio-inspired travel restrictions extended for three months
Daily Dawn, May 8, 2015

ISLAMABAD: The International Health Regulations Emergency Committee, which has been advising director general of the World Health Organisation (WHO) on efforts to stop the spread of poliovirus across the planet, has extended the travel restrictions imposed on Pakistan for three months.

At a meeting on April 24, the committee said that even though the number of polio cases reported in Pakistan was declining, the country posed considerable risk vis-a-vis spread of the disease across the world.

However, the Pakistani health authorities are describing the committee’s decision as a positive one because as opposed to two earlier meetings when the restrictions were imposed for six months each time this time they have been extended for “only three months.”

At its April 24 meeting, the committee noted that nearly one year since the declaration that the spread of polio constituted a Public Health Emergency of International Concern (PHEIC), considerable progress had been made by countries in response to the temporary recommendations issued by the WHO’s director general.

“…No cases of wild poliovirus have been reported in Africa for eight months; in 2015 Pakistan and Afghanistan have reported less than half the number of cases that in 2014; there has been no export (of the disease) from Pakistan since October 2014; and the number of persistently missed and inaccessible children is declining in Pakistan,” the committee said.

The number of inaccessible children had declined from an estimated 300,000 to 50,000 in the Federally Administered Tribal Areas (Fata), it pointed out.

Pakistan continued to implement the temporary recommendations and since November an average of 370,000 international travellers per month were vaccinated before departure.

However, the committee noted that during the last 12 months the spread of wild poliovirus continued, with three new cases of export of the disease from Afghanistan to Pakistan occurring late last year.

The committee was of the opinion that Pakistan and Afghanistan were part of the same “epidemiological block” having frequent population movement, which accounted for the ebb and flow of the virus in both directions.

The committee said that in Pakistan a reduction of cases occurred during the “low season” and the performance of the eradication programme had improved.

Nevertheless, 21 of the 22 cases reported so far this year — or 95 per cent of the cases worldwide — were reported in Pakistan. Thus the key factors contributing to the international spread of poliovirus from Pakistan, although improving, had not changed sufficiently since the meeting of the committee on February 17.

Sui Southern Gas Company Limited (SSGCL) on Wednesday shortlisted two bidders for Pakistan’s second LNG import terminal, well informed sources in Petroleum Ministry told Business Recorder.

Pakistan GasPort Limited (PGPL) and Gunvor obtained 89.3 marks each while AF Capital and Akbar Associates received 74.73 marks each from SSGC’s consultants.

Both bidders have been declared technically qualified and have progressed to the final round of the process.

Engro’s Energy Terminal Pakistan Limited (ETPL), which commissioned the country’s first LNG terminal in March, obtained 61.9 marks and did not qualify as bidders were required to receive at least 70 marks in order to qualify.

According to sources, SSGC Board approved the recommendations of AF Capital in their meeting on Wednesday in Islamabad. SSGC board has notified both PGPL and SSGC to send their representatives to the public opening of their financial offers in Islamabad on Friday. The project will be awarded to the bidder offering the lowest tariff.

PGPL, Akbar Associates, and ETPL had submitted their bids on January 27. The levelized tariff for ETPL’s LNG terminal is U.S. 66 cents/mmbtu. The successful bidder will be required to commission the project within 24 months and make 400mmcfcl capacity available to SSGC. Like ETPL, PGPL has proposed establishing an FSRU-based project while Akbar Associates seeks to set up a land-based terminal. The ETPL terminal and the new terminal will together reduce the summer deficit of natural gas by 53 percent and the winter deficit by 36 percent.

In addition, the federal government plans to start the process for the setting up of a land-based LNG import terminal at Gwadar with Chinese assistance.

Lahore — Power shortfall on Friday has reached to 7,750 megawatt (MW) with unannounced power outage of nine hours in urban areas and 11 hours in rural areas due to escalated pressure on the electricity system, Dunya News reported.

According to NTDC sources, the electricity demand is 15,600 MW whereas the production is 10550 MW. Sources say that power demand is gradually increasing due to warm weather whereas water outflow has not grown in big dams as a result of which hydroelectric production is not being raised.

Moreover, a technical fault has also been witnessed in the working of hydroelectric sources and a continuous breakdown of transformers has also been noted from several days.

KARACHI: K-Electric has expressed its interest to install a plant to generate electricity through solid waste at the Dhaebji land fill site managed by Sindh Solid Waste Management Board (SSWMB). A delegation of K-Electric comprising some of its senior officials in a meeting with SSWMB’s Managing Director, Roshan Ali Shahkari Friday said a pragmatic approach was needed to address the issue of existing power shortage. Seeking SSWMB support, they said power generation through waste is a strategy adopted in different parts of the world as alternative...
energy production mode.

"It is the time that all concerned departments and organizations coordinate and cooperate with each other to overcome energy crisis affecting almost all sections of the society," said Osama Qurashi of K-Electric. The meeting among others was also attended by Secretary of the Board, Dr Mir Nusrat Panwar, Executive Director for Operations, Dr A.D. Sanjani, Deputy Director Ahsan Raza, Media Director, Shabbib Siddiqui and Arshad Haider along with some of his other colleagues from K-Electric. SSWMB's Managing Director Roshan Ali Shaikh, appreciating the proposal said the board has constituted six update garbage transfer stations across the metropolis that besides helping it to give a clean look could be used to facilitate the much warranted power generation needs for Karachi.

He said the scheme is being further facilitated through provision for composing plants and refused disposal furnace plants. Shaikh agreed that landfill site at Dhabei spread over an area of 3000 acres, fast emerging as one of the country’s most modern landfill cum treatment site, can be used as a spot for production of electricity. He also mentioned that under initial scheme a mini-forest would also be developed at the site with 40 percent of Karachi waste transported here and efficiently disposed-off. The participants of the meeting hailed measures being planned to give Karachi a green and clean look with added provision to turn it self sufficient in power generation.

Capital Development Authority (CDA), director general (DG) Water Management, has said that sufficient water is available to meet the water requirements of the federal capital till the coming monsoon season. He said that water level in Simly Dam is up to optimal level and sufficient storage of water is also available in Khanpur Dam, so there will be no water scarcity during the summer.

Capitol Development Authority (CDA), Chairman Maroof Afzal was apprised this during a meeting held at CDA Headquarters on Wednesday to review the situation of water supply in the city. The meeting was attended by the Member Engineering Shahid Sohail, Director General Water Management and other senior officers of the Authority.

Chairman CDA was apprised that sufficient quantity of water is available in CDA’s water reservoirs and water complaints are fluctuating between three to four hundred complaints per day which are nominal since CDA is ensuring water supply to 55,000 consumers. He was apprised that 34 million gallons of water is being supplied from Simly Dam reservoir while eight million gallons are being provided from the Khanpur dam whereas the additional water supply is being managed through other sources like Tube wells to meet the water requirement of the city. He was further apprised that water management wing is receiving the complaints mostly from those areas where water is being supplied through tube wells. Alongs with this the seven hours, on average, electricity load shedding per day hinders smooth water supply in few areas of the city. However, the water tanker service is ensuring that the complaints are dealt with promptly. He was further apprised that the main water lines are also being repaired to ensure an uninterrupted water supply during the summer.

Chairman CDA, Maroof Afzal said that all out efforts would be made to ensure un-interrupted water supply. He directed to take up the matter with IESCO so that smooth supply of water could be made in the areas where water is being provided from the ground sources. He said that the tanker services shall be strengthened and made more efficient. For this purpose, tankers with the Sports and Culture Directorate would be also made available to supplement the already existing fleet of water tankers.

**Water riots feared as KE-KWSB row over dues continues**

Dawn, May 7, 2015
well as at the Gharo, Pipri, Hub and NEK pumping stations. KWSB Managing Director Hashim Raza Zaidi appealed to the KE to stop the loadshedding at the KWSB pumping stations because it affected the schedule of water supply to the city areas. “As Karachi was facing a shortage of 560mgd [million gallon water a day] and now there is an added shortfall of 175mgd until the pipeline is repaired,” he said, adding that loadshedding at the Gharo and Pipri pumping stations since Wednesday morning caused yet another shortage of 70mgd.

It is feared that such a severe shortage of water supply to Karachi may also force the people to come out of their homes and protest, causing a breakdown of law and order. Karachi Commissioner Shoaib Ahmed Siddiqui told Dawn that his office was coordinating with the KWSB and the KE to ensure uninterrupted water supply to the city. “I have deliberations from the KE where they say that the pumping stations are exempted from loadshedding. But I received a call from Sindh Minister for Information and Local Government Sharjeel Memon asking me to take notice of KE’s going against their word. When I checked if that was true, I found that they were carrying out loadsheding after a decision taken by their board. I immediately called up their CEO to educate him about the inconvenience caused to the citizens of Karachi due to their decision.

“I also got a letter of settlement for Rs4.410 billion from the energy department secretary for adjustment against dues of 17 operations and critical connections of the KWSB from July 2014 to April 2015, so now there is no reason for such loadshedding. “Although we acknowledge KE’s good work, we do not want unnecessary protests in the city. KWSB is an essential service after all. I wrote a letter to the KE to kindly review and reverse their decision as stopping water supply is anyway not allowed according to law. The KE should not take the government lightly,” he said, expressing the hope that the power utility would in good faith provide the water utility a zero balance certificate after the payment of Rs4.410 billion.

Earlier, Sindh Minister for Information and Local Government Sharjeel Memon had said the KE was breaking the law by carrying out loadshedding at KWSB’s pumping stations. He also said that this action could result in litigation against KE’s management. But after receiving the letter of settlement, the KE wrote to the energy department to note that KWSB was a chronic defaulter of electricity charges and KE had no other choice but to deal with them this way. “At present [KWSB] owes an amount of Rs36.87 billion to the KE on account of outstanding electricity dues against 319 connections. In the current financial year alone, KWSB consumed electricity worth Rs6.649 billion. However, only a meagre amount of Rs25 million was paid by the KWSB in the current financial year,” the KE stated.

The power utility informed the energy secretary that the total dues outstanding against 17 connections referred by him were Rs29.25 billion. While KWSB’s failure to make the payment was liable for disconnection of electricity under the Electricity Act, 1910, such connections had not been disconnected to date in compliance with the order (dated 24 April 2012) passed by the Sindh High Court, which was presently in appeal in the Supreme Court of Pakistan. “This has put serious liquidity constraints on KE … As a result of the current situation, KE is unable to provide uninterrupted power to KWSB. However, it is making every possible effort to provide maximum electricity to KWSB and is complying with the orders of the Honourable Court. Kindly note that till date KE has not disconnected or even attempted to disconnect the electricity of any of KWSB’s connections.

“As regards the adjustment of electricity duty and adjustment of a zero balance certificate, you are informed that the total outstanding dues of 17 connections mentioned by you stands at Rs29.25 billion and as such we are unable to provide a zero balance certificate against the said connections upon adjustment of Rs4.410 million. You are further informed that even the outstanding dues against the 17 connections for the period of Rs5.26 billion and not Rs4.410 billion as stated by you. Moreover, it is important to clarify that the alleged amount of Rs7.8 billion claimed by you on account of electricity duty has been claimed for a period covering at least eight years. “In the circumstances, we request the Sindh government and the KWSB to cooperate with us and promptly release the outstanding dues pertaining to KWSB and ensure payment of future current bills,” read the letter to the energy department by KE’s Chief Distribution Officer Syed Mohammad Taha.

Pakistan on Tuesday inaugurated a 100-megawatt Chinese-built solar power plant, part of its efforts to battle its ever-increasing energy deficit. The plant is the first stage of a project that will eventually cover over 10,000 acres of the central Cholistan desert and add 1,000 megawatts to the nation’s electric grid, making it one of the biggest solar parks in the world. Pakistan faces an annual electricity shortfall of around 4,000 megawatts in the peak summer months of June and July when temperatures can reach 50 degrees Celsius in the country’s center.

The inauguration, headed by Prime Minister Nawaz Sharif, comes weeks after Chinese President Xi Jinping visited Islamabad to unveil a $46 billion investment plan known as the China-Pakistan Economic Corridor (CPEC). Speaking at the ceremony, Sharif said that a solution to the energy crisis would soon be at hand. “Power cuts will be over by either 2017 or 2018 and the wheels of industry will start working,” he said. Pakistan has signed investment agreements with China to build various gas, coal and solar energy projects that will provide 16,400 megawatts of electricity, roughly equivalent to the country’s entire current capacity.

PESHAWAR: Chief Minister Khyber Pakhtunkhwa Pervez Khattak on Thursday announced a protest demonstration outside the Parliament building in Islamabad on May 12, demanding payment of outstanding electricity dues from the federal government. Speaking during a session of the provincial assembly here, he said that the MPAs would stage a protest demonstration in front of the National Assembly for seeking Rs146 billion outstanding dues that fall under the head of electricity profit.

The chief minister said that the province had a potential of producing 5,000 MW of electricity.
All consumers should share LNG cost, say gas companies

**The Express Tribune, May 7, 2015**

However, the federal government was reluctant in launching these power generation projects, he added. He demanded of the government of Prime Minister Nawaz Sharif to pay to the profit, which he claimed was the due right of the KP. “There are no differences between the KP and the federal government … we are only protesting to get our right,” he said. Khattak claimed that Islamabad has itself turned the Pak-China economic corridor into a controversial project. Finance Minister Ishaq Dar had promised to address the mentioned issues, but he was nowhere to be found for the last three months, he added. The chief minister also demanded announcement of NFC Award before the 2015-16 national budget.

**ISLAMABAD:** Gas transmission and distribution companies have suggested that the government should distribute the burden of expensive liquefied natural gas (LNG) to all consumers, a proposal, if agreed, may lead to over 100% increase in prices of locally produced natural gas. Gas utilities – Sui Southern Gas Company (SSGC) and Sui Northern Gas Pipelines Limited (SNGPL) – have asked the government to calculate the weighted average price of locally produced natural gas and imported LNG in order to determine the consumer price, say officials familiar with the development. It will cause an increase in gas prices for all consumers, including domestic, commercial and industrial sectors.

“Influential lobbies among power producers and different industries are also calling on the government to arrive at the weighted average price of expensive LNG and cheaper natural gas in an attempt to force other consumers to bear the LNG cost,” said an official while talking to The Express Tribune. Power companies had already refused to pay for expensive LNG and were reluctant to open standby letters of credit for gas import, he added. Already, the weighted average formula is applied in the case of determining oil prices, but in this the share of locally produced oil is very low. In sharp contrast to this, the share of domestic gas production is higher in overall gas consumption. If the proposal given by gas utilities is accepted, all consumers will face an increase in gas prices even if they do not consume LNG.

The government is also grappling with the issue of payments for LNG supply and as a result it has not been able to ink an LNG-import agreement with Qatar. According to officials, the weighted average mechanism will help the gas utilities to take control of LNG supply which they want. Citing an example, officials say Pak Arab Refinery paid for LNG imports about a month ago, but it did not get the full share of gas while other influential people got LNG on credit. “Serious investors are upset over the demand of gas utilities which want control over LNG supplies,” an industry source said. Officials point out that international LNG suppliers are also opposed to the proposed weighted average price as they are looking for bulk consumers and seeking payments from those who will consume it.

The previous government of Pakistan Peoples Party (PPP) had also tried in 2012 to calculate the weighted average price of gas, but it drew strong criticism. According to officials of the Planning Commission, gas consumers will have to pay up to $10 per million British thermal units (mmmbtu) compared to the existing tariff of $2-4 per mmmbtu. They have fiercely resisted attempts aimed at passing on the impact of higher LNG prices to the consumers.

The commission suggests that power producers, the real beneficiaries of LNG import, should be asked to bear the cost of LNG supplies. LNG is being imported essentially as an alternative to furnace oil, therefore, power companies have the responsibility to pay the additional cost, it says. “The government claims that the country will save billions of dollars by replacing furnace oil with LNG as the latter is comparatively a far cheaper fuel. It means that gas utilities want all sectors to share the high LNG cost,” remarked a government official.

The government claims that the country will save billions of dollars by replacing furnace oil with LNG as the latter is comparatively a far cheaper fuel. It means that gas utilities want all sectors to share the high LNG cost,” remarked a government official.

**SAHIWAL:** Two labourers were killed and six others fainted when an ammonia gas cylinder exploded in an ice factory here on Wednesday afternoon at Adda Kamiya Road, Chichawatni. Rescue 1122 said the pressure of ammonia gas was so high that it took rescuers three hours to evacuate the affected people from the factory. At the time of the blast, six labourers were working on the premises of the ice unit. Those who were near the cylinder died on the spot. An eyewitness, said it took rescuers too much time to spread gas so that they could move into the factory. He said they with the help of masks and other devices entered the factory and closed all leaking valves. The rescuers recovered two bodies and shifted six fainted labourers to the Chichawatni Tehsil Headquarters Hospital three hours after the explosion. On the complaint of Tehsil Municipal Officer Mr Zubair, Saddar Police have registered a case under section 322 of PPC against factory owner Syed Shera Husain, manager Ahmed Kareem and technician Muhammad Naeem with no arrests so far.

**Lahore:** Four international PIA flights were delayed up to four hours on Wednesday after its staff went on strike against the ‘attitude’ of a senior official at the Allama Iqbal International Airport. Passengers bore the brunt of the strike of the PIA staff which they observed reportedly ‘on the pressure of the union (Air League CBA).’ An official told Dawn that the PIA director (vigilance and security) visited some counters issuing boarding to passengers at 10am and ‘snubbed’ a couple of officials for not following the SOPs on booking the luggage. “On this some of the union members and the director exchanged hot words and subsequently the PIA staff went on strike,” he said. The staff also held a demonstration on the airport premises against the director. Four flights – PK-757 for Copenhagen, PK-302 for Karachi, PK-796 for Delhi and PK-303 for Karachi were scheduled for their destinations in the morning. The passengers who could not get boarding before the strike remained stranded for a couple of hours. They also chanted slogans against the PIA staff for causing inconvenience to passengers. “The PIA staff should pick up their internal fights after the duty hours,” said passenger Azeem Rafique who witnessed the quarrel. “However, after some four hours on the intervention of some top officials of the management the PIA employees returned to the duty and
Municipal workers continue protest
Daily Dawn, May 7, 2015

SUKKUR: Employees of the Sukkur Municipal Corporation (SMC), who had observed a a strike and held a sit-in outside the SMC office on Tuesday against non-payment of their outstanding salaries, continued their protest on Wednesday. Locking their offices and working places, they protested under leadership of union office bearers including Muhammad Asif, Chaudhry Shafaat Ali, Ali Mardan Shaikh and others. Addressing the protesters, the leaders said that as per directives of the Sindh High Court bench at Sukkur, one month ago, the government had transferred Rs250 million into the official bank account of the SMC for payment of outstanding salaries, but the employees were still deprived of the payment. On one hand the families of employees were facing starvation due to financial crisis while on the other the municipal commissioner of Sukkur was allegedly taking financial benefits and interest of the funds deposited in the bank. If the salaries were not paid immediately, they said, a strong protest in front of the DC office Sukkur would be staged.

Japan to help improve underground water resources
Daily Dawn, May 7, 2015

QUETTA: Spare parts of drilling rigs worth Rs50 million were handed over to the government of Balochistan by the Japan International Cooperation Agency (Jica) to accelerate work on finding locations of underground water resources. The spare parts were handed over to Planning and Development Secretary Zulfiquar Durrani at a ceremony held at the Civil Secretariat on Wednesday. The spare parts would be used by the irrigation department to repair drilling rigs lying idle for years. The chief representative for Jica Pakistan, Mitsuyoshi Kawasaki, said Balochistan was facing drought-like situation in various districts and his organisation would continue to help the province for searching underground water resources. He signed a Memorandum of Understanding with the representatives of the social and special education department.

Strike in Quetta against corridor route change
Daily Dawn, May 7, 2015

QUETTA: A strike was observed in Quetta on Wednesday in response to a call given by the Awami National Party (ANP) to protest against the reported modification in the Gwadar-Kashgar road of the China-Pakistan Economic Corridor (CPEC) project. The strike call was backed by Anjuman Tajran, the three factions of Jamiat Ulema-I-Islam, PPP, Hazara Democratic Party and PML-Q.

Specialised eye hospital for children on cards
The Statesman, May 7, 2015

RAWALPINDI: Keeping in view the prevalence of eye diseases in Pakistan, particularly in children, the Al-Shifa Trust Eye Hospital has decided to establish a state-of-the-art specialised eye hospital for children in Pakistan, a hospital official said Wednesday. We have set a goal to establish a full-fledged children eye hospital by 2017 which would be first of its kind in the entire region, said Lt. Gen. (Retd) Hamid Javed, President of the trust. Talking to a group of journalists, he said that founder of the trust Late Jahandad Khan envisioned a specialised eye hospital for children in Pakistan which will become a reality within two years. As a first step, we have established a fully equipped eye department which can handle two hundred patients per day, said Gen. Hamid Javed. We will double the capacity in one year as the number of children with eye problems is increasing in Pakistan which can be attributed to the increase in pollution, allergies, unhygienic conditions, sugar and a general lack of awareness. He said that only a specialized doctor can check a child and very special equipment is required for screening premature babies, he said, adding that it is easy to cure eye disease in childhood rather to wait and let it grow to a complicated level. Statistics show that 90 percent of the blind could be easily treated during their childhood to save their eyesight. He said that new hospitals would be established after consolidation of the existing facilities at four hospitals in Rawalpindi, Sukkur, Kohat and Muzzafarbad. We have the privilege of making the blind see through medication and surgeries which have a positive impacts on a patient’s life as they are able to see again that brings a rediscovered freedom to daily living that touches upon every aspect of that patient’s life. – NNI

Workers for reforms instead of Wapda privatisation
The News, May 7, 2015

LAHORE: Thousands of WAPDA workers, along with engineers, held a nationwide protest under the aegis of All Pakistan WAPDA Hydro Electric Workers Union (CBA) on Wednesday against the proposed privatisation of electricity distribution and its generation at the behest of the World Bank. Protesters at the Bakhtiar Labour Hall said high price of electricity and loadshedding were reprehensible and demanded the Government of Pakistan to review its economic and social policies and introduce reforms to raise the hydel, coal, and gas fired thermal power stations in the public sector on war-footing basis.

The workers were carrying banners condemning the feudalism and crony capitalism, and privatisation of the national public utilities. They held protest rallies in support of their demands in all the major cities of the country. At Lahore, thousands of Wapda workers staged a sit-in which was addressed by veteran trade union leader Khurshid Ahmed.

Khurshid Ahmed urged the government to adopt a progressive and self-reliant economic policy and impose tax on the elite class and divert the resources to developing cheaper sources of the electricity. The electricity is the blood for economic and social development that is why founder of nation Quaid-i-Azam categorically declared that all the national public utilities’ enterprises, including electricity, railways, oil, and gas, would be run by the State. He reminded the government of the experience of privatisation which had already failed in Multan, Rawalpindi, and Karachi.

The government should introduce administrative reforms in electricity to raise its productivity instead of dividing it into 15 companies and hand over the control back to the WAPDA and ownership to the private members of the Board of Directors who had not invested even a rupee in these companies as was claimed. He further demanded that the government should hold dialogue with the union instead of privatising the utility unilaterally. He gave a reference to China who was providing electricity to one billion consumers without any loadshedding and its high cost. He said
the workers were restrained to take industrial action as our nation was already fighting a war against terrorists. The workers will be compelled to take industrial action in case their viewpoint is not heard, he stressed.

ISLAMABAD: The government on Wednesday disclosed the price of liquefied natural gas (LNG) agreed with Qatar and insisted that the rate was lower than that offered to previous governments, terming it the best deal even when compared with India. "We have succeeded in restricting the benchmark price to 14.5% (of Brent crude price) and hope that it will be brought further down," Petroleum Minister Shahid Khaqan Abbasi said while briefing the National Assembly Standing Committee on Petroleum and Natural Resources here. The last price offered by the Qatari government to the previous administration of Pakistan Peoples Party (PPP) was 14.9% of Brent crude rate.

Abbasi pointed out that because of certain clauses in the pricing mechanism, India was buying LNG from Qatar at around $13 per million British thermal units (mmbtu) whereas the cargo that arrived in Pakistan on April 27 cost $8 per mbtu. In the meeting, the parliamentary panel was told that if the price was kept at 14.5% of Brent crude rate, LNG would be around 10% cheaper than high sulphur fuel oil, 20% cheaper than low sulphur fuel oil and 50% cheaper than diesel.

"We hope to strike the deal at 14.5%, which will be among the best prices of LNG that Qatar has offered to anyone," Abbasi said. The price would be finalised with Qatar in the next two days, the minister said, rejecting all reports pertaining to LNG supplies as rumours being spread by the oil importing lobby. "All this misinformation was being spread by the oil suppliers as Pakistan purchases furnace oil and diesel worth $2.5 billion per annum and if LNG imports become successful, then who will buy furnace oil."

To reach an agreement, Qatari officials will meet the price negotiation committee constituted by the Pakistan government. A team of experts has already arrived from Doha and they are negotiating the price along with relevant terms and conditions. "Setting the price is a very complicated matter, but unfortunately many groups have been spreading wrong information in the media that Pakistan has already finalised the price with Qatar," he said.

"Transparency International (a non-governmental organisation) even wrote a letter, saying the price agreed by us was not fair, we have to tell that the price is still being negotiated."

The NA committee was told that if the amount that was spent on oil was utilised to produce electricity from LNG, the efficiency of power producers would increase 10%. "This is mainly because there are regular cases of furnace oil theft whereas gas cannot be stolen this way," the minister said, adding there would also be savings of around $1 billion if all existing power plants consumed LNG instead of furnace oil.

KARACHI: The circular debt in the country's power sector reached a new height of 600 billion rupees, Samaa reported on Thursday. An increase in loadshedding all over the country is likely due to the ugly situation of circular debt. According to PEPCO sources, K-Electric has to pay dues of 56 billion rupees. Power sector of Pakistan State Oil and other departments have to pay dues of 230 billion rupees out of which 40 billion rupees have to be paid to local and multinational refineries. PSO has asked government to urgently release 10 billion rupees. In case of non-payment of circular debt, the supply of furnace oil to the power generation companies would be reduced which will worsen the situation of electricity in the country.

TOBA TEK SINGH: Owners of local CNG filling stations announced here on Tuesday staging a protest demonstration on May 7 in Faisalabad against the government for not restoring gas supply to their outlets. Addressing a press conference here on Tuesday, filling station owners association district president Rana Muhammad Ashraf Khokhar said gas supply was being denied to them for the last six months. They said because of the suspension of supply the 32 CNG filling stations in the district were facing huge financial losses while 260 people employed by them had been rendered jobless. They added they had been bearing running costs, including utility bills and expenses incurred on maintenance of machinery since the gas closure. They added that gas was being supplied to the CNG filling stations in all provinces except Punjab that showed discriminatory attitude of the authorities concerned. They said all filling station owners and their employees would gather in Faisalabad on May 7 to stage a demonstration protest outside the SNGPL regional office for restoration of gas supply.

KARACHI: The 72-inch diameter pipeline at the Dhabeji supplying water to Karachi burst on Tuesday evening. According to a Karachi Water and Sewerage Board (KWSB) notification, Dhabeji, Gharo, Pipri, Hub and NEK pumping houses experienced a power breakdown at 8pm on Tuesday that contributed towards the damage. “The build-up of back pressure resulted in the bursting of the pipeline and there would be no supply of water to the city for 72 hours,” the notification read. Meanwhile, Water Board chairman Hashim Raza Zaidi has also notified the chief minister and other government officials regarding the major breakdown.

ISLAMABAD: A serious water shortage has made life miserable for residents of the twin cities, despite assurance of the Capital Development Authority (CDA) and its counterpart in Rawalpindi to ensure smooth water supply. With the start of summer, demand for water increases but the residents are supplied water for a few minutes during 24 hours forcing the consumers to look for other alternative sources. Inhabitants of various areas are facing hardships to cope with unreliable water supply at times. Sensing the gravity of the situation, the tanker mafia has increased the rates. The residents of the area opined that due to poor planning, various houses in the metropolis are not getting appropriate supply of water and CDA should take steps to ensure smooth and adequate water supply. Riaz to APP said they were facing water shortage for the last two weeks and buying water tankers at exorbitant rates. He said residents of the area have given numerous applications to the concerned authorities to take notice and resolve the water shortage problem. When contacted, Water...
Management Wing CDA Official said that the water consumption increases manifold during the summer months while unscheduled load shedding and lavish use of water by the residents are the major reasons of water shortage. He said the concerned department has also been directed for necessary repair maintenance of water tankers, tube-wells and water filtration plants.

The situation is not different for the Rawalpindi residents where in several localities, the authorities failed to supply water, forcing the residents to rely on water tanker mafia. A resident of Gulshanabad, sector-I, Adiyala road, Rawalpindi, Khurrum Husain said he had shifted to the Punjab Government housing scheme some two years ago and failed to get a drop from official connection. - APP

**Health dept takes steps to protect people from Congo virus, SA told**

_The Statesman, May 6, 2015_

**Karachi:** Sind Health Minister, Jam Mehtab Hussain Dahar has said that the Sindh Health Department takes preventative measures every year prior to the occasion of Eid-ul-Azha, to protect people from the Congo Virus. The Sind Health Minister said this while responding during the question and answer session in the Sindh Assembly here. He said the Sindh Health Department circulates an advisory on prevention, control and laboratory testing instruction on Congo Virus infection as per current WHO guidelines among all the Medical Superintendents of hospitals and district health officers. To another written question, the Minister said as analysis reports of milk no adulteration of starch oil, washing powders and urea were detected from the limits of Food Laboratory Karachi, Sukkur and Hyderabad. He said that total 209 children died of Measles in 2012 and sensing the situation, the Health Department started crash program immediately, in the eight affected districts. Total 6217980 children have been vaccinated through 1485 fixed sites and 385 mobile teams, upto April 2013, he added. The Health Minister said both the ICUs and CCUs facilities are available in 15 government hospitals, besides, the ICUs facility are available two and CCUs facility are available in six government hospitals in Sindh. He said that both ICU and CCU government hospitals in the new financial year. Only ICU for 18 and CCU for four government hospitals have been proposed in the new financial year. He said that total 55 centres have been established under the Hepatitis Control Program for the treatment of patients, since the launching of the program in January 2009. The Sind Health Minister said that the doctors are posted according to sanctioned strength and as per vacancy position in each government’s hospital. However, while posting doctors in backward areas, preference is given to those having domicile of that district. - APP

**Water logging eats up 15,000 acres**

_Daily Dawn, May 6, 2015_

**Bahawalnagar:** Up to 15,000 barren acres, malnourished children, underfed animals and damaged houses tell the story of water logging and salinity along the Hakra Canal in Haroonabad and Fort Abbas tehsils. The Hakra Canal with a capacity of 2,700 cusec originates from Jalwala headworks on the River Sutlej. A visit along the canal shows that water logging and salinity have affected 150 villages by 50 to 60 per cent and 20 villages by 90 per cent. Due to the spread of water logged land was reduced to five maunds per acre this year from the average 45 maunds per acre. The villagers of affected area have demanded that the area be declared calamity hit. The affected area is located a few kilometres from the no man’s land on eastern Indian border. The farmers of 156/3L, 157/3L, 195/HB, 196/HB, 194/7R and 160/7R have witnessed helplessly the onslaught of water logging and salinity on their farms in recent years. The onslaught has gained an alarming momentum and has engulfed not only the agricultural land but also residential areas. The situation has pushed the farmers of the affected areas on the verge of starvation as 90 per cent of the population of the affected areas depends solely on agriculture. Water logging has destroyed valuable properties and mud houses stand ruined. Farmers said so far 15,000 acres had been water-logged, but with water logging was engulfing the land every day and soon the fertile land of other villages would be under the water. They alleged the quarters concerned were apparently indifferent to the plight of the people. Niaz Randhawa is one such farmer whose 20 acres have been eaten up by water logging and salinity. Arshad Karim, of 195/HB, said that some water experts had informed them the twin menace surfaced here due to Bajahstan in India, which is adjacent to the affected area. Amin, of 157/3L, said they had been facing hostile living conditions in the areas because of mosquitoes and other insects, and children contracted disease due to unhygienic conditions. Another farmer, Abdullah, said due to the paucity of fodder, their animals were dying. Executive Engineer of Irrigation Development Division Sajid Razvi said his department was not asleep, and steps were underway to overcome the situation. The department is responsible for maintaining the drainage nullah. - APP

**Polio drive in seven UCs deferred**

_Daily Dawn, May 6, 2015_

**Karachi:** Health authorities deferred the polio campaign in seven of the 49 union councils on Tuesday after volunteers in these UCs protested against the non-payment of honoraria. Officials said the polio campaign was deferred in six UCs in Baldia and one UC in Korangi for an indefinite period when volunteers protested and refused to work for not getting the wages. A senior official said the volunteers had been issued crossed cheques but many of them had no bank accounts to encash them. The deputy commissioners of Karachi west and Korangi have been requested to help solve the issue so the work is not affected any longer,” said the official.

**Ballochistan CM to take up load-shedding issue with centre**

_Daily Times, May 6, 2015_

**Quetta:** Balochistan Chief Minister Dr Abdul Malik Baloch on Tuesday told the members of the provincial assembly that he would take up the issue of prolonged power load-shedding with the federal government. The assembly session was held with Deputy Speaker Mir Abdudd Quddooas Bezinjo in the chair. Speaking on an adjournment motion moved about power outages, Pashtoonkhwa Milli Awami Party (PKM) MPA Nasrullah Khan Zeeray said that Balochistan had been facing shortage of electricity daily. "Our demarcation of new transmission lines via Dera Ismail Khan, Zhob and Quetta has not been met so far," he said. He said that Quetta Electric Supply Company (QESCO) was not providing electricity to several villages. He demanded the Balochistan government hold talks with the federal minister for power about directing QESCO to reduce prolonged power load-shedding in Balochistan. Pakistan Muslim League-Nawaz (PML-N) MPA Farman Ahmed said that Quetta Electric Supply Company (QESCO) was facing shortage of water due to electricity load-shedding. People are getting frustrated due to prolonged power load-shedding, he said. He suggested launching solar energy projects to meet the energy demand of...

the province.

National Party (NP) MPA Haji Islam said that QESCO was not providing electricity for schemes of Public Sector Development Programme (PSDP). "QESCO has been carrying out daily 12-hour load-shedding in our areas, causing problems and difficulties for people," he said. PML-N MPA Asim Kvard said that load-shedding had destroyed standing crops and gardens. Several areas of Balochistan are receiving electricity only for two hours a day, he said. Responding to them, Chief Minister Dr Abdul Malik said that he was going to Islamabad to take up the issue of prolonged power load-shedding with the federal government. "I will ask the federal government to make QESCO bound to implement its promises of not carrying out prolonged power load-shedding," he said. Later, the house was prorogued.

LAHORE: Electricity demand on Tuesday has reported to be reached at 15,500 Mega Watt (MW). At least nine and 11 hour-long outages are being carried out in urban and rural areas. According to the national Transmission and Dispatch Company (NTDC) sources, the electricity shortfall has amounted to 4,700 MW while the production is 10,800 MW. The imbalance in production and demand is leading to nine and 11 hour-long outages in urban and rural areas. Despite this, unannounced electricity outages are also being conducted. According to the sources, the shortfall has increased due to the increase in the temperature as the season is changing. However, water outflow from the dams in not being increased for agricultural needs of the country.

BAHALWALPUR: After inaugurating the first unit of the Quaid-e-Azam Solar Park in Bahawalpur, Prime Minister Nawaz Sharif promised on Tuesday that load-shedding is expected to end by 2018, Express News reported. "Load-shedding will end by 2017-2018," the prime minister said while addressing the inaugurating ceremony of 100 megawatt solar project. PM Nawaz said China and Pakistan will constitute a special committee to ensure the timely completion of the projects, worth $46 billion, launched by the two countries.

"We want to make sure that the present government completes these projects on time unlike the previous governments," the prime minister said. He added that the world is acknowledging the progress made by Pakistan. "These power projects spread a positive message to the investors, who were unable to invest in electricity shortage previously," the prime minister said. PM Nawaz said the solar park is not just the biggest solar project of Pakistan but of the world. "Energy crisis is the second most important issue and now there is a hope that we will soon tackle the energy crisis through this solar project, coal project and other energy projects," he added.

The prime minister said around 1000 megawatt electricity will be produced under the Quaid-e-Azam Solar Park in its later phase while the Thar Coal Power project as well as other projects will collectively add 10400 megawatt of electricity to the national grid in the future. "Democracy is witnessed delivering tangible results for the first time," he said. Speaking about the cost of electricity, PM Nawaz said it has decreased significantly by 5.79 rupees per unit. "It is a huge achievement," he added. Earlier, while addressing the inauguration ceremony Chief Minister Punjab Shahbaz Sharif said the project is yet another milestone in Pakistan and China's all weather friendship. Shahbaz said the project was completed with the cooperation of China.

"The Solar Park is an investment made by China but much more than that it is China's unwavering support lent to Pakistan," he added. Shahbaz said the project has been completed in a very short period of time because of the hard work of the workers. Speaking about the quality of the project, CM Punjab said each and every aspect of it was checked and approved by German consultants before any payments were made. The project was inducted into the national transmission grid as soon as it was inaugurated by Prime Minister Nawaz Sharif today (May 5). Chinese Ambassador Sun Weidong was also in attendance and addressed the ceremony. The first unit was completed at a cost of $131 million in one year.

The Punjab government had announced plans to establish the Quaid-e-Azam Solar Park over an area of 10,000 acres in Bahawalpur district. The Quaid-e-Azam Solar Park Company was then registered with the Securities and Exchange Commission of Pakistan. According to an energy department official, the project was scheduled to be completed during the first quarter of 2014. However, it was delayed after the Chinese firm granted the contract failed to fulfill the criteria during the due-diligence process carried out by Punjab government," he added.

SAHIWAL: Two labourers were killed and six others fainted when an ammonia gas cylinder exploded in an ice factory here on Wednesday afternoon at Adda Kamlia Road, Chichawatni. Rescue 1122 said the pressure of ammonia gas was so high that it took rescuers three hours to evacuate the affected people from rooms of Qadiriya Cold Storage and Ice Factory. Rescue operation head Abdur Raazag Dogar said no proper safety measures were adopted at the place of the ammonia gas cylinder. At the site of the blast, six labourers were working on the premises of the ice unit. Those who were near the cylinder died on the spot. Irfan, an eyewitness, said it took rescuers too much time to spread gas so that they could move into the factory. He said they with the help of masks and other devices entered the factory and closed all leaking valves. The rescuers recovered two bodies and shifted six fainted labourers to the Chichawatni Tehsil Headquarters Hospital three hours after the explosion. On a complaint of Tehsil Municipal Officer Mr Zubair, Saddar Police have registered a case under section 322 of PPC against factory owner Syed Shera Hussain, manager Ahmed Kareem and technician Muhammad Naeem with no arrests so far.

KARACHI: All you had to do to reach the factory in flames in the SITE area on Monday was let the jet black smoke clouds guide you. They could be seen from afar. The fire started early, around 9am. I was preparing breakfast for myself then. Suddenly something smelt very different and I thought I had burnt my breakfast, which really wasn't the case. Then I saw smoke along with yarn flaks flying around like sparks coming out from behind there," Akhbar Mohammad, a
Would-be mothers in Gadap town go through untold agony for want of health facilities

Daily Dawn, May 5, 2015

KARACHI: Despite being the largest (area-wise) town of Karachi, Gadap is the least developed and most backward part of the city; poverty is rampant and life's basic facilities are non-existent. Recently buried in the graveyard of Gadap town's Qadir Jokhio village is a young mother, 25-year-old Zeenat, who now rests in peace with her baby. Both graves are unmarked. Their lives could have been saved if the private hospital she was initially taken to in Gadap had provided her with the right treatment, Dur Mohammad, Zeenat's grieving father, says as the Dawn team stand by quietly in the graveyard. According to him, Zeenat in her last stages of pregnancy started having labour pains a day before returning to fight the blaze, a bystander remarked: "They have been doing this since morning but the flames are too stubborn."

Their lives could have been saved if the private hospital she was initially taken to in Gadap had provided her with the right treatment, Dur Mohammad, Zeenat's grieving father, says as the Dawn team stand by quietly in the graveyard. According to him, Zeenat in her last stages of pregnancy started having labour pains and vaginal bleeding around 8pm on April 14 when she was taken to a private hospital, situated about 20 kilometres from the village, part of union council-three of Gadap. "About half an hour was wasted in arranging a vehicle to shift her to the hospital where doctors first administered her some kind of injection and, then, blood, as they found her hemoglobin (HB) level too low (that was three while a pregnant woman's HB level should be at least 10, according to doctors)," Mohammad recalls. These efforts, however, couldn't help Zeenat and she started vomiting upon which the family was asked to take her to the Civil Hospital Karachi, about 40km from the private hospital. The poor family once again pleaded the driver to show some mercy and help them take their patient battling for life to the hospital. The driver agreed and the family finally reached the CHK around 11pm. Zeenat, the family narrates, was immediately admitted and operated upon but the doctors could neither save her nor the baby. The family was told that excessive blood loss proved fatal for Zeenat and the child. "It was a baby girl. I held her in my arms for a while but didn't have the courage to see her face," Mohammad says. At the village, Zeenat's blind mother is still struggling to accept the death of her only daughter. Sitting in her one-room house, she doesn't reply to any question posed to her. "She has become too quiet after Zeenat's death," Jannat, their daughter-in-law, says. According to the family, it was Zeenat's fourth pregnancy in eight years of married life. Two of her children had died earlier within the first week of their birth and only a girl survived. She is looked after by her father that lives in a nearby village. No functional hospital. It might be the first maternal death of this year in Gadap town but, according to residents, such deaths are common in the area that has no functional government hospital while facilities at primary healthcare centres are inadequate. Spread over 1,200 square kilometers, Gadap town is divided into eight union councils and, according to old estimates, is said to have a population of about 550,000. The Dawn team visited a 50-bed government hospital located in Gadap town that has been lying closed since its inauguration in 2009. "It was started in 1990s and was made in bits and pieces by different governments," says a local resident. The basic health units in the area are often without a doctor and medicines and are closed down by 2pm. "We want a female doctor in our area so that women feel comfortable discussing with her their health issues," says Nasima, a teacher running a private school near Qadir Jokhio village. Residents of the town recall the good old days when the area was famous for its agricultural produces and was a major source of supply of vegetables and fruits to the city. But, now it's fast turning into a desert with depleting water resources aggravated by an acute lack of rain. "There is no supply of piped water and people have boring system in place to meet their water demands."

This widespread practice has also led to a steep decline in underground water level, along with excavation activities to remove sand and gravel from Malir riverbed over the years," said Munawar Hussain Jokhio, a social activist. Most parts of Gadap are also deprived of piped gas supply that, residents say, has also caused deforestation. Educational facilities exist but they are...

But, now it’s fast turning into a desert with depleting water resources aggravated by an acute lack of rain. “There is no supply of piped water and people have boring system in place to meet their water demands.

This widespread practice has also led to a steep decline in underground water level, along with excavation activities to remove sand and gravel from Malir riverbed over the years,” said Munawar Hussain Jokhio, a social activist. Most parts of Gadap are also deprived of piped gas supply that, residents say, has also caused deforestation. Educational facilities exist but they are without teachers in most cases. “Lack of clean water is the major reason behind poor public health. A few years ago, we did a survey and found that 20pc of about 5,500 people tested were suffering from hepatitis,” said Dr Moula Bux Abbasi, a senior retired government official. On women’s health, he said that since most people lived in abject poverty they couldn’t spend enough on their health. “We could only provide them with crude oil,” he said. “Some don’t even have enough milk to make tea. Most women are acutely anemic that makes them vulnerable to have heavy vaginal bleeding in pregnancy. If immediate and proper medical help is not provided, the condition could be life-threatening,” he said. Sharing her concerns on women’s health, Dr Nusrat Shah who heads a gynecology ward at CHK said that women having HB level less than three reported at the hospital that was risky both for the mother and the child. “I can’t offer an immediate explanation to what exactly happened to the mother on that night without going into details about her case. What I could say, however, is that vaginal bleeding before delivery was not normal and required careful patient treatment,” she said. Pregnant women, she said, must have at least HB level 10 at the time of delivery and that could be done only if they were provided with proper antenatal care and iron supplements. EDO Dr Zafar Ijaz said that the health department was working on a plan to make the 50-bed hospital functional and upgrade a rural health centre (located in Gadap’s Murad Memon Goth) to a hospital. “The hospital is not functional because the human resource required to run the health facility hasn’t been approved by the government yet,” he explained, adding that health camps were set up in the town to cater to residents’ medical needs.

PESHAWAR: Medical experts on Monday advised people to take special preventive measures to protect them from malaria disease. According to them, citizens should properly dispose the solid waste and stop water storage practices at their residences to prevent access to egg-laying female mosquitoes in start of high-risk season. They said mosquitoes breed primarily in containers like earthenware jars, metal drums and concrete cisterns used for domestic water storage, as also discarded plastic food containers, used automobile tyres and other items that collect rain water. Dr Wasim Khawaja from Pakistan Institute of Medical Sciences (PIMS), talking to APP, said that malaria and dengue was a mosquito-borne infection, which in recent years had become a major public health concern. He said malaria and dengue fever was a severe flu-like illness that affected infants, young children and adults. He added the spread of dengue was attributed to expanding geographic distribution of the four dengue viruses and of their mosquito vectors, the most important of which was the predominantly urban species aedes aegypti.

He said the rapid growth of urban population was bringing ever greater numbers of people into contact with this vector, especially in areas that were favourable for mosquito breeding like where household water storage was common and where solid waste disposal services were inadequate. He said dengue viruses were transmitted to humans through the bites of infective female aedes mosquitoes. He added mosquito could remain viable in the blood of an infected person. He said after virus incubation for eight to ten days, an infected mosquito was capable, during probing and blood feeding, of transmitting the virus to susceptible individuals for the rest of its life. He said the virus circulated in the blood of infected humans for two to seven days, at approximately the same time as they suffered from fever. He added the clinical features of dengue fever varied according to the patient. Dr Sharif Astor from Federal Government Poly Clinic (FGPC) said infants and young children might have a non-specific febrile illness with rash as older children and adults might have either a mild febrile syndrome or the classical incapacitating disease with abrupt onset and high fever, severe headache, pain behind the eyes, muscle and joint pains and rash. He said dengue haemorrhagic fever was a potentially deadly complication that was characterized by high fever, haemorrhagic phenomena. - APP

KARACHI: Civil Servants belonging to the 12th Civil Services Academy (CSA) Commoners here on Monday constituted a MediBank Trust - Sindh chapter, to provide free of cost medicines to needy patients, in memory of their colleagues or any of their family members who passed away during last few years. The project, being spearheaded in the province by Commissioner of Karachi, Shoaib Ahmad Siddiqui, also holds provision for "free clinics" at Abbasi Shaheed Hospital, Jinnah Post Graduate Medical Centre, Civil Hospital, and Pakistan Railway Hospital. These facilities are being initially provided with 40 different medicines, to be made available to patients in need and who due to paucity of resources may not be able to arrange the same. Each of these clinics is planned to be named after the deceased members who belonged to the 12th CSA Commoners or deceased family member of the civil servants pertaining to the group. The MediBank Clinic at Abbab after Dr. Sundus Qureishi (late), a member of CSA commoners while that in JPMC was dedicated to late wife of Karachi Commissioner.

Sindh Chief Secretary, Siddique Memon, Inspector General of Sindh, Ghulam Haider Jamali, Chairman, PNSC, Arif Ellahi, Additional Secretary Establishment, Islamabad, Suhail Akhter Shah, Director General (Evaluation), Pakistan Customs, Sameera Nazeer, Collector (Customs), Rubina Wasiti, Deputy Inspector General of Police, Aleem Jaffary, Auria Jan Maqbool, DC Malir, Jan Mohammad, Subtagtin Saba along with JPMC Director, Prof. Anis ul Hasan Bhatti and Director, Abbasi Shaheed, Dr. Salma Kauser attended a session to streamline the project. Javed Nisar Syed, a senior civil servant and founder of the MediBank project said it was already underway in different cities of the country, in memory of colleagues, namely Capt. Ali Raza, Khalid Bashir, Urooj Shafaq, Asif Siddiqui, Nawaz Javed, Zaman Khatkhat, Shahid Riaz, Muhammad Nasir, Azam Saleem, Rehan Ali Sher, Amjad Khatkhat, Rehamullah Bittani and Asim Tabrez. Shoaib Ahmad Siddiqui on the occasion said the MediBank project has only recently been initiated in Sindh and following the four designated clinics in Karachi would soon be established by the 12th CSA Commoners in other parts of the province too. - APP

KARACHI – Residents of Karachi while giving up their patience staged a protest outside cafe Piylia over water crisis and worst electric load-shedding in Federal B. area and KBR Society, Daily Dunya reported on Monday. Enraged protesters chanted slogans against the local administration and burnt tyres disrupting the flow of traffic. Security personnel after getting the information of the incident arrived at the scene and dispersed the protesters.

KARACHI (Web Desk) – A speeding water tanker killed two children and wounded five others when it ran over them in a Karachi neighbourhood on Monday. The incident took place in Khairabad area of Orangi Town, where seven children were hit by the water tanker on their way home from a madrassa. Initial reports suggested the children had been playing cricket. Two kids suffered skull fractures and died on the spot. The others were rushed and ferried the wounded and dead to a hospital. The driver fled the scene but the tanker was impounded. The children, who were reported to be between 10 and 15, could not be identified.
Mansehra city residents consuming polluted water

**Daily Dawn, May 4, 2015**

The people of Mansehra city have been consuming highly polluted water, which is causing water-borne diseases among them. "The water supply scheme which was started some three decades ago is now polluted and causing epidemics in the district," said Mohammad Shoaib, a local resident, while talking to Dawn on Sunday. He said that the municipal committee had not taken any step to rectify the situation even after reports that the water was not fit for human consumption. He added that due to lack of proper drainage system of the residential areas which sprang up around the Booth Khatta area, the origin of water, sewage continuously fell into the water source. "It is unfair against despoiled departments that water of the scheme in not fit for human consumption as it gets mixed with sewage of settlements along the source, the municipal committee is not bothered to either create an alternative source of water or prevent the existing one from being polluted," said Mr Shoaib. Operator of the motor pumps at Booth Khatta, however, said on condition of anonymity that the municipal committee was not to be blamed for the water contamination, and held the growing population responsible for the mess.

Protestors seek CNG stations’ reopening

**Daily Dawn, May 4, 2015**

It is our earnest request to the government to hand the management of all the legal hydrants here to the Pakistan Rangers. “Sindh Minister for Information and Local Government Sharjeel Inamath said on Sunday that the KWSB had nothing to do with the tankers. The real problem of water scarcity in the city was the non-availability of enough water to meet the needs of the metropolis. “The tanker drivers and owners. The union is headed by someone named Ghulam Nabi. They answer to Sharjeel Memon," Mohammad Sharif said. "These 200 tankers are giving us a bad name. We feel we have no option but to go on strike now. We are 6,000 to 7,000 tankers and they only a couple of hundred. Then it will also be interesting to see how they manage the city with their 200 tankers," he said. "What can really help the city overcome its water woes is the Pakistan Rangers. It is our earnest request to the government to hand the management of all the legal hydrants here to the Pakistan Rangers," said Sindh Minister for Information and Local Government Sharjeel Memon.

26 LPG refilling shops sealed

**Daily Dawn, May 4, 2015**

Cases have been registered against the shopkeepers. A team was established under the supervision of DCO Ahad Dogar which raided LPG sale points on GT Road, Jinnah Road, College Road and Alam Chowk and sealed 26 of them. While the contract tankers queue up for their single turn, the hydrants are being given their own 10 to 15 tankers.

Tankers charge exorbitant rates amid full-blown water crisis in city

**Daily Dawn, May 4, 2015**

The tanker association general secretary said it really didn’t matter who the MD was because the post was occupied by just a puppet playing in the hands of politicians. “The tanker owners’ hydrants’ owners are making 16 to 18 rounds and even selling water for Rs15,000 per tanker in Defence and Clifton. As always with no water coming through the line, the people have no choice but to buy,” said Mohammad Sharif. On April 30, KWSB MD Qutubuddin Shah retired from service and former commissioner of Karachi Hashim Raza Zaidi has been named as the new MD. The new MD is taking over as the head for a second time. He had earlier been there for a short stint, from Dec, 2014 to Feb, 2015. All attempts to reach the new MD on Sunday failed as his phone had been switched off.

13 die as fire engulfs bus carrying wedding party

**Daily Dawn, May 4, 2015**

At least 13 people were burned to death and 50 others injured when a coach carrying a wedding party touched a high-voltage electric wire and caught fire on Indus Highway in Khairpur Nathan Shah on Sunday. The coach was carrying the wedding party back to Datal Babar village after the marriage ceremony in Dadu. When his attention was quick to point out on Sunday, “Earlier, the Karachi Water and Sewerage Board (KWSB) was closing down all the hydrants, including the subsoil hydrants, and the 12 remaining ones had such long queues that one tanker which used to make five to six trips to the hydrants could only have its fill once in 24 hours. So, to earn the same amount in a day, the tanker owner jacked up its cost.” But now there is a new system with the hydrants being given their own 10 to 15 tankers. While the contract tankers queue up for their single turn, the hydrants are being given their own 10 to 15 tankers.

The tankers association general secretary said that the tanker owners’ hydrants’ owners are making 16 to 18 rounds and even selling water for Rs15,000 per tanker in Defence and Clifton. As always with no water coming through the line, the people have no choice but to buy,” said Mohammad Sharif. On April 30, KWSB MD Qutubuddin Shah retired from service and former commissioner of Karachi Hashim Raza Zaidi has been named as the new MD. The new MD is taking over as the head for a second time. He had earlier been there for a short stint, from Dec, 2014 to Feb, 2015. All attempts to reach the new MD on Sunday failed as his phone had been switched off.

Crisis Response Bulletin

January 2018

To: Journalists

From: CRISIS RESPONSE BULLETIN

Subject: Crisis Management

Dear Journalists,

In light of the recent crisis, we would like to provide you with the following guidelines to help manage and communicate effectively during a crisis.

1. Stay Calm: It is important to maintain a calm demeanor during a crisis. This will help you make better decisions and communicate more effectively.

2. Be Prepared: Have a plan in place for managing a crisis. This should include a list of contacts, a communication strategy, and a list of key messages.

3. Be Honest: Be honest and transparent with the public. This will help build trust and credibility.

4. Be Responsive: Respond to questions and concerns promptly. This will help prevent misinformation from spreading.

5. Be Consistent: Be consistent in your messages and actions. This will help prevent confusion.

We hope these guidelines will help you manage crises effectively.

Best regards,

[Signature]

CRISIS RESPONSE BULLETIN

CRISIS RESPONSE BULLETIN

Date: 6 February 2015

The crisis management team has been working round the clock to ensure the safety and security of the people affected by the recent earthquake. The team has been working closely with the relevant authorities to provide necessary assistance to the affected areas.

The affected areas have been divided into three zones: Zone A, Zone B, and Zone C. The team has been working on a 24/7 basis to ensure that all the needs of the people are met.

In Zone A, the focus has been on providing medical assistance to the injured. The team has set up several medical camps and has provided medical aid to those who need it.

In Zone B, the focus has been on providing food and water supplies. The team has set up several distribution centers and has ensured that everyone has access to these basic necessities.

In Zone C, the focus has been on providing shelter to those who have lost their homes. The team has set up several temporary shelters and has ensured that everyone has a place to live.

The team has also been working closely with the international community to ensure that the necessary aid is provided to the affected areas.

The team has been working tirelessly to ensure that everyone is safe and that their needs are met. The team is grateful to everyone who has supported their efforts.

The team will continue to work round the clock to ensure the safety and security of the people affected by the recent earthquake.
