

H2H Network COVID-19 SUPPORT PACKAGE

Services to counter the global Covid-19 'info-demic'

The H2H Network consists of independent service providers who provide expert services for responders in and during an emergency. The services are intended to be accessible to all responders. Below you can see who is providing what services, as well as contacts per organisation. For other H2H Network service requests, contact info@h2hworks.org

Who	What ?	Contact them if you want:	Watch for...	Contact
Evidence Aid*	Library of collated, summarised and up-to-date research on the effectiveness of interventions to treat and manage COVID-19.	Latest in research, openly available in one place, especially for policy-makers and practitioners. To share research that you would like to be considered for the library.	See openly accessible database of relevant research: https://www.evidenceaid.org/coronavirus-resources/ Regularly updated and provided in multiple languages over next three months.	Ben Taylor bhtaylor@evidenceaid.org
BBC Media Action*	Multi-lingual media and communication content for a range of TV, radio and online platforms. <i>Focus on Southeast Asia region, especially Bangladesh, India, Cambodia, Nepal and Myanmar. (Focus may shift as epidemic evolves.)</i>	Factually accurate information about prevention and what to do in the case of suspected symptoms of COVID-19. To promote fact checking before sharing information on the virus to minimise the spread of mis/disinformation on a local, regional or global scale.	Video, audio and online content using relevant platforms and methods for the local context. Outputs translated into Bangla, Hindi, Burmese, Bangla, Bahasa Indonesia, Khmer and Nepali. Other languages as needed depending on spread of virus. Includes possible Swahili and French if a shift to African context.	Kate Gunn kate.gunn@bd.bbcmediaaction.org Secondary contact: Richard Lacey richard.lacey@bd.bbcmediaaction.org
Internews*	Documenting community concerns, questions and rumours, address it with vetted information from humanitarian actors and support local media to localise and amplify fact-checked content that is in line with the realities of their audiences. Engage with communities to improve access to platforms for feedback and discussion of the local dimensions of the health crisis. Focus on southeast Asia region, especially Thailand (may shift as epidemic evolves)	Accurate, timely and actionable multi-lingual information in local markets, tailored for social media. Share aggregated social media content to support rumour tracking work. Extensive network of local media, media networks and CSOs across South East Asia.	Information packets that combine community data with vetted information in formats that are easy to share and use on social media and support local media to produce more demand-driven and accurate information.	Stijn Aelbers saelbers@INTERNEWS.ORG
Translators without Borders*	Language and literacy data and language maps for affected Asia-Pacific countries to inform communication strategies. Social media monitoring in relevant languages and analysis of terminology. Plain language editing and text and audio translation of public information content.	Plain language editing and translation support for public information on the coronavirus in languages of affected Asia-Pacific countries. Information on the languages and literacy levels of affected countries. Information on the words being used on social media to talk about the virus in the languages of affected countries.	Language data and maps for affected countries of the Asia-Pacific region. Terminology resources. Content on COVID-19 in at least 12 languages, including simplified and traditional Chinese, Thai, Vietnamese, Indonesian, Tagalog and plain English.	Virginia M. Moncrieff virginia@translatorswithoutborders.org
