Coordination and Key Partners

UNICEF continues to participate actively in the coordination mechanisms at national level, provincial, and local level and co-leads the commissions on communication, WASH and psychosocial care; and active in the working groups on logistics and vaccination. Beni currently serves as the operational headquarters for UNICEF's response. A UNICEF security specialist is also deployed in the field to support security assessment and safety of the operations.

The coordination of UNICEF's response is dynamic due to the identification of confirmed cases in Makeke, Mandima Health zone, Oicha Health Zone, Butembo and Masereka Health Zone. UNICEF coordinates Makeke's Ebola response from the coordination team based in Mangina Health Area and the coordination response for Oicha Health Zone. A new coordination hub is currently being put in place in Butembo Health Zone, which will also support the response in Masereka Health Zone. A psychosocial and communication commissions have been set up in Butembo Health Zone, composed of five clinical psychologists and communications specialists. Due to the security access in Oicha and Masereka Health Zone, UNICEF works through a local partner to

* Examples: CAC, religious leaders, opinion leaders, educators, motorists, RECO, military, journalists, meat sellers, drivers, youth groups, other
** Examples: door-to-door, church meetings, small-group training sessions, school classes, briefings with leaders and journalists, other
*** Result is cumulative since initiation of the activity. Note number of contact is on the decline as the response proceeds
