

HIGHLIGHTS

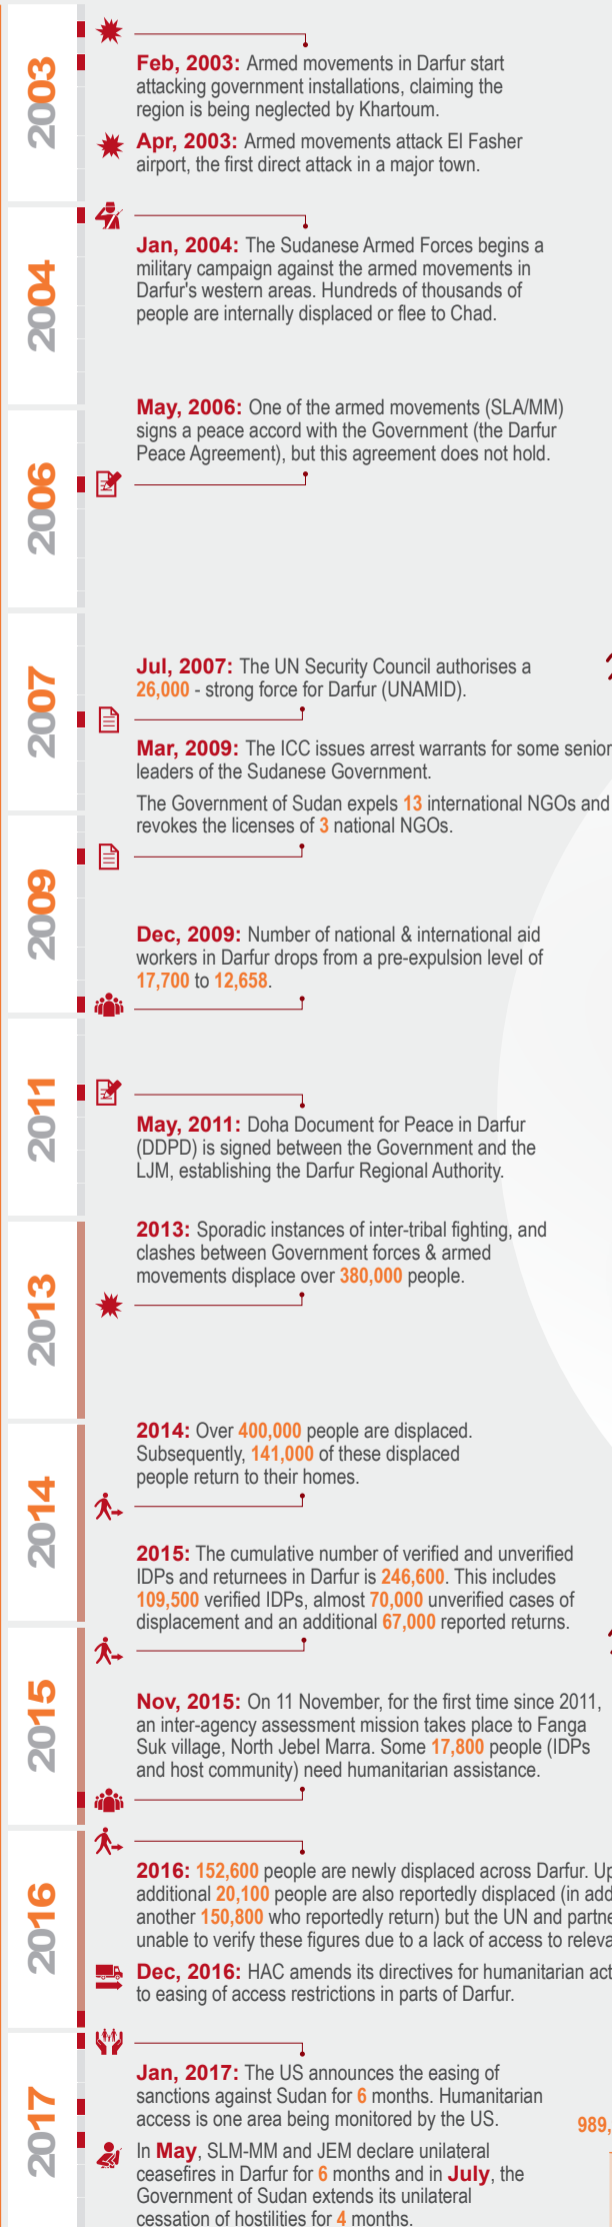

Due to unilateral ceasefires by the Government of Sudan and most armed groups, there has been significantly less conflict and related displacement in Darfur during the first half of 2017 than during the same period in previous years. A reduction in inter-communal tensions and related displacement in the area has also been observed. However, a lack of basic services and infrastructure in addition to insecurity in some areas continues to prevent the return of displaced people to their areas of origin. While in some areas access has improved following the introduction of new directives for humanitarian action in December 2016, implementation of the directives remains inconsistent across states.

According to the 2017 Humanitarian Needs Overview, about **3 million** people are currently in need of humanitarian assistance in Darfur. In 2017, approximately **8,200** people were newly displaced across Darfur, according to the UN and partners. Up to an additional **4,000** people were also reportedly displaced, but the UN and partners have not yet verified these figures.

In addition, about **66,300** South Sudanese refugees arrived in East, North and South Darfur between January and June 2017, bringing their total number in the region since December 2013 to about **127,800** people (UNHCR, 30 June 2017).

Timeline

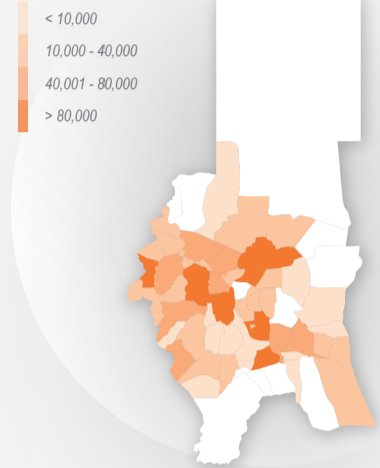

People in need

Source: 2017 HNO
*Since the 2017 HNO was finalised, more refugees have arrived in Darfur, as shown elsewhere in this infographic
