

Colombia - Floods and Landslides

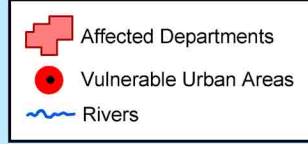

16 December 2003

IFRC Information Bulletin No. 1

"As a result of constant rains in Colombia and the rising levels of the rivers Magdalena, Cauca and Atrato, 142 emergency situations have occurred..."

0 25 50 100 150 200 Km

As a result of flooding:
42 deaths
57 seriously injured
1,100 homes destroyed
7,139 affected families
(35,695 affected people)

There is a high probability of flash flooding and landslides in the mountain regions (shaded dark in the map). Certain urban areas are also vulnerable.
