25 November 2014: CAPE VERDE – Volcanic Activity & MOROCCO - Flash Floods

**CAPE VERDE – Volcanic Activity**

- The volcano on the island of Fogo, Cape Verde, started erupting at 10.00 (local time) on 23 November, emitting gas and lava. As of the same date, the Government of Cape Verde ordered the evacuation of the community of Chã das Caldeiras (approx. 1,000 people), situated within the crater of the volcano. As of early 25 November, there were no reports of injuries or damage.
- Latest major eruption of Fogo volcano occurred in 1995.

**MOROCCO – Flash Floods**

- Heavy rainfall affected central and southern Morocco in the last few days.
- Media report flash floods in the provinces of Marrakesh, Guelmim, Agadir and Ouarzazate, with a death toll of 32 people, 24 of which in Guelmim, while another six were still missing. Hundreds of houses have reportedly collapsed and many roads were destroyed.
