

H2H Network

Get Ready Fund

Helping members to be response-ready and adapt to new realities in crisis.

The H2H Network has activated its new “Get Ready Fund”, aiming to support members to develop processes, systems and services allowing them to respond faster and more effectively to crises in 2021 and beyond. Six member agencies who specialize in community engagement and accountability; quality and sector professionalization; and data and information management, will implement projects focused on anticipation and adaptation to changing humanitarian operating environments. Results will be documented in the form of a series of case studies, targeting H2H organizations and the wider humanitarian community.

Projects run from 1 December until 31 May 2021.

As part of the funded package, these services are freely available to all responders.

The network and its fund are supported by UK aid from the UK government. The network is hosted by the Danish Refugee Council.

H2H Network Get Ready Fund

Events in 2020 have brought to light a need for adaptation and change in approaches crisis response. The shifting nature and global impact of Covid-19 set it apart from other crises. H2H technical skills and services can support responders to work effectively and efficiently. However, independent organizations providing humanitarian-to-humanitarian technical services are typically small, operating on tight budgets. It can be difficult to scale up and get to work in an emergency. The H2H Network's new Get Ready Fund aims to help members to offer their much-needed services quickly, often in new ways. **It will support members to develop processes, systems and services allowing them to adapt and respond faster and more effectively in 2021 and beyond.**

Who	What and where	Contact
CartONG and Groupe URD	Design and develop a ready-to-roll-out learning path "MEAL CHS - Quality and Accountability in practice" to be delivered online to field-based staff to help them implement Quality and Accountability commitments in crisis response.	Anna Lear alear@urd.org
Translators without Borders and CDAC Network	Building bridges in surge capacity for Community Engagement and Accountability (CEA) by developing SOPs and tools for humanitarian responders, locally based individuals and companies experienced in CEA to act as centres of community engagement excellence and coordination.	FanMan Tsang fanman.tsang@cdacnetwork.org Alyssa Boulares alyssa@translatorswithoutborders.org
Field Ready	'Humanitarian Making' for Everyone – a Mobile App. The humanitarian system's response to the Covid-19 pandemic has seen many aid agencies – international and local – start to make their own aid supplies such as PPE, or find new ways to support local stakeholders to produce these supplies. Field Ready will develop and publish its procedures and tools for the local production of appropriate quality aid supplies, based on its years of innovation and learning in this emerging space. The app will help everyone, anywhere to get ready for the next humanitarian emergency by helping them to make aid supplies – and to do it well.	Andrew Lamb andrew.lamb@fieldready.org
RedR	Rapid Onset Localization Team (ROLT): a team of experienced regional experts and trainers fully trained, able to engage in their region on short notice, with access to a knowledge base and equipped with a series of short training modules aimed at incorporating local actors into humanitarian response.	Jessica Aumann jess.aumann@redr.org.uk

H2H Network

Getting more to people in need

At H2H Network we work to improve the effectiveness and efficiency of humanitarian action.

We assess humanitarian crises to define the type of response needed. We then co-ordinate specific network members to quickly provide relevant services to the humanitarian crisis. The network's services are easily accessible to all responders.

We have responded to crises such as Covid-19, Cyclone Idai, Ebola in DRC and internal displacement in Burkina Faso.

H2H Network members are expert and independent.

Together we help the humanitarian sector evolve and cope with the changing scale and nature of humanitarian crises.

We address sector-wide issues including the collection, management and analysis of data, community engagement, security management, logistics, accountability, standards and localization.
