

This document presents an overview of safety, security and access incidents affecting aid delivery between January 2017 and June 2018. The report is based on incidents identified in open sources and reported by Aid in Danger partner agencies using the Security in Numbers Database (SiND). The focus is on countries where possible changing or emerging risks can be identified. See our [Regional Security Incident Analysis](#) for selective country overviews. The total number of reported incidents below reflects the willingness of agencies to share information. It is neither a complete count, nor representative.

This document is part of the Aid in Danger project. It is published by Insecurity Insight and funded by European Union Humanitarian Aid and USAID. It summarises selected findings from Aid in Danger partner agency incident reports. 26 partner agencies currently contribute confidential security data to the Security in Numbers Database (SiND). For this data, 23 partner agencies contributed security incidents. Data collection is ongoing and data may change as more information is made available. **Citation: Insecurity Insight. 2018.
