**PASSENGERS HEALTH SCREENING**

Enumerators stationed at Points of Entry conduct interviews with travellers and collect information about travellers’ points of departures, intended destinations, vulnerabilities, temperatures, reasons for moving and mode of transport. Additional questions concerning the COVID-19 pandemic were asked to determine if travellers exhibit any symptoms of COVID-19; if they were recently in contact with individuals exhibiting symptoms of COVID-19 or might have died from it.

Furthermore, the assessments serve to evaluate whether travellers sought medical care or took medication in the 24 hours preceding the interviews and to verify whether they are aware of whom to call in case of emergency. The results are shown in figures 5 to 8.
