

Context: The crisis currently affecting the Lake Chad Basin states results from a complex combination of factors, including conflict with Non-State Armed Groups, extreme poverty, underdevelopment and a changing climate, which together have triggered significant displacement of populations. As of 24 September 2020, Cameroon, Chad, Niger and Nigeria were hosting an estimated 5,104,347 affected individuals made up of Internally Displaced Persons (IDPs), Refugees (both in- and out-of-camp), Returnees (Former IDPs and Returnees from abroad) and Third Country Nationals (TCNs). 76 per cent of the affected population (representing 3,903,232 individuals) were located in Nigeria, while 11 per cent resided in Cameroon (559,699 individuals), 8 per cent in Chad (377,898 individuals) and 5 per cent in Niger (263,518 individuals).
