The Famine Early Warning Systems Network (FEWS NET) monitors trends in staple food prices in countries vulnerable to food insecurity. The Price Watch Annex I provides prices and price changes for key markets and staple foods monitored across FEWS NET countries and regions. The prices listed are final monthly average prices for September, 2013. The commodities with an asterisk (*) are the staples most often consumed by the poor in the indicated market. Additional commodities provided are important commodities consumed in the same areas or fuel prices that affect food prices. Final monthly average prices are used. The symbols (▶▲▼) depict the direction of price changes: the red upward-facing arrow denotes an increase of five percent or greater. The blue horizontal arrow denotes no change or changes that are smaller than 5 percent, and the green downward-facing arrow denotes price decreases that are five percent or greater. The three arrows respectively correspond to the percent change in prices this month compared to last month, last year, and the five-year average. The "-" symbol indicates that data are not available. The commodities with a reference (W) are wholesale prices. Otherwise, all reported prices are retail.

Sources of prices in West Africa: Système d'information sur les marchés agricoles (SIMA) Niger, Observatoire du marché agricole (OMA) Mali, SONAGESS Burkina Faso, Système d'information sur les marchés (SIM) du Sénégal and FEWS NET

Figure 12. Sorghum prices in East Africa, January 2009 – September 2013

The Famine Early Warning Systems Network (FEWS NET) monitors trends in staple food prices in countries vulnerable to food insecurity. The Price Watch Annex 2 provides prices trends for key markets and staple foods monitored across FEWS NET countries and regions. The commodities with a reference (W) are wholesale prices. Otherwise, all reported prices are retail.
