The number of displaced people living in ‘hard to reach’ areas in Cabo Delgado decreased from 31,000 in April to around 10,000 in May as a result of people fleeing conflict-affected areas—particularly Palma District. During the same period, the number of displaced people in partially accessible areas reduced from 126,000 to 86,000. As a result, by the end of May, there were 556,000 displaced people living in accessible areas, a sharp increase from 473,000 in April.

In May 2021, access by humanitarian organizations to Palma remained constrained, while access to the rest of Cabo Delgado Province was mostly unchanged. At least 25 security incidents were recorded during the month of May through the Province, mostly in Palma, Nangade and Macomia districts, according to Cabo Ligado, while there were at least three incidents of humanitarian being denied access to visit areas in Palma District by Government security forces. Humanitarians were also not able to travel north from Pemba by sea, given the continued ban on maritime movements imposed by the Government. As a result, humanitarians were unable to visit areas outside of the Afungi perimeter during the month.

 Civilians attempting to leave Palma continued to face challenges and were unable to access international protection. At least two attacks by non-state armed actors were reported against boats of displaced people attempting to flee Palma southwards towards Pemba, including one that reportedly killed seven people. The journey remains perilous and expensive, with prices reportedly starting at around 3,000 Mozambican Meticals (approximately US$48) per person. At the same time, people attempting to seek asylum in Tanzania were refouled to Mozambique, with almost 3,800 Mozambicans forcibly returned from Tanzania through Negomano border point in May, according to UNHCR. Despite the dangerous and difficult journeys that they endured, nearly 64,000 people had fled from Palma by the end of May.

**SECURITY INCIDENTS & DISPLACEMENT IN CABO DELGADO (Jan 2019 - May 2021)**

**ACCESS CONSTRAINTS / INSECURITY**

The administrative boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.

Sources: 1 - DTM - This figure reflects only people displaced inside of Cabo Delgado province. The overall number of people displaced in Cabo Delgado, Nassa, Nampula, Sofala and Zambezia provinces due to the conflict in Cabo Delgado is about 728,000 per the DTM Round 12 Report. 2 - IOM/DTM Emergency Tracking Tool. 3 - ACLED. 4 - WFP, OCHA, WHO. **Partially accessible areas: physical/logistical/administrative constraints may impact operations. Security environment difficult to predict; humanitarian operations will require security planning and negotiations. Hard-to-reach areas: security situation highly volatile; humanitarian operations will require detailed security planning and intensive negotiations.** **Accessable road: No known security incident, exceptional closure only; Partially accessible road: sporadic security incidents and/or road closure; Not accessible: road seldom used by civilian traffic due to major security incidents/concerns.**
