

# YEMEN

## HUMANITARIAN RESPONSE PLAN AT A GLANCE

Intense conflict since March 2015 has created a vast humanitarian crisis in Yemen. An estimated **18.8 million** people need some form of humanitarian or protection assistance, including **10.3 million** who are in acute need. High levels of food insecurity and malnutrition, large scale displacement, and declining health and social services are impacting the lives of millions. Collapsing social protection safety nets and a faltering economy require immediate action to avert a greater humanitarian catastrophe. National and international humanitarian partners aim to reach **12 million** people with direct assistance in 2017.

<b>STRATEGIC OBJECTIVE 1</b> Save lives, prioritizing the most vulnerable	<b>STRATEGIC OBJECTIVE 2</b> Integrate protection and gender-related concerns across the response	<b>STRATEGIC OBJECTIVE 3</b> Support maintenance of basic services and institutions	<b>STRATEGIC OBJECTIVE 4</b> Strengthen coordination, accountability and advocacy
