

Yemen has historically been dependent on commercial imports of food, fuel and medicines. All ports must remain open to meet Yemen's import requirements. Hudaydah and Saleef are in geographic proximity to over 70 per cent of people in need of humanitarian assistance.

This tracker monitors commercial imports to Hudaydah and Saleef ports via the United Nations Verification and Inspection Mechanism (UNVIM) and prices of food and fuel. The map below illustrates the final stages vessels progress through before reaching the port of destination.

SEPTEMBER UNVIM IMPORTS

NR - MONTHLY NATIONAL REQUIREMENTS

BB - PRE-BLOCKADE AVG July 2016 - Oct 2017

AB - POST-BLOCKADE AVG Nov 2017 - Sept 2018

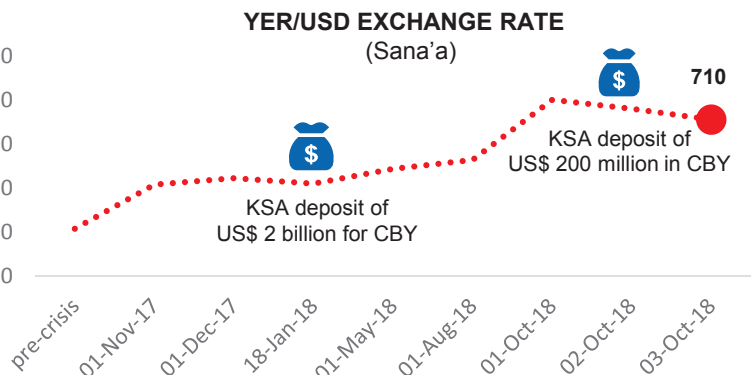

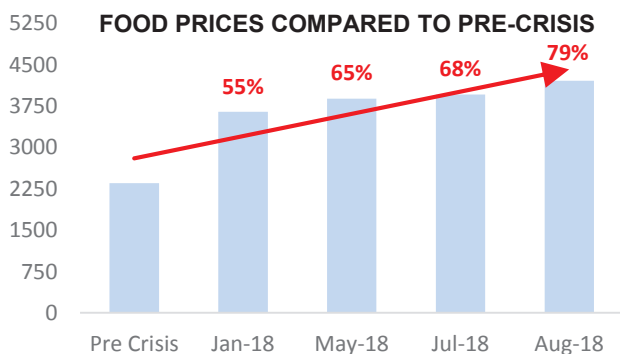

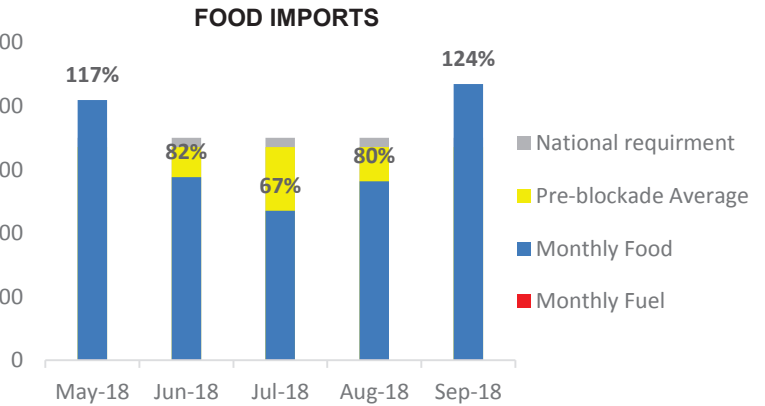

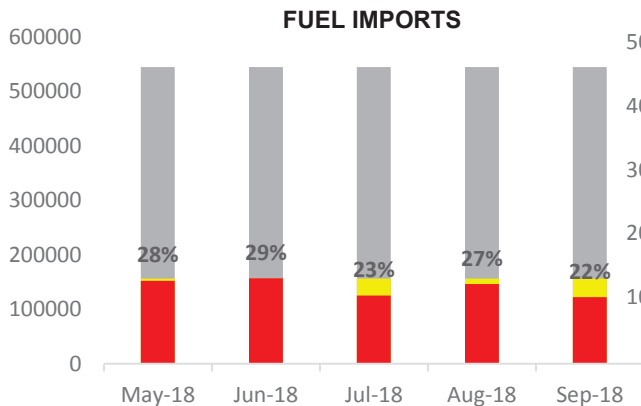

CLEARANCE REQUEST AVERAGES

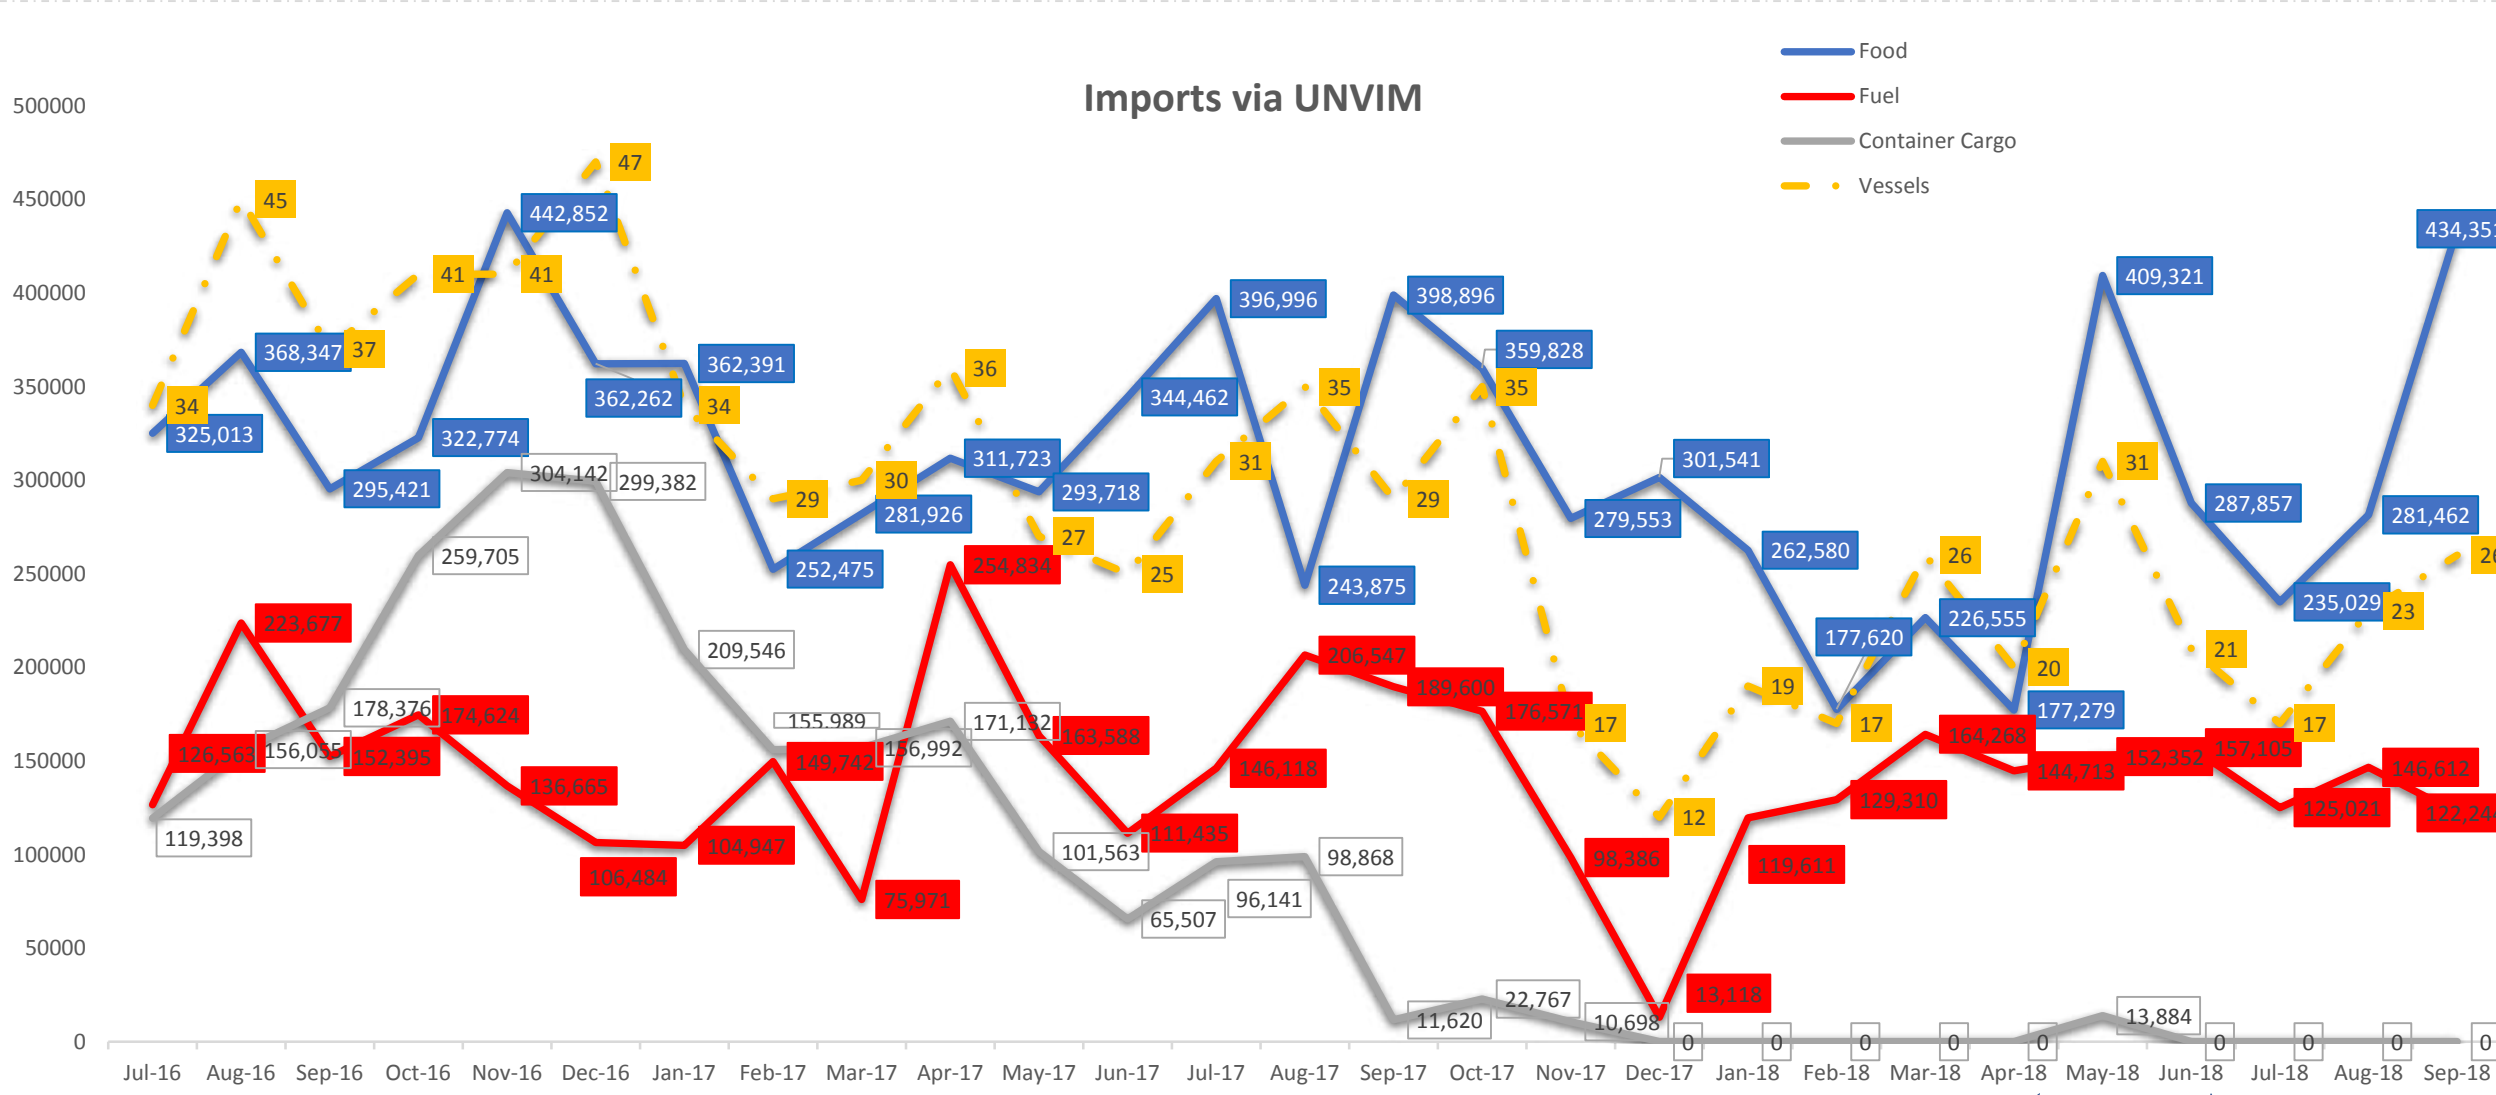

PERCENTAGE OF NATIONAL REQUIREMENTS PRE-BLOCKADE VS POST-BLOCKADE

PERCENTAGE OF NEEDS MET

In September 2018, food imports rose 54% while fuel imports decreased 17% from August levels. Food imports are meeting 80% of estimated food requirements since the Nov. 2017 blockade, on average each month, an increase of 5% from August given the significant volume imported in September, but still below the pre-blockade period when 96% of needs were met, on average. Fuel imports are meeting less than one-quarter of estimated national fuel requirements, with no change to the average since the blockade, but still below the pre-blockade period nearly one-third of needs were met, on average. Since the blockade, on average 21 vessels are berthing and discharging at Hudaydah and Saleef, a 40% reduction from the pre-blockade the average of 35 vessels. On average, there is a 35% decline in vessel clearance requests (26) compared to pre-blockade average of 40 vessels.
