Countries Affected by Cholera in the SADC Region

Country	No. Cholera Cases	No. Deaths	New Cases (since 25 March)	New Deaths (since 25 March)	CFR
Mozambique	7 408	55	234	1	0.7
Malawi	251	3	79	0	1.2
Zimbabwe	15	0	0	0	0

(According to WHO, with proper treatment, the case fatality rate should remain below one per cent)

Mozambique: New cholera cases trend

Cholera Situation

In Zimbabwe, no new cases have been reported since 25 March. The total number of confirmed cases remains at **15** with no deaths since the first confirmed case in late February 2015.

In Malawi, **79** new cholera cases were reported over the past week, which is higher than any week since cholera spread from Mozambique to Malawi in mid-February, and almost equal to the two previous weeks combined (**81** new cases). However, no new deaths have been reported. The most affected districts are Chikwawa (**49** new cases) and Nsanje (**27** new cases), with Blantyre District registering its first case. The total number of cases now stands at **251** with **3** deaths, giving a case fatality rate (CFR) of **1.2** per cent.

In Mozambique, the number of new cases continues to decrease from **727** (16-22 March) to **335** (22-29 March). However, Zambezia Province experienced a surge in new cases (**192**) between 25 and 29 March. Nationally, the total number of cases stand at **7,408** with **55** deaths, giving a case fatality rate of **0.7** per cent.
