Countries are asked to email their weekly reports to wpfjisurveillance@who.int

A red underlined entry indicates that the number of cases is above the threshold of 90% of historical values.

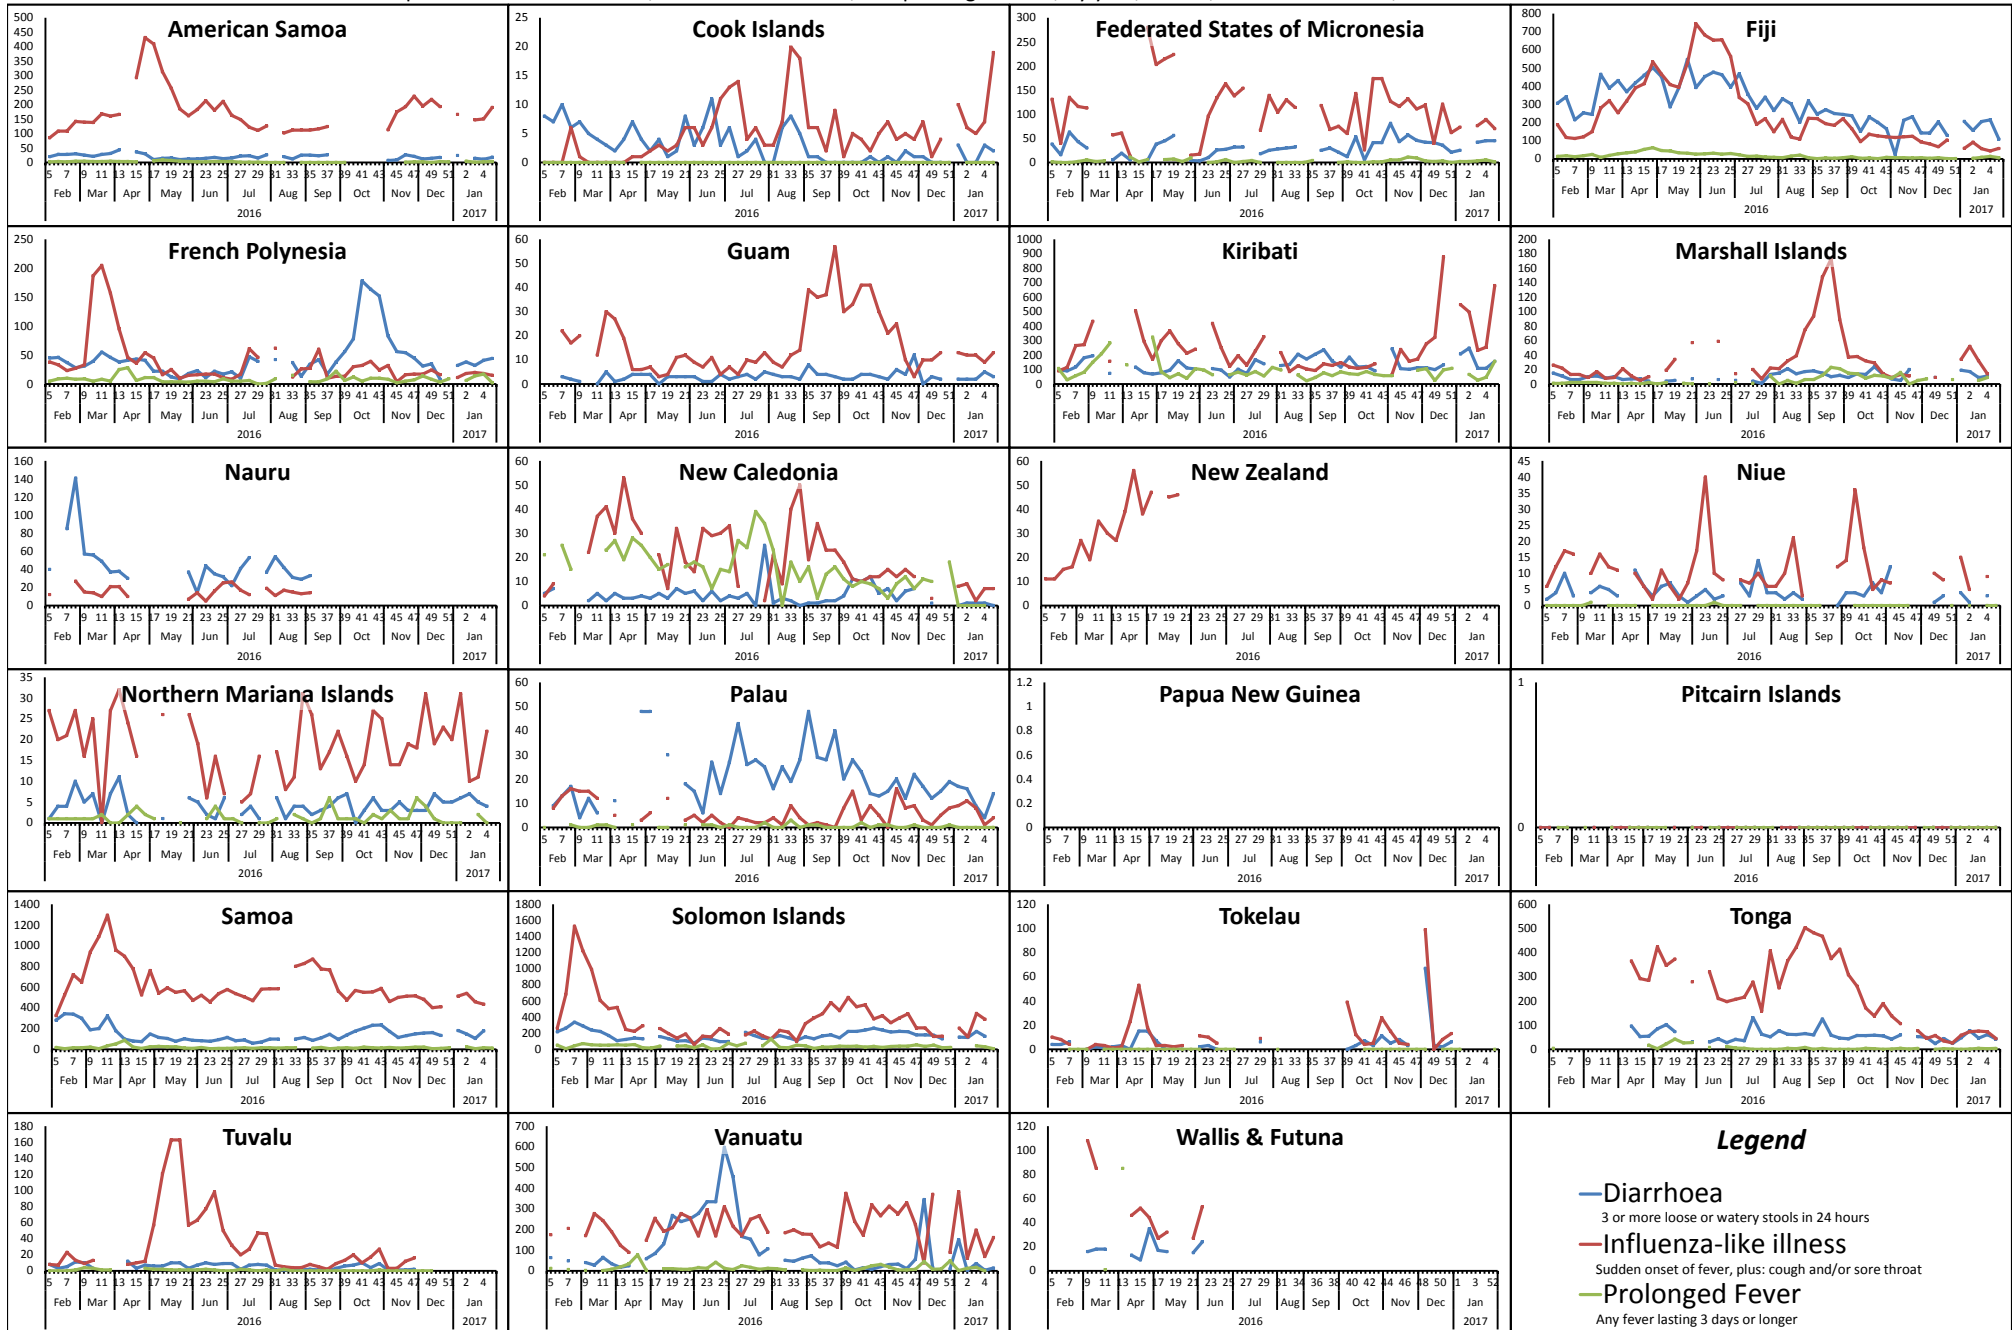

Pacific Syndromic Surveillance System

2017

week 4

ending 22 January 2017

Reported cases of diarrhoea, influenza-like illness, and prolonged fever; by year, month, and week number; for the last 53 weeks

Note: Numbers of reported cases are not comparable between countries. The purpose of the charts is to show trends over time within each country/area.
