CJTF-OIR Monthly Civilian Casualty Report

By CJTF-OIR PAO | Nov. 30, 2017

SOUTHWEST ASIA – The Coalition is constantly improving its visibility on and accountability for allegations. From October through early November, the Coalition Civilian Casualty Assessment Team traveled throughout the region and reviewed procedures and processes to increase efficiency of assessments. The team also trained approximately 30 members of Coalition components in the assessment process to ensure allegations of civilian casualties are addressed as quickly as possible. We continue to hold ourselves accountable for actions that may have caused unintentional injury or death to civilians.

The Coalition and our partner forces in Iraq and Syria take extraordinary care to protect the civilian population. We take all reports of civilian casualties seriously and assess all reports as thoroughly as possible. Investigations include interviewing witnesses and examining the site where possible, interviewing pilots and other personnel involved in the targeting process, reviewing strike and surveillance video, and analyzing information provided by government agencies, non-governmental reports, partner forces, and traditional and social media. We consider new information when it becomes available to ensure a thorough and continuous review process. At times, we have re-opened investigations in light of new evidence.

Since Coalition operations to free the people of Syria and Iraq from ISIS control began in 2014, Coalition partners have returned more than 96% of ISIS-held land to local populations and governance, liberating approximately 7.5 million Syrians and Iraqis.

Despite significant successes against ISIS, combat has taken a toll on populations suffering under the militant extremists, to include the brave Iraqis and Syrians engaged in direct combat with the terrorist organization that has killed countless innocent civilians during its brutal three-year occupation.

The Coalition is extremely concerned about explosive remnants of war that still pose a threat to returning civilians in areas cleared of Daesh. The United States has invested $333 million toward the clearance and safe disposal of landmines, unexploded ordnance (UXO), and securing excess conventional weapons and munitions in Iraq since 2003. This includes the removal of nearly 40,000 kilograms of explosives since April 2016 from liberated areas in Iraq, according to the State Department’s Office of Weapons Removal and Abatement.

The Coalition also remains committed to training partner forces in critical capabilities such as bomb disposal units that efficiently disarm dangerous traps left by ISIS in order to provide a safe and secure environment for their people. The Coalition and our partners have taken significant steps to protect innocent lives, and we will continue to do so.

In the month of October, CJTF-OIR carried over 519 open reports of possible civilian casualties from previous months and received 240 new reports resulting from Coalition strikes (artillery or air) in support of partner force operations to defeat ISIS in Iraq and Syria.
During this period, the Coalition completed the assessment of 64 reports: 55 were assessed to be non-credible, four were assessed to be duplicates of previous reports, and five were assessed to be credible, resulting in 15 unintentional civilian deaths. To date, based on information available, CJTF-OIR assesses at least 801 civilians have been unintentionally killed by Coalition strikes since the start of Operation Inherent Resolve. A total of 695 reports are still open.

The Coalition conducted a total of 28,198 strikes that included 56,976 separate engagements between August 2014 and October 2017. During this period, the total number of reports of possible civilian casualties was 1,790. The total number of credible reports of civilian casualties during this time period was 199. The percent of engagements that resulted in a report of possible civilian casualties was 3.14%. The percent of engagements that resulted in a credible report of civilian casualties was .35%.

After a thorough review of the facts and circumstances of each civilian casualty report, CJTF-OIR assessed the following 55 reports as non-credible: at this time there is insufficient information to assess that, more likely than not, a Coalition strike resulted in civilian casualties.

2. April 4, 2017, near Al Qaim, Iraq, via Airwars report. This report was determined to be a duplicate of credible report number 13 in the June 2, 2017 CJTF-OIR Civilian Casualty Press Release. It was assessed one civilian was unintentionally killed in that report.
3. June 25, 2017, near Ar Raqqah, Syria, via Airwars report. This report was determined to be a duplicate of credible report number six on the June 2, 2017 CJTF-OIR Civilian Casualty Press Release. During a Coalition strike that engaged an ISIS tactical unit and destroyed a vehicle, it was assessed that two civilians were unintentionally injured.
4. Oct. 14, 2017, near Al Qaim, Iraq via self-report. This report was determined to be a duplicate of report that is still being assessed.

Although the Coalition takes extraordinary efforts to strike military targets in a manner that minimizes the risk of civilian casualties, in some incidents casualties are unavoidable. 5 reports were assessed to be credible resulting in the unintentional death of 15 civilians.

A credible assessment means it is more likely than not a Coalition strike resulted in a civilian casualty. In each of the incidents below, the investigation assessed that although all feasible precautions were taken and the decision to strike complied with the law of armed conflict, unintended civilian casualties unfortunately occurred.

1. Oct. 9, 2016, near Deir ez-Zoor, Syria, via web report. During a Coalition strike that engaged a Daesh tactical unit and destroyed Daesh fuel trucks, it was assessed that one civilian was unintentionally killed.
