(Assuming 6 person household)

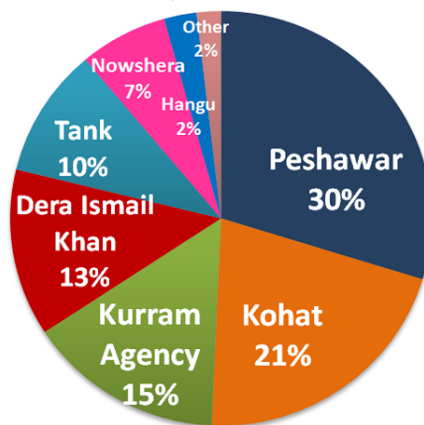

## Beneficiaries Reached through Protection Cluster Activities

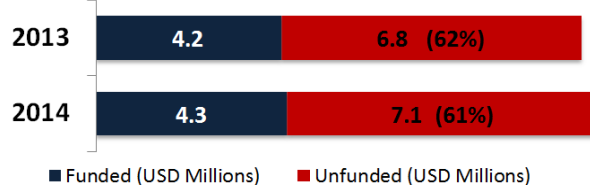

## Key Actors (% of beneficiaries)

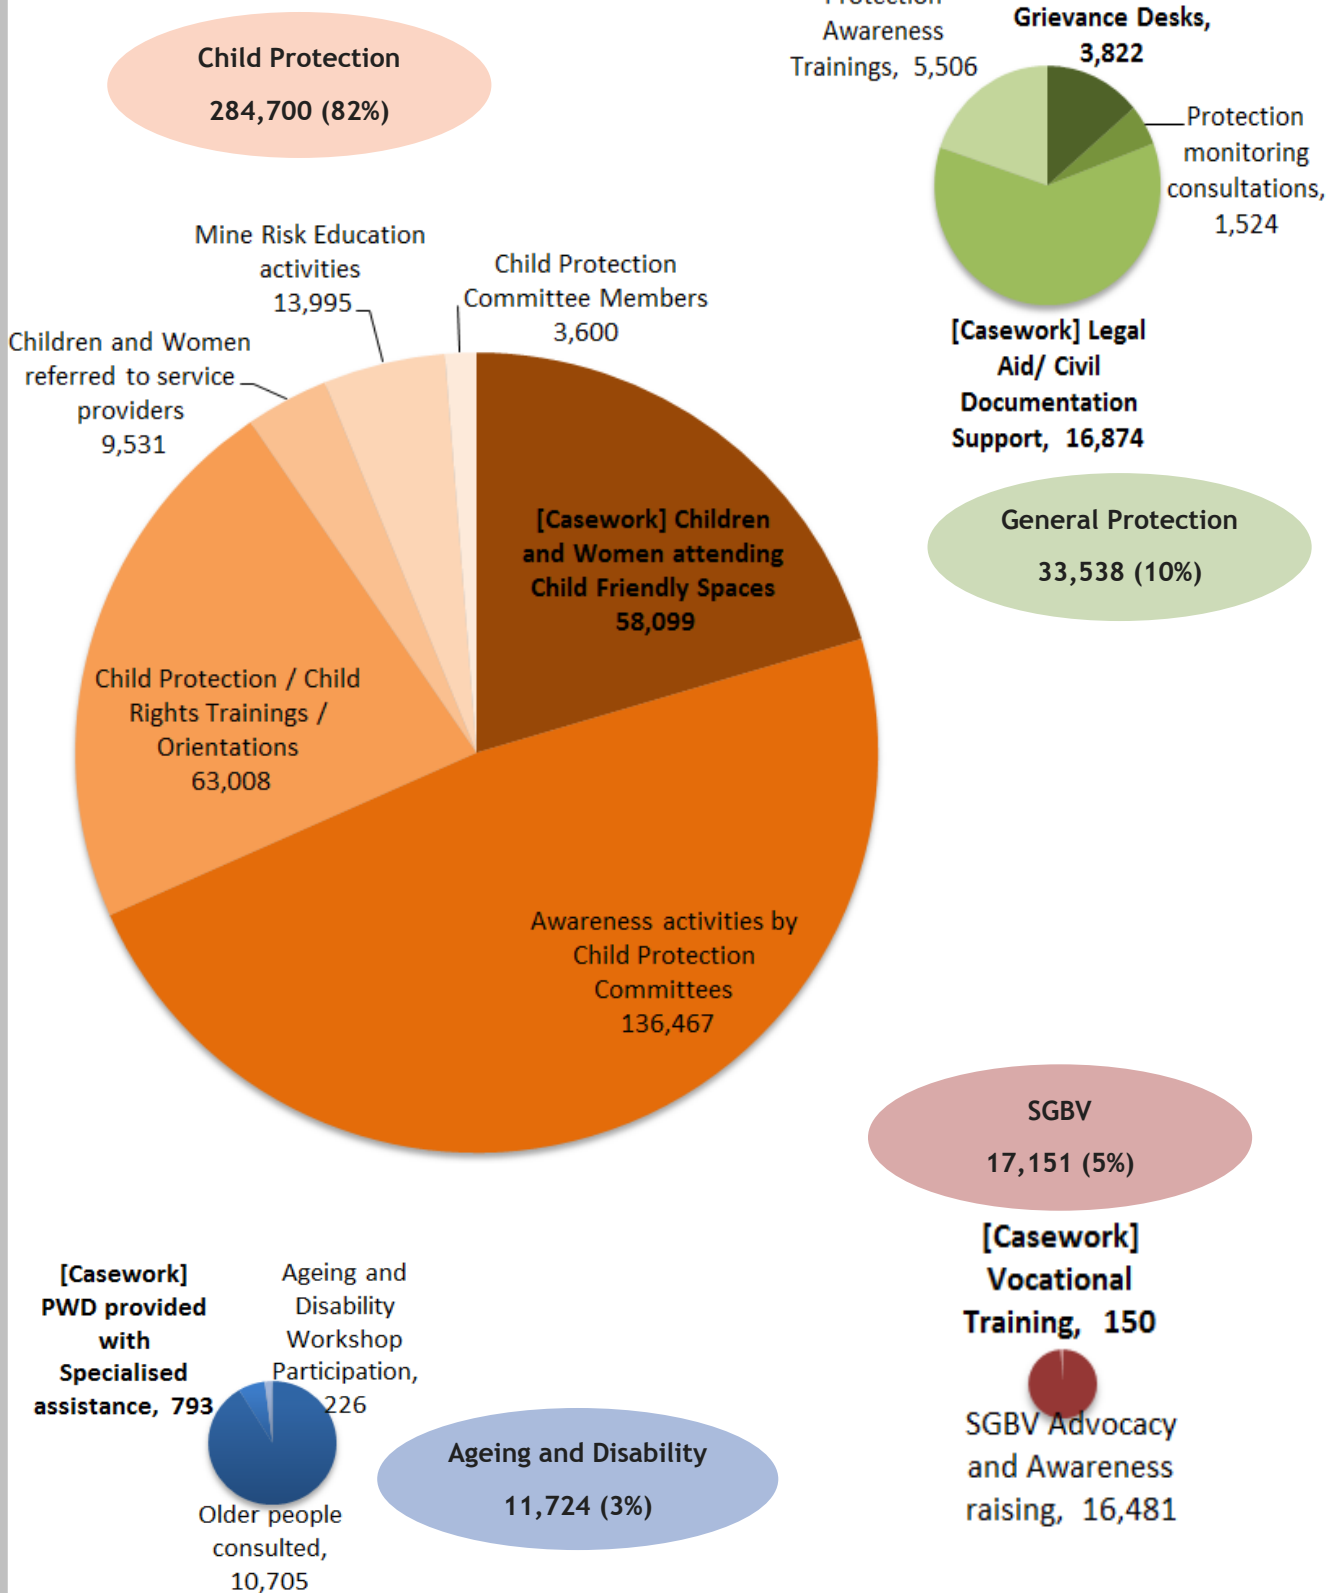

## Activity Locations

## Cluster Funding

# Protection Activities on going in 2014 (numbers of individuals)

Registration of conflict-affected IDPs and regular updates of this data is conducted by UNHCR and its partners and these activities are not included in summaries of activities or beneficiaries reached as most IDPs are registered. For reference, during the reporting period data of 495,672 IDPs were updated.

The IOM Mass Information activities are only included in the same summary views. This is because, for these types of activities, the number of beneficiaries reached is also very large and currently totals approximately 343,127.
