Qatar Charity implements 11 major development projects in Indonesia

Qatar Charity has implemented 11 major development projects in Indonesia within two years, at total cost of more than 13 million Qatari riyals.

The projects were executed in the fields of education, health and social welfare came to support thousands of orphans and low-income families, and will be inaugurated soon.

The implementation of the projects began in 2017 and ended in 2019. These projects will contribute significantly to the development of communities and provide the necessary services in the areas of health, education and social welfare.

The projects implemented in various Indonesian regions, included centers for the care and rehabilitation of orphans in Banten, 20 social housing units as well as multiple service center in Subang, and a residential complex with 25 houses in East Lombok, in addition to building many hospitals and clinics across the country.

Since its inception in Indonesia in 2006, Qatar Charity has been active in channeling humanitarian assistance to those in need in the country. It has provided urgent relief aid to tsunami victims in 2007, and urgent assistance to those affected by the West Sumatra earthquake in 2009.

Besides, it delivered assistance to Rohingya refugees in 2009 and 2015, and assisted the Garut flood victims in 20016. It has also built 126 housing units, including six schools and other facilities. Furthermore, Qatar Charity has provided aid to the victims of the 2018 Lombok earthquake and constructed social housing for the poor in Aceh.
