In 2013 ReliefWeb continued to implement its ‘Strategy and Vision’ with the aim of becoming the humanitarian community’s ‘one stop shop’ for information. ReliefWeb is a service provided by OCHA that assists humanitarians to easily find reports, evaluations, analyses, maps, infographics, jobs announcements and training events from over 3,500 sources worldwide. ReliefWeb collected and published 43,924 humanitarian updates in 2013, covering acute crises in Syria, Central African Republic and South Sudan as well as natural disasters such as Typhoons Haiyan and Wutip.

**Global reach**
- 11.85 million visits
- 5 million unique visitors

**Topics pages**
Topics pages filter ReliefWeb’s content by theme or hazard type and provide easy access to global in-depth material, as well as the latest social media updates. Sixteen topic pages were launched in 2013.

**ReliefWeb mobile**
Designed to make ReliefWeb easier to read on small screens, ReliefWeb Mobile uses approximately 25% of the bandwidth when compared with the full site, allowing it to operate on low bandwidth networks. This feature is particularly helpful for field-based users.

**APIs (application programming interface)**
ReliefWeb’s APIs enable developers to create online applications and functionality using ReliefWeb’s content. Users such as OCHA have replaced existing RSS feeds with dynamic APIs ensuring a more dynamic and reliable way of displaying content.

**Crisis and disaster monitoring**
- 115 natural disasters covered
- 43,924 updates published

**Community services**
- 27,317 Jobs posted from 2,733 employers
- 2,534 Training events posted from 396 organizations

**Technology**
Users accessed ReliefWeb via
- Desktop: 88.5%
- Mobile: 7.35%
- Tablet: 3.15%

**Social media**
- Twitter: 30,663 followers ↑ 43%
- Facebook: 21,588 likes ↑ 38%
- LinkedIn: 6,525 group members
- Google+: page launched Nov 2013
