ReliefWeb is an award-winning website that provides nonstop coverage of the humanitarian aspects of disasters, conflict and crises for the international humanitarian community. Its editorial teams sift through thousands of sources daily for the most relevant humanitarian news and analysis, maps and graphics, opinion pieces and blogs. ReliefWeb also offers a job and training marketplace and serves as a portal to partner sites. Having adopted the latest web technology in 2011, ReliefWeb is focused on further improving its website, launching a new mobile service and integrating new features and tools to better support humanitarian professionals worldwide.
