The Sudan Humanitarian Fund (SHF) prioritizes life-saving humanitarian interventions by dedicating nearly 60 percent of its resources to emergency response activities. Funding preparedness, by embedding emergency contingency budget lines in ongoing projects, pre-approving proposals for possible flood emergencies and piloting prepositioning of emergency stock, allowed for flexible and timely response to all large emergencies this year.

The first Standard Allocation remained modest in size, due to uncertainty in funding in the first half of the year, but ambitious in its strategic objectives. Underfunded priorities: education, child protection, GBV and general protection interventions - received almost 50 percent of the Standard Allocation funding, making the SHF one of the largest funding sources for protection interventions in Sudan. Integrated response was encouraged with most projects covering two or more sectors offering relief to people in the most affected localities. National NGO’s received more than a third of the funding, boosting the localization agenda.

Of the targeted, 69K people live with a disability (3.5%).
SUDAN HUMANITARIAN FUND - Quarterly update

STRATEGIC PRIORITIES

Expected achievements

- 20K School kits provided to children
- 814K People accessing health care
- 166 Community based protection networks created / supported
- 145K People reached with protection community awareness sessions
- 2K People consulted before design of SHF funded projects
- 3K People consulted during project implementation

Allocation by sector

- Protection: 7.9
- Water, Sanitation & Hygiene: 7.3
- Health: 5.5
- Emergency Shelter & Non-food Items: 4.3
- Nutrition: 3
- Education: 2.8
- Food Security & Livelihoods: 1.3
- Coordination & Common Services: 0.8

Underfunded priorities

- $523K Child Protection
  - 7K People
  - 2 Projects
- $1.9M General Protection
  - 67K People
  - 4 Projects
- $2.8M Education
  - 125K People
  - 10 Projects
- $5.5M Protection-GBV
  - 281K People
  - 17 Projects

Allocations by partner type

- 25 Partners
- 41 Projects

- $6.2M National NGOs
  - 5 Partners
  - 19 Projects
- $8.1M United Nations
  - 6 Partners
  - 6 Projects
- $18.8M International NGOs
  - 14 Partners
  - 25 Projects

Allocations by modality

- $0.8M Common Services
- $4.5M ERRM
- $7.1M Prepositioning of stock
- $1.4M Reserve for Emergency projects

Localization

- $1M Allocations to Agencies
- $6.2M Direct allocations to NGOs
- $1.5M Indirect allocation to NGOs
- $17.2M Allocations to INGO’s

Capacity strengthening

- 4 Training sessions
- 367 People trained
- 96 NGO staff trained

Of the targeted, 69K people live with a disability (3.5%).

Amounts do not include prepositioning of stock.

Virtual training enabled a larger number of participants than face to face training. Possibility of double counting exists because some staff may have attended more than one session.

ALLOCATION STRATEGIC STATEMENTS

Timeline

Intercommunal conflict, West Darfur

2021

Jan

$1M

JANUARY ALLOCATION

The grant responded to new humanitarian needs following the intercommunal conflict. Three IDP camps were burnt down. More than 90,000 people were displaced to Geneina town and surrounding localities or fled to Chad. The grant supported emergency health and WASH services; non-food items; and community-based protection, SGBV prevention, and child protection case management targeting 63,893 IDPs and host communities.

Mar

$115K

MARCH ALLOCATION

A grant was allocated to FAO to support vaccination of livestock in newly accessible areas. Together with the vaccination programme, locust awareness sessions were held.

Jun

$332K

APRIL ALLOCATION

Following a sharp increase of COVID-19 cases in Khartoum, a grant for the continuation of services at the intensive care unit (ICU) and for oxygen-dependent patients at the Khartoum COVID 19 Treatment and Isolation Centre was approved. The center is attending to more than 100 patients daily.

Oct

$300K

MAY ALLOCATION

Following a first successful countrywide multi-needs assessment supported by the SHF in 2020, this grant to IOM ensured that humanitarian interventions remain evidence-based and eliminate information gaps. The collected data will support the elaboration of the HNO and HRP of 2022.

Jul

$23.5M

MAY ALLOCATION

Fourteen states with the most severe humanitarian needs to receive $19 million through 32 projects. Some $7 million is allocated to National NGO’s (37%). Underfunded priorities (general protection, GBV, child protection and education sectors) and the remaining sectors to receive an equal amount of $9 million each, while one million is allocated to livelihood activities. The protection activities includes safe spaces for women and girls in underserved areas, upgrades services for GBV victims, promote PSEA, and supports unaccompanied and separated children and child-headed households, by providing mental health services. Projects worth $2.1 million (11% of total) target refugees. Each state is covered by the ERRM for a total value of $4.5 million.

Aug

$412K

JUNE ALLOCATION

In anticipation of the annual floods season and associated disease outbreaks, and later the likelihood of intercommunal violence, the allocation funds the prepositioning of life-saving supplies for new or deteriorating emergencies. Prepositioning reproductive health items and dignity kits; and including dignity items in the family hygiene kits supports gender and GBV response. Stock availability strengthens the capacity of partners to respond rapidly and scale-up.

Sep

$175K
