From 1 January 2021 to 23 November 2021, 736,098 individuals fled their homes due to conflict. A total of 33 out of 34 provinces had recorded some level of forced displacement. Constrained humanitarian access hinders assessments, thus preventing verification of the full extent of displacement and undermining the provision of assistance and services. Displacement affects all individuals differently with needs, vulnerabilities and protection risks evolving over time due to exhaustion of coping mechanisms and only basic emergency assistance provided following initial displacement. Inadequate shelter, food insecurity, insufficient access to sanitation and health facilities, as well as a lack of protection, often result in precarious living conditions that jeopardise the well-being and dignity of affected families.

**Key figures**
- People displaced: 736,098
- Families displaced: 109,882
- Number of adults: 21%
- Number of children: 59%

**Locations with displacements**
- 33 out of 34 provinces
- 234 out of 401 districts

**Locations hosting IDPs**
- 34 out of 34 provinces
- 99 out of 401 districts

**Organisations involved in assessments**
- 50 organisations

**Monthly trends (2012 to 2017)**

**Notes:** Newly displaced population due to conflict (as of 27 Feb 2022) compiled by OCHA sub offices based on inter-agency assessments. Assessments are ongoing in the field and these numbers are expected to change as new information becomes available. IDPs data for 2015 and earlier from IOM Task Force / UNHCR Population Movement Tracking System (PMT).
