Heavy rain and flooding since early June have affected over 99,000 people and destroyed over 19,000 houses in many parts of Sudan, according to the Government of Sudan and partners. The most affected states are White Nile, South Darfur, North Kordofan, At Gezira, Sennar, West Darfur and Kassala.

The Government of Sudan is leading and coordinating the response, and has reactivated the Flood Task Force (FTF) at federal and state levels. The FTF includes representatives from line ministries, the Humanitarian Aid Commission (HAC), Civil Defence Authority, the Sudanese Red Crescent Society (SRCS), United Nations agencies and INGOs.
