

The number of people in need of humanitarian assistance has risen by **half a million** to **6.6** million people in the period between November 2013 and October 2014. These **6.6** million people in need consist of **3.1** million IDPs, **0.7** million refugees, and asylum seekers, **1.2** million malnourished children aged under five and **1.6** million people who are food insecure. Needs are greatest in the Darfur region, Southern Sudan (South Kordofan, West Kordofan and Blue Nile States) and Eastern Sudan. While humanitarian needs have grown, the capacity of humanitarian organisations in Sudan to respond to these needs has reduced. This has resulted in less coverage in areas where humanitarian needs are high. The number of aid workers in Darfur has fallen from **6,850** in November 2013 to **5,440** in August 2014. At the start of 2009 there were **17,700** aid workers in Darfur.
