OVERVIEW

• Between January to April 2020, an estimated 5.5 million people were reached at least once with some form of humanitarian assistance. On average, 3.79 million people received some form of humanitarian assistance on a monthly basis.
• Around forty two per cent (42%) of this response was delivered to areas of most acute need (which host an estimated 42% of people in need); 26% of the response was delivered to areas with major needs (which host an estimated 32% of people in need); and 32% of the response was delivered to other areas and include life-saving activities (e.g.: vaccination campaigns, nutrition screening and water provision) to reduce excess morbidity and mortality.

SECTOR OVERVIEW

- Between January to April 2019, 1.18 million protection interventions were implemented with 64% of the protection response delivered to areas of most acute need.
- Around 3.25 million people in average received food assistance on a monthly basis with 55% of the response in areas of most acute need and a further 39% in areas of major needs.
- 78% of nutrition assistance, 76% of education and 42% of the WASH response were provided to areas of most acute need.
- There were over 4.07 million medical procedures during the reporting period, with 22% of the response in areas of most acute need and 72% in areas of major needs. Health facilities in areas, such as in governate capitals, also provide key health services to people from high severity need areas. The same applies for protection facilities.

Notes:
- FSA assistance includes food baskets, bread/wheat flour, cash/vouchers lifesaving and emergency food rations. As well as agricultural inputs, small-scale food production, livestock asset restoration, animal health, income generating activities, provision of services and rehabilitation of relevant infrastructure.
- Protection figures represent the total number of distinct protection interventions conducted through the sector’s prevention, response and capacity building activities. The overall protection interventions in this product also include achievements in Child Protection (CP), Gender-Based Violence (GBV) and Mine Action (MA).
- For health, given the challenges the sector faces in measuring individual beneficiaries, the indicator for the number of medical procedures is used as an aggregate indicator that serves as a proxy measure for overall progress in health service delivery in Syria (medical procedures are an aggregate indicator that includes outpatient consultations at primary health care units and hospitals, number of referral cases, mental health consultations, trauma cases, persons with disabilities supported and deliveries by a skilled birth attendant).
