

Monthly Humanitarian Situation Report, UNICEF Niger January – February 2013

Highlights

- 1) As of 18 February 2013, figures released by the UNHCR Level 2 registration indicate 33,776 officially recorded refugees in camps, spontaneous sites and urban areas in Niger. This number does not include the 17,000 refugees in Agando and Chinewaren soon to be relocated from Tillia to Tahoua. Thus, so far maintaining the number of refugees at just over 50,000. Since early February, UNHCR, in collaboration with IOM, is carrying out a logistics-intensive operation to relocate refugees from Banibangou to safer sites further away from the border.
- 2) As of 10 February, 28,840 children under-five have been admitted to therapeutic feeding centres for severe acute malnutrition (SAM), while another 41,229 have been receiving treatment for moderate acute malnutrition (MAM).
- 3) On 18 February, the CAP 2013 was officially launched in Ouallam by the Prime Minister and the Humanitarian Coordinator for Niger, in the presence of the humanitarian community and government officials. The total amount requested is **US\$354,414,493** to support approximately 3 million people at risk of food insecurity across the country.
- 4) As part of the continued response to the overflowing of the Komadougou River, which caused much damage in the Diffa region, UNICEF is still monitoring the situation in the 11 spontaneous sites hosting displaced people.
- 5) The relocation of some 750 households from four districts (Karadjé, Lamordé, Kirkissoye and Nogaré) affected by floods in Niamey to the new site of Seno has been completed. To ensure education for relocated children, UNICEF provided several tents to create 6 classrooms, offered 10 education kits and will cover additional educational needs.
- 6) On 15 February, the 2013 National Support Plan for vulnerable populations has been adopted for approximately **US\$275 million**. It is the primary tool for planning and programming interventions related to the prevention and management of natural disasters and food crises. It is elaborated annually after the post-harvest assessments, following a participatory and inclusive process.
- 7) Within the framework of Mali+3, UNICEF Niger provided ACF and MSF Spain, in support of their interventions in Mali, 30 box of Aquatabs and cold chain equipment, respectively.

Children attending classes in one of the 30 semi-permanent classrooms built by UNICEF in Abala camp.

Situation Overview & Humanitarian Needs

- On 15 February, the National Mechanism for the Prevention and Management of Disasters and Food Crises (DNPGCCA) in collaboration with partners, UN Agencies and donors validated the 2013 National Support Plan. The Plan is the primary tool for planning and programming interventions related to the prevention and management of natural disasters and food crises. It is elaborated annually after the post-harvest assessments, following a participatory and inclusive process.
- In February 2013, within the framework of the Mali+3 contingency plan, UNICEF Niger shared with UNICEF WCARO its contingency stock (to support 100,000 persons), its emergency communication plan, a funding update to cover immediate needs and its integrated response plan to ensure a regional coordinated response with Mali, Burkina Faso and Mauritania.
- Within the framework of the Letter of Understanding (LoU) between UNICEF and UNHCR, Oxfam-GB, Plan International and Catholic Relief Services implemented the following education activities in the camps of Abala, Mangaizé and Tabareybarey (Ayorou), as well as at the spontaneous sites of Kizamou, Miel and Tiguizéfane.
 - *In Abala*, as of 15 February, Oxfam-GB delivered 30 classrooms built to ensure education for 1,667 primary school children (835 girls) in good conditions.
 - *In Mangaizé, Ayorou and the spontaneous sites*, pending the construction of the new semi-permanent classes, 1,904 children (771 in Mangaize, 837 in Ayorou and 296 in Miel, Kizamou and Tiguizefane) are attending classes in temporary structures.
- On 18 February, UNHCR¹ level 2 registration figures were released, with the following breakdown per camp and spontaneous sites: Tabareybarey 5,820 refugees; Abala 11,126; Mangaize 5,621 ; Baninbangou site 1,158 in the process of being relocated to Mangaize for better safety; Miel, Kizamou, Tiguizefan, Sinegodar sites 2,753. The relocation of approximately 17,000 refugees from Agando and Chinewaren spontaneous sites in Tillia, to Intikane in Tahoua region is being planned. Once relocated, UNHCR will carry out a level 2 registration for this caseload.
- Continuous support in education, health and WASH is being provided to flood-affected families in Diffa. In January, UNICEF carried out a follow-up mission to monitor humanitarian assistance provided at the onset of the floods. In February, an in-depth assessment of educational needs was carried out with local authorities to improve access to education for children who have been relocated to 11 sites. UNICEF will recruit a Programme Assistant for 6 months to ensure proper implementation and monitoring of activities in this region.
- In January, the permanent relocation of 750 households from five flood-prone residential areas of Niamey to the Seno site has been completed. However, due to lack of funding, needs in the WASH sector have not yet been fully covered. WASH Cluster partners are actively engaged to secure funding.
- Moreover, UNICEF has allocated US\$200,000 for the construction of 12 additional semi-permanent classrooms, and US\$12,000 for the provision of school equipment.

Estimated Affected Population 2013 (Source : Résultats des Rencontres Techniques du DNPGCCA sur l'évaluation de la situation alimentaire, nutritionnelle et pastorale - Novembre 2012)			
	Total	Male	Female
Total Affected Population	3,115,148	1,526,423	1,588,725
Children Affected (Under 18) as a proportion of Total Affected Population	1,718,634	870,061	905,573
Children 6 to 59 months	508,471	249,151	259,320
Children 6 to 23 months	334,520	163,915	170,605
Pregnant women treated for MAM	47,087	--	47,087
Estimated annual caseload of SAM (severe acute malnutrition in under-5 children)	290,00	155,500	134,500
Estimated annual caseload of MAM (moderate acute malnutrition in under-5 children)	556,894	298,867	258,027
Total Displaced Population (refugees and returnees from Mali)	100,000 ²	49,000	51,000

Inter-Agency Collaboration and Partnerships

- In January and February, the inter-cluster elaborated its 2013 workplan and follow-up matrix for CAP projects, and reviewed activities to be implemented by each Cluster based on their 2013 Plan of Action.
- OCHA also announced that from 24 February to 7 March, an IASC Task Team on Funding for Preparedness will visit Niger. The objective of this two-phased study are to analyse funding streams to enhance emergency preparedness at the global, regional and national levels. As part of the Phase Two study, one of the specific objectives of the Team will be to outline, review and further elaborate the links between preparedness funding and the broader, developing resilience agenda. Under the leadership of OCHA, the Team will meet with humanitarian partners, UN Agencies and government counterparts.
- Within this overall coordination and partnership framework, UNICEF continues to maintain a day-to-day collaboration with WFP and FAO on nutrition and food security, with WHO on health-related issues, with UNHCR on refugee issues, with UNDP on early recovery and resilience and with OCHA on coordination and information management. Cooperation agreements with NGOs, an essential part of the delivery of UNICEF's humanitarian assistance in Niger, complements what is directly executed with government partners.
- UNHCR, Oxfam-GB, Plan, CRS, the Ministry of Education and UNICEF are working in close collaboration to ensure education for refugee children in the camps and spontaneous sites. On 15 February, the semi-permanent schools officially opened in Abala in the presence of all stakeholders.
- UN Agencies, NGOs and local authorities are jointly advocating to raise funds for emergency activities and interventions. To this end, on 15 February, UNHCR, WFP, UNICEF and Plan (Camp Manager) accompanied a delegation from the Spanish Cooperation for Development (AECID) on their visit to Tabareybarey camp in Ayorou.

²Source: UNHCR – <http://data.unhcr.org/MaliSituation> - For planning purposes, the figure of 100,000 (50,000 refugees already in country + an additional expected influx of 50,000) was used by partners for the emergency response.

Programme response

Nutrition

Estimated # / % coverage	UNICEF & operational partners			Sector / Cluster		
	UNICEF Annual Target	Cumulative results (#)	% of Target Achieved	Cluster Annual Target	Cumulative results (#)	% of Target Achieved
Children <5 with Severe Acute Malnutrition admitted to therapeutic care	290,000	28,840	10%	290,000	28,840	10%
All children <5 with Severe Acute Malnutrition discharged	290,000	27,110	94%	290,000	27,110	94%
Children <5 with Severe Acute Malnutrition discharged recovered	217,636	23,937	83%	217,636	23,937	83%
Number of health centres with SAM treatment	NA	898	NA	NA	898	NA
Children <5 with Severe Acute Malnutrition with complications admitted to therapeutic care	47,527	3,399	7%	47,527	3,399	7%
List of UNICEF Operational Partners: MoH, WHO, WFP, Save the Children, MSF (Belgium, Switzerland, Spain), CONCERN, World Vision, ACH, COOPI, CRF, Alima/Befen, Forsani, Help						

UNICEF and Partners' Programming

- Since 1 January 2013, a cumulative number of 28,840³ under-five children have been admitted for SAM treatment which represents 10% of the expected annual caseload. Over the same period, 94% of children with SAM have been discharged and 83% recovered. Similarly, 41,229⁴ cases of MAM have been treated in 1,145 supplementary feeding centres (CRENAM).
- In partnership with the NGOs ACTED, AKARASS, Islamic Relief and Plan Niger, UNICEF is implementing the joint strategy elaborated in collaboration with UNHCR and WFP, aiming at preventing malnutrition and ensuring the treatment of malnourished children in refugee camps. In this regard, UNICEF and its partners are elaborating an action plan to provide a comprehensive nutrition emergency response in the refugee camps.
- Currently, psychosocial activities are being implemented by the NGO Help only in child-friendly spaces. The Protection Section extended its current partnership with Help to provide such support to malnourished children in the refugee camps until June 2013 for a total amount of US\$200,000.
- To enhance the 2013 nutritional emergency response, the Nutrition Cluster elaborated a work plan including among other regular activities: the organization of an assessment of the 2012 nutrition crisis response, the finalization of the malnutrition prevention strategy for Niger, the release of a quarterly report analyzing the nutritional situation, and the creation of a Cluster website.
- While ensuring an appropriate emergency response, UNICEF and its partners are also focusing on strengthening resilience of vulnerable groups. Improving nutrition for children in the first 1,000-day window can help ensure a child can live a healthy and productive life. Investing in better nutrition in the 1,000-day window can also help families, communities and countries break the cycle of poverty.

WASH

WASH in Nutrition

Estimated # / % coverage	UNICEF & operational partners			Sector / Cluster		
	UNICEF Target	Cumulative results (#)	% of Target Achieved	Cluster Target	Cumulative results (#)	% of Target Achieved
Nutritional centres delivering the WASH minimum package	469 (1)	96	20.46%	898 (2)	126 (4)	14%
The number of hygiene kits with key hygiene messages distributed to SAM affected carer / mother and child	200,000	28,840	14.42%	290,181(3)	34,940	12 %
Operational Partners: <i>ACH and Save the Children</i>						

- (1) *Nutritional centres in the targeted regions of Maradi, Zinder and Tillaberi*
- (2) *Functional nutritional centres in country*
- (3) *Expected Number of Couple child/mother in nutritional centers in 2013*
- (4) *Cumulative results from UNICEF, ACF and Save the Children*

UNICEF and Partners' programming

- In 2012, the WASH Cluster had made considerable efforts to promote the 'WASH in Nut' strategy within both the WASH and Nutrition clusters, and also with several key donors. As a result, the 'WASH in Nut' minimum package has been agreed by Cluster members. Currently, only three partners are leading 'WASH in Nut' activities: UNICEF, ACH and Save the Children UK.

⁵ Source: *Scaling up report, Ministry of Health/UNICEF, 21 February 2013*

- In Tillaberi region, Solidarites is constructing 10 blocks of latrines and 1 block of showers in 5 health centres (Wissili, Sayani, Tamani, Kourani and Kokomani). To ensure access to safe drinking water infrastructures are being built in 3 additional centres (Bonfeba, Namari Goungou et Diamana).

Other WASH Emergency Responses

UNICEF and Partners' programming

- Thanks to ECHO and CERF funding, UNICEF partners continue to implement cholera prevention activities. Activities include the rehabilitation of water points and access to drinking water in Integrated Health Centres, the construction of latrines and installation of hand washing facilities, training and community outreach. With the granting of the no-cost extension by ECHO, activities will be completed by end April.
- Due to lack of funding, needs in the WASH sector have not yet been fully covered at Seno relocation site in Niamey. WASH Cluster partners are actively engaged to secure much needed funding to ensure sanitation and access to drinking water. 100 showers, 225 latrines and an approximate 150,000 L of safe water are required to cover all the remaining gaps.
- In Diffa, further to the overflowing of the Komadougou River in 2012, the 11 sites where affected families relocated, have now been officially declared as permanent resettlement. Central authorities have been working with local authorities to elaborate a recovery plan soon to be shared with partners. UNICEF continues to assist for the remainder of the emergency period and will cover the gaps (394 latrines, 449 showers, 30 drilling) in 6 sites. Funding is required for WASH activities on the remaining 5 sites. An assessment mission carried out in February identified sectoral needs to be addressed.
- UNICEF is currently advocating to raise donors' attention to WASH issues in Seno and Diffa region.

Health

Estimated # / % coverage	UNICEF & operational partners		
	UNICEF Target	Cumulative results (#)	% of Target Achieved
Children <5 receiving measles vaccination*	4,068	5,277	130%
Families receiving 2 ITNs*	5,456	4,092	75%
<i>UNICEF Operational Partners: MoH, WHO, MSF (Belgium, Spain, Switzerland), Concern, Save the Children, Alima/Befen, Help</i> * Refugee camps of Mangaizé, Ayorou and Abala			

UNICEF and Partners' Programming

- Data for January and February remain the same as December 2012, since neither measles vaccination campaigns nor ITN's distributions were organized in the camps.
- Epidemiological reports released by the Ministry of Health for week 7 (11 to 17 February) including cumulative data from 01/01/2013 to 17/02/2013 indicate the following:
 - Meningitis: 41 cases, 3 deaths representing a fatality rate of 7.32 %.
 - Measles: 439 cases suspected, 2 deaths representing a fatality rate of 0.46%.
 - Cholera: 0 cases and 0 deaths.
- The Health Cluster is currently giving special attention to the high number of measles cases. Since the beginning of the year, 439 cases have already been reported over a period of 7 weeks compared to a cumulative result of 1840 cases and 8 deaths reported throughout 2012. So far, 275 cases

have been reported in Tillaberi region (with 0 death), which is the region hosting the refugee camps of Ayorou and Mangaize. Cluster partners are closely monitoring the health situation in the camps.

Child Protection

Estimated # / % coverage	UNICEF & operational partners			Sector / Cluster		
	UNICEF Target	Cumulative results (#)	% of Target Achieved	Cluster Target	Cumulative results (#)	% of Target Achieved
Children with safe access to community spaces for socializing, play, learning in the refugee camps	10,000	7,433	74 %	10,000	7,769	78%
<i>UNICEF Operational Partners: Ministry of Population, Promotion of Women and Protection of Children, Islamic Relief, Plan Niger, World Vision, Help</i>						

UNICEF and Partners' Programming

- In *Abala camp*, since 2012 psychosocial activities have been implemented by the NGO Help in 4 child-friendly spaces (CFS) where children between 2 to 5 years old have access to early learning activities (singing, dancing, etc.). Since February 2013, the Protection Section has allocated US\$200,000 to extend its current partnership with Help to continue implementing these activities until June 2013. It will also ensure the construction of another 2 CFS to face increasing needs.
- In *Mangaizé and Ayorou camps*, Plan has been implementing psychosocial activities with their own funds. However, due to a lack of funding, these activities will soon be interrupted. UNICEF, as Protection Cluster lead, is advocating to raise donors' attention on these issues and to secure funding to maintain these activities.
- In *Abala, Mangaizé and Ayorou camps*, UNICEF partners and Cluster members (World Vision, Plan and Help) are conducting activities for monitoring child rights violations. Activities include interventions in child-friendly spaces and community outreach to support vulnerable children and/or children with problematic behaviour.
- In each refugee camp, action plans have been developed to monitor and follow up the implementation of activities for unaccompanied and separated children (UASC). In addition, the mechanism for identification of UASC has been put in place by UNHCR and UNICEF partners. As of 21 February, a total of 30 UASC have been identified in the camps and other refugee settlements, family tracing has been conducted with the support of ICRC which led to contact with the families of 20 children.
- Partners were trained on Children Associated with Armed Groups and Forces (CAAGF) to ensure preparedness to respond to a possible worsening of the situation in North Mali and potential CAAGF crossing the border into Niger. An action plan was drafted by participants with most activities related to prevention and sensitisation. A working group will be established within the Cluster to discuss further programmatic needs.
- As of today, lack of funding remains an issue, which prevents efficient prevention of child recruitment. UNICEF is advocating to raise donors' attention on a possible permeation of armed groups and/or children previously associated with armed groups in Niger, through the refugee camps.
- Idleness in the camps is an important preoccupation that increases the vulnerability of women and young girls and exposes them to risks of GBV, early marriage and prostitution.

Education

Estimated # / % coverage	UNICEF & operational partners			Sector / Cluster		
	UNICEF Target	Cumulative results (1)	% of Target Achieved	Cluster Target	Cumulative results (2)	% of Target Achieved
# and % of school-aged girls and boys including adolescents with continued access to formal and non-formal basic education	105,000	52,600	50%	150,000	67,600	45%
UNICEF Operational Partners: Regional Directions of the National Education of Agadez, Diffa, Dosso, Maradi, Niamey, Tahoua, Tillabery, Zinder; ONGs : Aide et Action, Oxfam-GB, Save The Children, Humanitaires sans frontières, Plan Niger, Catholic Relief Services, Handicap International						

(1) Cumulative results as of 31 December 2012 including children affected by floods and children who resumed school further to the Back to School campaign.

➤ (2) Cumulative results as of 31 December 2012 including children affected by floods and refugee children.

- The impact evaluation of the Back to School (BTS) campaign that was planned for December 2012 was delayed due to the involvement of most of the Ministry of Education's staff in the national General Census of the Population and Housing carried out during that period. The assessment elaboration process is ongoing.
- To date a total number of 5,577 children are attending classes in refugee camps and in host communities supported by UNICEF.
- In addition, a total number of 1,256 children, of which 824 are girls (69,13%), relocated from their school of origin to the new site of Seno (in the 5th District of Niamey region), and children from 7 schools in the Diffa region affected by floods in October 2012 are being provided with educational services.

UNICEF and Partners' Programming

Further to the signing of a Letter of Understanding (LoU) between UNICEF and UNHCR stipulating that UNICEF will support education for refugees, UNICEF signed PCAs with Oxfam-GB, Plan International and Catholic Relief Services to offer education for children in the camps of Abala, Mangaizé and Tabareybarey (Ayorou), as well as at the spontaneous sites of Kizamou, Miel and Tiguizéfane.

- In Abala refugee camp: as of 15 February, 30 classrooms built by Oxfam-GB to ensure education in the camp have been officially delivered. Oxfam-GB provides education services to 1,667 refugee students of which 835 (50.08%) are girls, 27 Malian teachers, 2 school principals, 2 pedagogic advisors, 1 manager and 2 field agents have been recruited and trained; school supplies such as textbooks and furniture have been provided. Parental education, community mobilization and school committee awareness raising activities are also being offered.
- Mangaize refugee camp (Ouallam): Plan Niger provides similar services to 1,122 refugee students of which 571 (50.89%) are girls.
- Tabareybarey refugee camp (Ayorou): Plan Niger is also UNICEF's implementing partner in this camp. The education package is the same as above and is provided to 1,113 refugee students of which 380 (45.40 %) are girls. Teachers are both Nigeriens and Malians. Since this camp might not be relocated, Plan Niger will speed up the bidding process for the construction of 10 semi-permanent classrooms. Meanwhile, 2 sheds identified in the camp will be used as temporary classrooms. UNICEF will provide tarpaulins to Plan to protect them.
- Spontaneous sites of Kizamou, Miel and Tiguizéfane: Catholic Relief Services provides education to 685 refugee students of which 334 (48.75%) are girls. UNICEF provided 30 school kits to

complement the education package. CRS is reviewing the number of students in the sites to propose the construction of additional classrooms.

- Site of Agando (Tahoua region): Humanitaires Sans Frontières, a local NGO, received US\$50,000 from UNESCO to build 5 semi-permanent classrooms to strengthen the capacity of the public primary multi-grade school in Agando; hence, ensuring the education of 920 students (including refugee children). UNICEF will finance one classroom. However, HSF will review their proposal to accommodate all school-aged refugees located in the region and consider the relocation of Agando to the new site of Intekane.
- Diffa region: As a reminder, Diffa region was severely affected by floods caused by increased water levels of the Komadougou River in October 2012. UNICEF provided to the 7 schools affected tarpaulins for temporary classrooms and 17 school kits to benefit 594 students of which 285 (47.97%) are girls.
- In January, UNICEF carried out a follow-up mission to monitor humanitarian assistance provided at the onset of the floods. In February, an in-depth assessment of educational needs was carried out with local authorities to improve access to education for children who have been relocated on 11 sites. UNICEF will recruit a Programme Assistant for 6 months to ensure proper implementation and monitoring of activities in this region.
- Site of Seno: support continues to be provided to the expanded public school at the site, namely 50 tents and 16 school kits, to ensure children learn in good conditions. Further to a needs assessment, UNICEF will allocate US\$200,000 for the construction of 12 additional semi-permanent classrooms. Another US\$12,000 will cover the provision of school equipment.
- Further to the Back To School campaign organized in September 2012, an assessment of its impact is being organized. Preliminary results should be released at the end of March.

HIV/AIDS

Estimated # / % coverage	UNICEF & operational partners		
	UNICEF Target	Cumulative results (#)	Cumulative results as % of target
HIV positive pregnant women continuing to receive ARVs for PMTCT	11,900	2,880	24%
Children under 15 who continue to receive ART	1,900	460	24%
<i>UNICEF Operational Partners: Solthis, UNFPA, World Bank, WHO, UNAIDS</i>			

Data reported above refers to the entire country. Final data for 2012 are not available as yet.

UNICEF and Partners' programming

- Niger has an estimated HIV prevalence rate of infection of 0.8%. The emergency response is included in the HIV National Strategic Framework, targeting 80% of pregnant women and 60% of affected children. Systematic HIV testing for all children with malnutrition who are not responding to treatment is implemented in Niger (following the recommendations of nutrition protocols). However, monitoring and follow up processes aiming at getting quantitative data on number of children tested and referred are not operational.
- The incremental risks linked to the current situation of refugee/returnee families are being addressed by specialized NGO and supported by UNFPA (counselling, screening, care).

Supply and Logistics

- Since January 2013, Niger CO ordered US\$1.2 million worth of goods for the emergency response. About 78% of this amount was for nutritional supplies. A total of US\$9.2 million worth of goods is in the pipeline for orders placed towards end 2012 and is not included.
- A contingency stock of NFI has been built to respond to the needs of 100,000 people.

Human Resources

- All staff of UNICEF Country Office continue to be involved in the emergency response.
- The three stand-by personnel for WASH and Protection are continuing to give their support to the coordination of clusters until the first quarter of 2013.
- International and national consultants have been recruited for Nutrition section and are on the ground since February 2013. Other recruitments are ongoing.

Funding as of 22 February 2013

Sector	UNICEF Revised Emergency Funding Requirements for 2013 (US\$)	Funds Received (US\$)	Unmet Requirements (US\$)	% Unfunded
Nutrition	22,125,849	4,549,944	17,575,905	80 %
Health	2,211,018	2,500,056	0	0 %
Water, Sanitation and Hygiene	7,238,000	-	7,238,000	100%
Child protection	1,465,900	-	1,465,900	100%
Education	750,000	550,000	200,000	27%
Total for UNICEF Revised Emergency Funding 2012	33,790,767	7,600,000	26,190,767	78 %

UNICEF wishes to express its deep gratitude to all public and private sector donors for the contributions and pledges received, which have made the current response possible. UNICEF would especially like to thank National Committees and donors who have contributed 'un-earmarked' funding. 'Un-earmarked' funding gives UNICEF essential flexibility to direct resources and ensure the delivery of life-saving supplies and interventions to where they are needed most – especially in the form of longer-term and predictable funding and in strengthening preparedness and resilience building. Continued donor support is critical to continue scaling up the response.
