This map illustrates shelters in the area of the Rukban border crossing on the Syrian-Jordanian border. Using satellite images collected by the WorldView-02 satellite on 4 October 2018 and the WorldView-01 satellite on 7 October 2018, UNOSAT identified 10,876 probable shelters along the Jordanian side of the border, 25 kilometers southwest of the Al Waleed crossing. This is a 7 percent decrease in apparent shelters visible compared to the previous UNOSAT analysis done using an image collected 23 and 24 June 2018. Due to the small size and the irregularity of the shelters it is likely that some shelters may have been missed in this analysis, or some shelters were included erroneously. Due to the scale of this map and the lack of suitable border information at this scale, the border in this map has been excluded. This map is intended for field support and local authorities should be consulted for boundary information. This is a preliminary analysis and has not yet been validated in the field. Please send ground feedback to UNITAR-UNOSAT.

**Legend**
- Security berm
- Shelter density level: High, Low

**Map Scale for A3:** 1:65,000

**Satellite Data (1):** WorldView-02
Imagery Date: 4 October 2018
Resolution: 50 cm

**Satellite Data (2):** WorldView-01
Imagery Date: 7 October 2018
Resolution: 50 cm

**Satellite Data (3):** Multiple previous images

**Analysis:** UNITAR - UNOSAT
**Production:** UNITAR - UNOSAT
