UKRAINE
At a glance: 2020 Humanitarian Response Plan
As of January 2020

Humanitarian organizations will continue to address the humanitarian needs and protection concerns of conflict-affected people in Donetska and Luhanska oblasts in eastern Ukraine.

PEOPLE TARGETED
The response aims to reach the most vulnerable people on both sides of the 'contact line', including IDPs in Donetska and Luhanska oblasts as well as elsewhere in Ukraine.

PEOPLE-CENTERED APPROACH
The 2020 Humanitarian Response Plan is designed and implemented with a people-centered approach to ensure accountability to affected persons.

STRATEGIC OBJECTIVES
Provide emergency and time-critical assistance to 2 million people, including 220,000 vulnerable IDPs
Respond to the protection needs and strengthen protection of 1.4 million conflict-affected people, including IDPs
Strengthen national/local response capacity in coordination with development actors in areas where feasible
Expand and secure humanitarian access to 3.4 million people in need, in areas where the needs are most acute

FUNDING
The ability of the humanitarian community to respond to the needs of people is dependent on the level of funding. Despite a slight increase in 2019, the funding has remained low, curtailing the response.

PEOPLE REACHED
The humanitarian community has reached over 1 million people annually, which is half of the targeted population due to limited funding and lack of humanitarian access.

HUMANITARIAN RESPONSE BY SECTOR
The humanitarian response cuts across six sectoral areas – education, food security and livelihoods, health, protection, shelter and non-food items, water and sanitation.

The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.
