

The Core Pipeline (CP) managed by UNICEF and IOM, serves as one of key lifesaving response modalities in South Sudan through the provision of critical WASH items across the country, supporting partners in implementing timely and effective WASH interventions. This factsheet highlights the anticipated spikes moving into 2021, brought on by interventions planned to mitigate the needs highlighted in the release of the latest [South Sudan Integrated Food Security Classification \(IPC\)](#), through the [WASH Cluster Response Scale Up 6 counties and beyond](#), the [Floods Preparedness and Response Plan](#), during which the WASH Cluster Phase 1 response is anticipating a caseload of 132,000 HH (858, 000 Individuals), and the [Covid-19 Preparedness and Response Strategy](#).

As of 28<sup>th</sup> June, the IOM CP received \$1.3 M USD, remaining with an 86% funding gap, and as of 30<sup>th</sup> June, the UNICEF CP received \$2.6 M USD, remaining with a 71% funding gap. **The WASH Cluster estimates that US\$ 9.4M is required in order to ensure the replenishment of the Core Pipeline with key items to scale up the response to food insecurity and prepare the flood season.**

Graph 1 shows the continuing impact of the Famine Prevention Response on the Core Pipeline, combined with the commencement of the flooding response. Table 1 highlights stock breaking points from the upcoming months for famine prevention, Covid-19, monthly HRP and flooding requirements. Graph 2 shows the number of beneficiaries reached each month (excluding repeat beneficiaries), highlighting spikes from initial static and former PoC project restocking in January and famine mitigation programming in March and June, and Graph 3 the number of beneficiaries reached per state (excluding repeat beneficiaries). Additional information can be found by viewing the [WASH Cluster April – August Briefing](#)

Graph 1. Expected distribution needs for combined WASH Famine Prevention Response, anticipated Flooding+Covid-19 response and HRP needs in 2021

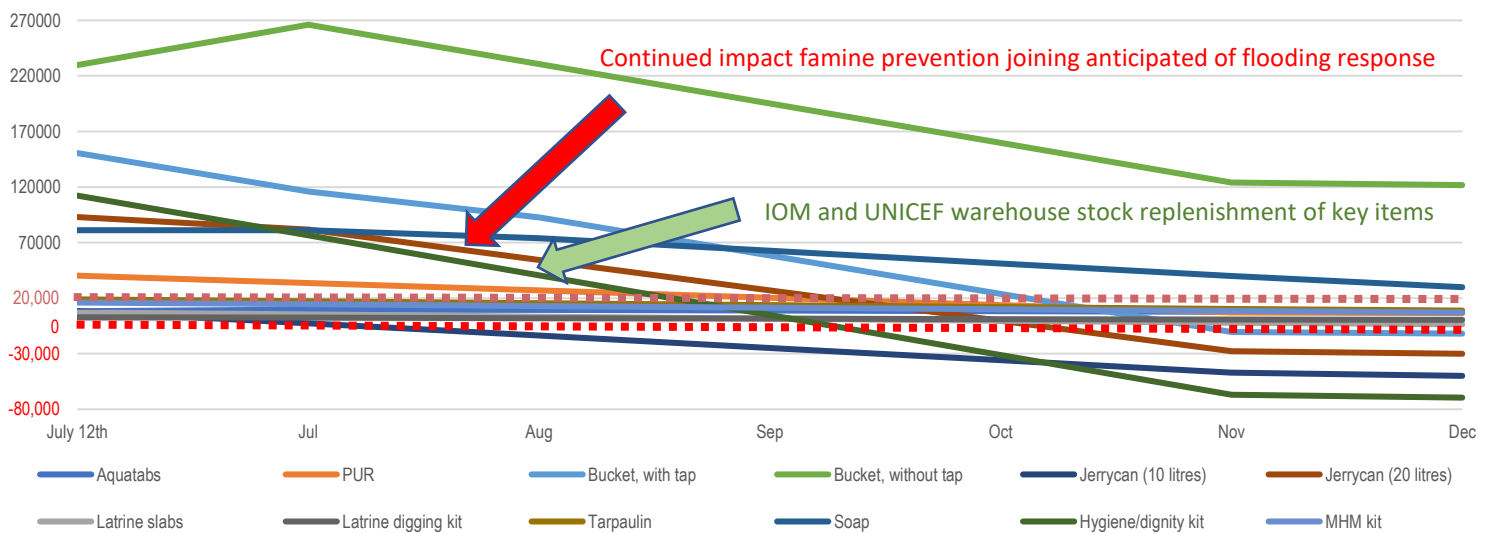

Table 1: Projected availability of CP stock from July to Dec 2021

	12-Jul	Expected requests for Core Pipeline Items					
		Jul	Aug	Sept	Oct	Nov	Dec
Aquatabs (67mg tabs/BOX-16000)	10,333	9,825	9,316	8,808	8,300	7,791	7,747
PUR Sachets (Box of 240)	40,170	33,546	26,922	20,298	13,674	7,050	6,614
Filter cloth (1m x 18m roll)	4,921	6,716	6,512	6,307	6,102	5,898	5,825
Filter cloth (in pieces 18 inch diameter)	30,182	28,468	26,754	25,040	23,326	21,611	20,029
Bucket, with tap, (20 litres w / lid)	150,552	116,129	92,706	58,283	23,860	-10,563	-11,987
Bucket, without tap, (20 litres w / lid)	229,900	266,126	230,642	195,158	159,674	124,190	121,706
